

c3controls®
Everything under control.

THE BEST ELECTRICAL CONTROLS BUSINESS ON THE PLANET!

Unmatched Service | Superior Product Quality | Advantage Pricing

REVISION 02.2025

TEAMWORK MAKES THE DREAMWORK;

c3controls really is a special company doing great things. In 1976 my father, with my mother by his side, left the security of a great career at Westinghouse to become an entrepreneur and together began their version of the American Dream.

While my father passed suddenly in 1996, and now beginning into the 3rd generation, we still carry on his legacy with our own unique twist. Since 1996, we have grown dramatically and just finished another record year. Our growth has been more than just in revenue and team members — continued product development & innovation, added global c3 controlled manufacturing facilities, improved business and operational processes, and expanded relationships focused on trust and helping our customers achieve greater profitability. Through these great relationships we are improving the lives of our team members, the communities where we live and serve here in the USA, El Salvador, and India as well as customers' communities around the world.

We have been blessed to be able to start a non-profit named c3compassion. Through c3compassion we are investing in and directly sponsoring educational opportunities and scholarships for children, orphans, and the less fortunate in the communities around the globe where c3controls facilities are located. We strongly believe that education provides hope for a better future for generations to come.

Yes, we have come a long way since my parents founded the company in our basement and garage. We have though remained true to our principles and continue to be guided by our Christian core values. In the beginning, they set out to build a great product. Today, we are building a great company with clear points of distinction, providing unique and dramatic advantages to our 13,000+ customers.

Geoff Taylor with his family

Thank you for your trust and support. We know we have to continue to earn that trust each and every day. We do not take that trust lightly.

With your continued support, we are well on our way to be the Best Electrical Controls Business on the Planet! Helping, in our small way, to make the world a better place along the way!

If I can ever be of assistance, please do not hesitate to reach out to me directly at gtaylor@c3controls.com. It is our passion to make doing business with c3controls ridiculously easy.

GEOFF TAYLOR

PRESIDENT & CEO

1

Values Driven

Integrity in all our dealings
Respect & Compassion for
team(s) and people
Contributing to the success
of our customers
Risk-taking, innovation and learning
Balanced, long-term perspective
100% accountability / 0 excuses

2

Integrated Manufacturing

Vertical integration is the cornerstone
of c3controls as it places innovation,
development, design, manufacturing,
testing, and shipping all within our
control. With Everything Under Control,
we can ensure the highest quality and
customer satisfaction.

3

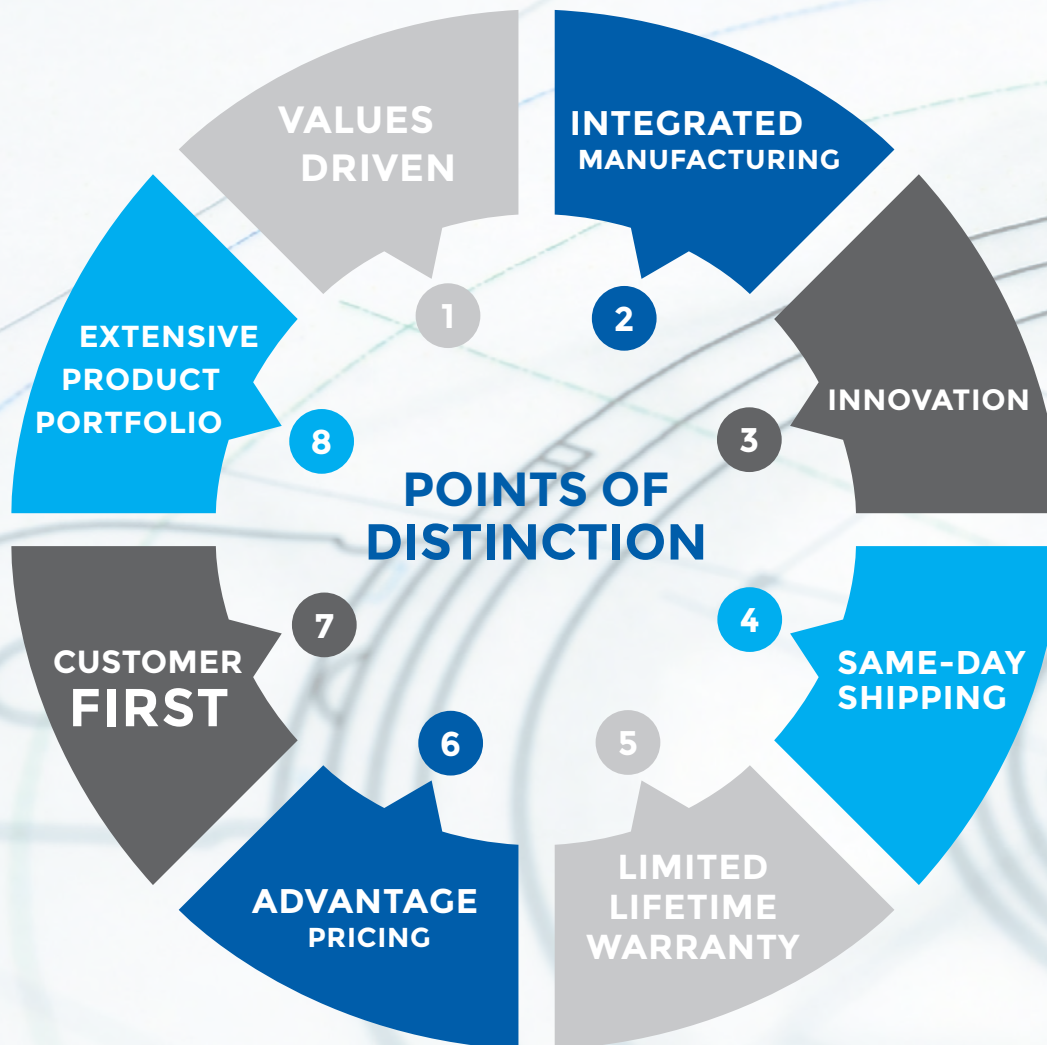

Innovation

Product innovation is in our DNA.
We approach our products as
solutions. Unlike our competition, our
business model allows us to provide
customers with premium controls
without the premium
price.

4

Same-Day Shipping

Reduce inventory. Improve cash-flow.
Save money. Our customers enjoy
peace of mind knowing they'll get what
they need, when they need it. Our
promise, guaranteed!

5

Limited Lifetime Warranty

With total control over engineering
and manufacturing, we are able to
guarantee the highest quality products
on the market—products free of
defects in material, workmanship, and
design.

6

Advantage Pricing

Total control means lower overhead
and direct sales. For our customers,
this translates to savings of up
to 40+% on c3controls premium
products.

7

Customer First

Commitment to the success of our
customers is a core value and the
driving force behind all we do. We
promise concierge style service
that makes doing business easy,
personalized, and responsive.

8

Extensive Product Portfolio

Our 15 million+ product configurations
deliver durability and reliability—even
in the most punishing environments—
meeting and exceeding global
standards for quality and safety.

39 TERMS & CONDITIONS

**EVERYTHING UNDER CONTROL.
THIS IS WHAT YOU EXPECT,
AND IT'S WHAT WE DELIVER.**

Competitive pricing, superior quality, and immediate availability.

Quality products that perform to the highest standards,
supported by an unmatched limited lifetime warranty.

Direct-from-the-manufacturer pricing, guaranteed same-day
shipping, and an unwavering commitment to your satisfaction
—it's an unbeatable combination.

NON-FUSED DISCONNECT SWITCHES

c3controls offers the most rugged, dependable Disconnect Switches that money can buy. From Panel/Base Mount to Door Mount with switch ratings from 16A - 125A, we've got what you need. And, of course, they're all certified to UL and CSA standards and CE marked for global versatility.

NON-FUSED DISCONNECT SWITCHES

c3controls offers a comprehensive line of Disconnect Switches, just one of our extensive product lines designed and manufactured to meet the needs of the machine builder. Check out all the features of our Series DS below!

DEPENDABLE, HIGH QUALITY DISCONNECT SWITCHES—ONLY AT C3CONTROLS.

✓ Proven	Our Disconnect Switches are certified to UL Standards and CE marked for global versatility.	
✓ Multiple Installations	Installations for disconnect switches are available for both door mount and panel/base mount.	
✓ Easy to Install	Panel/Base mount switches snap-on to 35mm DIN Rail or secure to the panel with two fixing screws, and feature dual terminal markings (1/L1, 3/L2, 5/L3 and 2/T1, 4/T2, 6/T3) for fast and easy wiring.	
✓ Simple Wiring	Integral captive terminal clamps are shipped in the backed-out position for easy wiring and are plated for corrosion resistance.	
✓ Convenient	Switches are factory assembled with operating handles for Just-In-Time (JIT) manufacturing and reduced inventory.	
✓ Circuit Isolation	Disconnect switches include positive drive to open double break contacts to ensure circuit isolation, and feature a 10kA short circuit rating at 600V AC with Class J fuses.	
✓ Heavy-Duty	Glass filled polyamide thermoplastic housings are ARC track resistant and provide insulation between poles.	
✓ Customization	Positive, reliable actuation of the switch is ensured through the rigid operating shaft that can be cut to length to fit your enclosure depths.	
✓ Wide Range of Operation	Wide variety of operating handle styles and colors with Type 1, 2, 3, 3R, 4/4X, 12 and 13, IP55, and IP65 ingress protection ratings for the most demanding industrial environments.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

“With c3controls Series DS, service calls have been minimized and I’ve never had to revert to another supplier due to the fact we couldn’t get what we needed on time. I can count on c3controls.”

Dan Hamer, Electrical Engineer • **ESD Waste2Water**

Panel Mount Switch
with PHG HandleDoor Mount Switch
with DHG HandlePanel Mount Switch
with Integral SMP HandlePanel Mount Switch
with Integral SML Handle**UNIQUE PRODUCT LINE FEATURES****PADLOCKABLE SWITCHES**

Operating handles with ON/OFF and international I/O symbols, can be padlocked in the "OFF" position with up to three padlocks for extra safety and the security needed during maintenance activities.

MANUAL MOTOR CONTROLLER

Certified as Manual Motor Controllers Suitable as Motor Disconnects for motors up to 40HP at 480V (55kW at 400V).

ADVANCED SAFETY

Switches include IP20 terminals and a line-side terminal shield is provided as standard on the disconnect switches to guard against accidental contact with live parts.

FLEXIBILITY

The modular switch design allows up to two modules to be added to a three pole switch, with one module installed on the left side and the other installed on the right.

ADDED SECURITY

Our door interlock allows entry into the enclosure only when the switch is in the OFF position, while our pistol operating handles include a concealed "defeater mechanism" that must be operated with a tool and allows entry when the switch is in the ON position.

SERIES DS2 NON-FUSED DISCONNECT SWITCHES

Our Series DS2 Non-Fused Disconnect Switches provide superior performance in rugged applications and are certified as Manual Motor Controllers Suitable as Motor Disconnects for motors up to 40HP at 480V (55kW at 400V). Panel/Base and door mounting options allow switches to be installed in virtually any enclosure.

Panel/Base mount switches are simple to install:

- Snap-on to a 35mm DIN rail.
- Secure to the panel with two (2) fixing screws.
- Dual terminal markings (1/L1, 3/L2, 5/L3 and 2/T1, 4/T2, 6/T3) for fast and easy wiring.

COMPACT SIZE WITH ROBUST DESIGN FEATURES FOR THE MOST DEMANDING DISCONNECTING APPLICATIONS.

1. 10kA short circuit rating at 600V AC with Class J fuses.
2. Positive drive to open double break contacts to ensure circuit isolation.
3. Compact space saving design for reduced size control panels. 16A switch is only 43mm (1-11/16") wide and our 25A ~ 63A switches are only 50mm (1-31/32") wide.
4. Wide variety of operating handle styles and colors with Type 1, 2, 3, 3R, 4/4X, 12 and 13, IP55, and IP65 ingress protection ratings for the most demanding industrial environments.
5. Glass filled polyamide thermoplastic housings are ARC track resistant and provide insulation between poles.
6. Rugged steel collar rigidly secures the operating shaft in the switch on Panel/Base mounted switches.
7. Line side terminal shield (provided as standard) and IP20 terminals guard against accidental contact with live parts.
8. Integral captive terminal clamps are shipped in the backed-out position for easy wiring and are plated for corrosion resistance.
9. Auxiliary contacts, power poles, and neutral poles install on the left or right side of the switch.
10. Complete assembled switches with operating handles are available for Just-In-Time (JIT) manufacturing and reduced inventory.

SERIES DS2 NON-FUSED OPERATING HANDLES

c3controls Series DS2 non-fused disconnect switch operating handles are available in a wide variety of styles, colors, and ingress protection ratings — perfect for any application from light duty to severe industrial environments. External operating handles are easy to install in standard 4-hole panel drilling layouts. A single hole (22.5mm) operating handle is also available for 16A switches. Operating handles can be installed in enclosures with door thicknesses up to 6mm (5/64") depending on handle type, see pages 10-14.

UNIQUE PRODUCT FEATURES

EASY TO INSTALL, STYLISH OPERATING HANDLES PROVIDE RELIABLE ACTUATION IN DISCONNECTING APPLICATIONS AND CAN BE LOCKED OFF FOR EXTRA SAFETY.

1. Handles can be padlocked OFF with up to three padlocks to meet global installation codes and standards requirements.
2. Operating handles with ON/OFF and I/O markings.
3. Door interlock — can only be opened in the OFF position.
4. Positive, reliable actuation of the switch is ensured through the rigid operating shaft that can be cut to length for enclosure depths up to 204mm (8") for 16A switches and up to 355mm (13-63/64") for 25A ~ 63A switches and 456.5mm (17-63/64") for 80A ~ 125A switches.
5. Pistol operating handles include a concealed "defeater mechanism" that must be operated with a tool. Allows entry into the enclosure with the switch in the ON position.

ENCLOSED DISCONNECT SWITCHES

When you need an at-motor non-fused disconnect switch with superior performance, look to c3controls. Our Series EDS2 Enclosed Disconnects feature 3- and 4-Pole disconnect switches in ABS Plastic, Carbon Steel and Polycarbonate enclosures with padlocking operating handles to take on your most demanding application requirements.

ENCLOSED DISCONNECT SWITCHES

Within our extensive product portfolio is our line of Enclosed Disconnect Switches, just one example of our superior product quality. Every one of our products is designed and manufactured to the needs of the machine builder. Check out all the features of our Series EDS2 below!

MANUFACTURING THE MOST RELIABLE AND HEAVY-DUTY ENCLOSED DISCONNECT SWITCHES.

✓ Proven	Enclosures are UL Listed and CSA certified and our Disconnect Switches are certified to UL and CSA Standards and CE marked for global versatility.
✓ Convenience	Single catalog number, no assembly required, shorter control panel Bill of Materials, and easier inventory management.
✓ Reduced Inventory	Switches are factory assembled with operating handles for Just-In-Time (JIT) manufacturing and reduced inventory.
✓ Circuit Isolation	Disconnect switches include positive drive to open double break contacts to ensure circuit isolation, and feature a 10kA short circuit rating at 600V AC with Class J and Class CC fuses.
✓ Heavy-Duty	Glass filled polyamide thermoplastic housings are ARC track resistant and provide insulation between poles.
✓ Wide Range of Operation	Wide variety of operating handle styles and colors with Type 1, 2, 3, 3R, 4/4X, 12, 13 and IP65 ingress protection ratings for the most demanding industrial environments.
✓ Durable Materials	A variety of compact, lift-off cover ABS Plastic, Polycarbonate and Carbon Steel enclosures with Type 1, 4X, 12, 13 and IP65 ratings for the most demanding applications.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“With only one part number and no need for assembly upon delivery, the ordering and installation processes are much smoother with c3controls disconnect switches.”

Mike Jones, Engineer • **Basic Controls Inc.**

ABS Plastic

Polycarbonate

Carbon Steel

**UNIQUE PRODUCT LINE FEATURES****PADLOCKABLE SWITCHES**

Operating handles with ON/OFF and international I/O symbols, can be padlocked in the "OFF" position with up to three padlocks for extra safety and the security needed during maintenance activities.

MANUAL MOTOR CONTROLLER

Certified as Manual Motor Controllers Suitable as Motor Disconnects for motors up to 25HP at 480V (30kW at 400V).

FLEXIBILITY

The modular switch design allows up to two modules to be added to a three pole switch, with one module installed on the left side and the other installed on the right side.

ADVANCED SAFETY

Switches include IP20 terminals and a line-side terminal shield is provided as standard on the disconnect switches to guard against accidental contact with live parts.

IT'S EASY TO BUILD YOUR OWN ENCLOSED DISCONNECT

Simply pick the code number from each of the sections below and combine them to build your part number.

Series EDS2 Enclosed Disconnect Switches (Non-Fused)

EDS2 - I - II - III - IV - V - VI

Example: To build one of our most popular Enclosed Disconnects, the part number would be **EDS2 + II + III + IV + V + VI** or **EDS2-330-PC-GRY-A11**

ENCLOSED NON-FUSED DISCONNECT SWITCHES

Our Series EDS2 Enclosed Non-Fused Disconnect Switches provide superior performance in the most severe industrial environments and are certified as Manual Motor Controllers Suitable as Motor Disconnects for motors up to 25HP at 480V (30kW at 400V).

Product features include:

- 10kA short circuit rating at 600V AC with Class J fuses.
- Positive drive to open double break contacts ensure circuit isolation.

COMPACT SIZE WITH ROBUST DESIGN FEATURES FOR THE MOST DEMANDING DISCONNECTING APPLICATIONS.

1. A variety of compact, lift-off cover ABS Plastic, Polycarbonate and Carbon Steel enclosures with Type 1, 4X, 12, 13 and IP65 ratings for the most demanding applications - including wash-downs and corrosive environments.
2. Red/Yellow or Black/Grey Operating Handles that can be padlocked in the "OFF" position with up to three padlocks for extra safety and the security needed during maintenance activities.
3. The modular switch design allows three and four pole switches and auxiliary contacts to be specified for application flexibility.
4. Switches include IP20 terminals. A line-side terminal shield is provided as standard on the disconnect switches to guard against accidental contact with live parts.
5. ABS Plastic enclosed disconnect switches feature panel/base mount switches for ultimate ease of wiring.

SPECIAL FEATURES

ENGINEERED TO ADD AUXILIARY CONTACTS, POWER POLES, AND NEUTRAL POLES EASILY!

A variety of modular accessories can be installed in the field on most disconnect switches. Installation is easy, modules can be installed on the left or right side of the disconnect switch. Terminal shields can be installed on the line and load side of the disconnect switch.

NEUTRAL POLE MODULES

Normally open early make (NOEM) configuration. IP20 terminals guard against accidental contact with live parts.

MINIATURE CIRCUIT BREAKERS

c3controls offers a comprehensive line of Miniature Circuit Breakers designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series 1100 Miniature Circuit Breakers below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 1100 Miniature Circuit Breakers are UL Listed and Recognized, and CE marked to meet global standards requirements and are compliant to the RoHS directives.	  
✓ Easy to Install	35mm DIN rail mounting for fast and easy installation and removal.	
✓ Visible Markings	High visibility labels and markings; product part number, amperage, and UL & IEC short-circuit ratings can be seen from front and side of the device for easy identification.	
✓ Compact	Control panel sizes can be reduced because the small size, 17.5mm width per pole, allows for smaller control panels.	
✓ Added Safety	Line and load side IP20 guarded finger-safe terminals prevent accidental contact with live parts.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

“

The reliability of components and overnight delivery is crucial to our profitability, and counting on c3controls to deliver at the time of need makes them a good fit for the packaging industry.

”

Jim Kidder, Engineering Manager • **Eriez Magnetics**

UL 489 Branch Circuit Breaker

UL 1077 Supplementary Protector

**UNIQUE PRODUCT LINE FEATURES****FULL-RANGE CIRCUIT PROTECTION**

Available in multiple poles, up to 3 plus neutral, and trip curves to meet our customers needs, all of which are available for Guaranteed Same-Day shipping.

SHORT CIRCUIT CURRENT RATING

10kA @ 480Y/277V short circuit current rating on all constructions.

TRIP-FREE DESIGN

Holding the operating handle in the ON position will not prevent the miniature circuit breaker from tripping.

WIRING MADE EASY

Captive screws make it virtually impossible to lose screws when wiring and our box lug design terminals will accept a wide-range of copper wire sizes. Line/load wiring is reversible for ease of use.

SAFETY

All c3controls miniature circuit breakers have built-in IP20 finger-safe protection from accidental contact. Also, breaker status is clearly indicated via the color-coded status window.

ACCESSORIES & BUS BARS

Snap-on accessories are easily installed without the use of tools, further the bus bars also help lower assembly and installation costs.

THE DIFFERENCES BETWEEN UL 489 BRANCH PROTECTION AND UL 1077 SUPPLEMENTARY PROTECTION

Power Circuit

UL 489 Branch Circuit Breakers

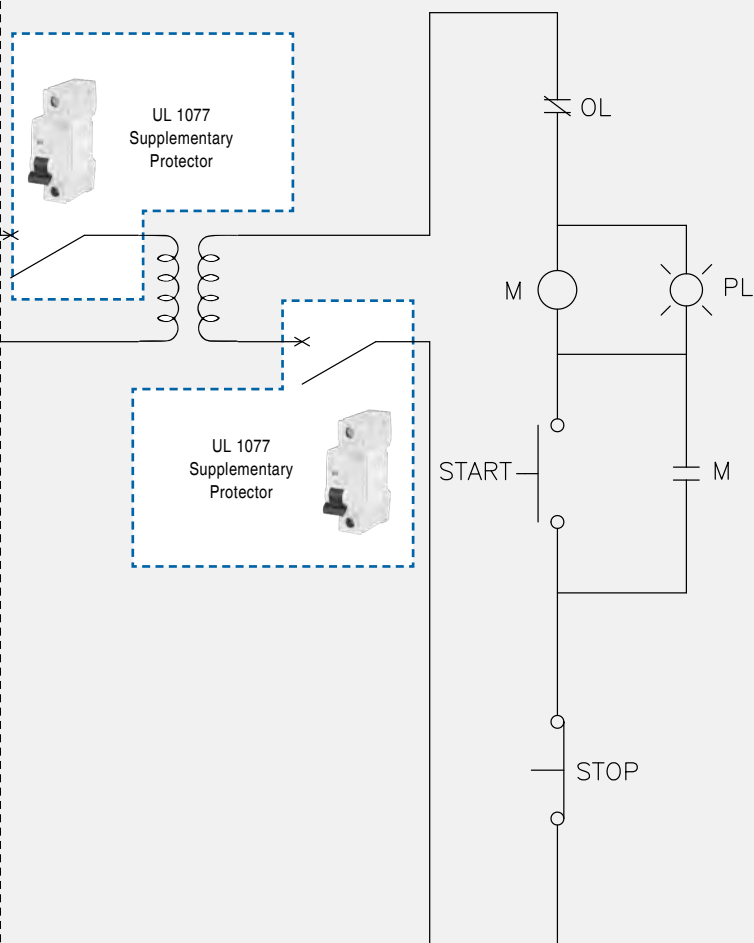

UL 489 Branch Circuit Breakers are designed to serve as the primary overcurrent and short-circuit upstream circuit protection of an electrical panel. In addition to downstream equipment and systems, branch protectors guard the connected wires and cables against improper pole spacings. UL 489 miniature circuit breakers can be used in both UL 489 and UL 1077 applications.

Control Circuit

UL 1077 Supplementary Protectors

UL 1077 Supplementary Protectors, while not the primary device of circuit protection, can be used within or directly upstream from single electrical equipment devices to open the circuit or provide supplementary protection. One common method to test whether or not a supplementary protector is being used properly is by evaluating the circuit integrity when it is removed from the circuit. If a UL 1077 type circuit breaker can be removed and maintain proper protection due to upstream protective devices, then the UL 1077 Miniature Circuit Breaker is used correctly. UL 1077 supplementary protectors can only be used in UL 1077 applications.

UL 489 BRANCH CIRCUIT BREAKERS

c3controls Series 1100 Miniature Circuit Breakers include both thermal and magnetic trip elements for overload and short circuit protection. Our Series 1100-CB circuit breakers provide branch circuit protection and fully meet UL 489 circuit breaker standards. They are available in one, one + neutral, two, three, and three + neutral configurations with current ratings from 0.5A to 63A. In addition, cULus and CE Markings make them suitable for use anywhere in the world.

Product features include:

- Line/load reversible construction makes field wiring error-proof.
- Combination head terminal screws allow the use of “straight”, “phillips”, or “posidrive” screwdrivers for fast and reliable wiring.
- Compact 17.5mm width per pole construction reduces panel size and mounts onto 35mm DIN rail.
- Dual style terminals accept stranded wire $0.8\text{mm}^2 - 2.67\text{mm}^2$ (#18 - #3 AWG) and busbar stabs, and are IP20 guarded against accidental contact with live parts.
- Trip-free design provides assurance that holding the operating handle in the ON position will not prevent the miniature circuit breaker from tripping.
- Up to 21 unique current rating configurations from 0.5 to 63A for a broad range of applications.
- Flexible for use in both alternating current and direct current applications.
- Suitable for use per IEC 60947-2 and IEC 60898.
- Dual trip curve offering (Trip Curves C & D) provides protection for a broad range of AC applications. C trip curves have a low thermal trip delay and a mid-range magnetic trip function to protect low inrush motors, resistive loads, and control circuits. D trip curves have a high thermal trip delay and a very high magnetic trip point to protect high inrush motors, heaters, transformers, and reactive loads while preventing nuisance tripping. DC applications include uninterruptable power supplies (UPS), computer hardware, and telecommunication equipment.

UL 1077 SUPPLEMENTARY PROTECTORS

c3controls Series 1100 Miniature Circuit Breakers include both thermal and magnetic trip elements for overload and short circuit protection. Our Series 1100-SP circuit breakers provide downstream device protection and fully meet UL 1077 supplementary protector standards. They are available in one, one + neutral, two, three, and three + neutral configurations with current ratings from 0.5A to 63A. In addition, cURus and CE Markings make them suitable for use anywhere in the world.

Product features include:

- Line/load reversible construction makes field wiring error-proof.
- Combination head terminal screws allow the use of “straight”, “phillips”, or “posidrive” screwdrivers for fast and reliable wiring.
- Compact 17.5mm width per pole construction reduces panel size and mounts onto 35mm DIN rail.
- Dual style terminals accept stranded wire $0.8\text{mm}^2 - 26.7\text{mm}^2$ (#18 - #3 AWG) and busbar stabs, and are IP20 guarded against accidental contact with live parts.
- Trip-free design provides assurance that holding the operating handle in the ON position will not prevent the miniature circuit breaker from tripping.
- Up to 21 unique current rating configurations from 0.5 to 63A for a broad range of applications.
- Flexible for use in both alternating current and direct current applications.
- Suitable for use per IEC 60947-2 and IEC 60898.
- Triple trip curve offering (Trip Curves B, C, & D) provides protection for a broad range of AC applications. B trip curves are specialized for resistive and slightly inductive loads such as lighting and coils. C trip curves have a low thermal trip delay and a mid-range magnetic trip function to protect low inrush motors, resistive loads, and control circuits. D trip curves have a high thermal trip delay and a very high magnetic trip point to protect high inrush motors, heaters, transformers, and reactive loads while preventing nuisance tripping. DC applications include uninterruptable power supplies (UPS), computer hardware, and telecommunication equipment.

IT'S EASY TO BUILD YOUR OWN CIRCUIT BREAKER

Simply pick the code number from each of the sections below and combine them to build your part number.

Miniature Circuit Breakers UL 489 Branch Circuit Breakers

1100 – CB I II III IV 2 VI

Example: To build one of our most popular UL 489 Miniature Circuit Breakers, the part number would be **1100 + CB + III + IV + 2 + VI** or **1100-CB1C2U10**

SIDE MOUNTED AUXILIARY CONTACT

Our side mounted auxiliary contacts allow remote indication of the status of a circuit breaker or supplementary protector to which it is attached. These contacts come with IP20 guarded terminals and snap onto the left side of the circuit breaker or supplementary protector without the use of tools.

Ratings: AC12 - 6A @ 240V AC (50/60Hz)
DC12 - 1A @ 130V DC
2A @ 48V DC
6A @ 24V DC

CODE	DESCRIPTION	LIST
1100-SA211	1 Normally Open and 1 Normally Closed	\$ 52.60

SIDE MOUNTED SHUNT-TRIP MODULES

Shunt-trip modules enable the circuit breaker or supplementary protector to trip, there by cutting off the power supply to any machine or equipment remotely. These modules snap onto the right side of the circuit breaker or supplementary protector without the use of tools. IP20 guarded terminals protect against accidental contact with live parts and can be used in conjunction with auxiliary contacts.

CODE	DESCRIPTION	LIST
1100-SRXD	110V AC, 50/60Hz	\$ 96.20
1100-SRXF	230V AC, 50/60Hz	\$ 96.20

SIDE MOUNTED AUXILIARY CONTACTS WITH ALARM

This accessory provides remote indication when a circuit breaker or supplementary protector is tripped. The trip can be a result of an overload, short-circuit, operation of shunt-trip accessory, or undervoltage/overvoltage module. Features IP20 guarded terminals to protect against accidental contact with live parts and snaps-on and installs without the use of tools.

Ratings: AC12 - 3A @ 400V AC (50/60Hz)
6A @ 230V AC (50/60Hz)

CODE	DESCRIPTION	LIST
1100-STA211	1 Normally Open and 1 Normally Closed	\$ 67.60

SIDE MOUNTED UNDER VOLTAGE MODULES

Our under voltage modules can be attached on the right side of the circuit breaker or supplementary protector. The circuit breaker or supplementary protector will be forced to trip when the voltage is below ~30% of nominal voltage. These modules feature IP20 guarded terminals to protect against accidental contact with live parts and can be used in conjunction with auxiliary contacts.

CODE	DESCRIPTION	LIST
1100-URXD	110V AC, 50/60Hz	\$184.80
1100-URXF	230V AC, 50/60Hz	\$184.80

HEAVY DUTY LOCK-OFF ATTACHMENT

This lock-off attachment when used with a padlock ensures that no unauthorized person switches the circuit breaker or supplementary protector to the ON state after a trip.

DC MINIATURE CIRCUIT BREAKERS

series
1110

c3controls' line of Series 1110 Direct Current (DC) Miniature Circuit Breakers (MCBs) provide reliable short circuit and overload protection for all your DC industrial control, transportation, energy storage system and photovoltaic applications. Our DC MCBs offer a wide range of pole sizes, amperage ranges, and trip curves providing superior performance and flexible application environments.

DC MINIATURE CIRCUIT BREAKERS

c3controls knows the importance of clean energy in ensuring a more sustainable future. That's why we're proud to offer Direct Current Miniature Circuit Breakers to support and protect the transition to renewable energy and mission critical applications.

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 1110 DC Miniature Circuit Breakers are UL Listed per UL489B, the standard for DC photovoltaic systems and are compliant to the RoHS directives.	
✓ Compact	Only 17.5mm wide per pole for reduced panel area and lower installed costs.	
✓ Wide Range of Operation	Rated 250V DC per pole for up to 1000V DC with current ratings from 0.5A to 63A.	
✓ Easy to Install	35mm DIN rail mounting for fast and easy installation and removal.	
✓ Visible Markings	High visibility labels and markings can be seen from the front and side of the device for easy identification.	
✓ Added Safety	Line and load side IP20 guarded finger-safe terminals prevent accidental contact with live parts, while allowing ring, fork, and bare wire connections.	
✓ Customizable Options	With up to 10 shorting link / jumper configurations, there is a plethora of options to suit all applications.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

Single Pole

Two Pole

Three Pole

Four Pole

UNIQUE PRODUCT LINE FEATURES

FULL-RANGE CIRCUIT PROTECTION

Available in one, two, three, and four pole constructions, C or D trip curves, and include both magnetic and thermal elements for overload and short circuit protection.

SHORT CIRCUIT CURRENT RATING

10kA short circuit current rating on all constructions — the highest interruption rating in the market.

TRIP-FREE DESIGN

Holding the operating handle in the ON position will not prevent the miniature circuit breaker from tripping.

WIRING MADE EASY

Holds solid and stranded wire
Holds fork spade terminals
Captive screws make it impossible to lose screws when wiring and our box lug design terminals will accept a wide range of copper wire sizes.

POLARIZED DESIGN

Provides an extra grade of unidirectional protection for overloads and short circuits. Correct wiring is required to achieve circuit protection performance.

SAFETY

All c3controls miniature circuit breakers have built-in IP20 finger-safe protection from accidental contact. Also, breaker status is clearly indicated via the color-coded status window.

UL 489B BRANCH CIRCUIT BREAKERS

c3controls Series 1110 Direct Current Miniature Circuit Breakers were designed and manufactured for all your DC industrial control, transportation, energy storage system, and photovoltaic applications. With both thermal and magnetic trip elements for overload and short circuit protection, these breakers provide high voltage DC circuit protection and fully meet UL 489B, the standard for DC photovoltaic systems. They are available in one, two, three, and four pole configurations with current ratings from 0.5A to 63A.

Product features include:

- Line/load reversible construction makes field wiring error-proof.
- Combination head terminal screws allow the use of “straight”, “phillips”, or “posidrive” screwdrivers for fast and reliable wiring.
- Compact 17.5mm width per pole construction reduces panel size and mounts onto 35mm DIN rail.
- Dual style terminals accept stranded wire 0.82mm² – 26.7mm² (#18 - #3 AWG) and busbar stabs, and are IP20 guarded against accidental contact with live parts.
- Trip-free design provides assurance that holding the operating handle in the ON position will not prevent the miniature circuit breaker from tripping.
- Up to 22 unique current rating configurations from 0.5 to 63A for a broad range of applications.
- Dual trip curve offering (Trip Curves C & D) provides individual load protection pertaining to direct current for situations like renewable energy generation using solar arrays, energy transfer with micro-grids using battery packs, emergency storage and use with Uninterruptible Power Supplies (UPS).

SOME OF OUR POPULAR CONFIGURATIONS:

DC MINIATURE CIRCUIT BREAKERS		
CATALOG NUMBER	DESCRIPTION	LIST
1110-CB1C2D10-SB	DC Miniature Circuit Breaker, UL 489B, 1 Pole, Trip Curve C, 1.0A, Jumper at Bottom	\$ 142.20
1110-CB1C2U10	DC Miniature Circuit Breaker, UL 489B, 1 Pole, Trip Curve C, 10A	\$ 118.50
1110-CB2C2U30	DC Miniature Circuit Breaker, UL 489B, 2 Pole, Trip Curve C, 30A	\$ 237.00
1110-CB2D2U16-SB	DC Miniature Circuit Breaker, UL 489B, 2 Pole, Trip Curve D, 16A, Jumper at Bottom	\$ 260.70
1110-CB4D2U60-SBTB	DC Miniature Circuit Breaker, UL 489B, 4 Pole, Trip Curve D, 60A, Jumper Connected at Bottom then Top then Bottom	\$ 521.40

**SIDE MOUNTED
AUXILIARY CONTACT**

Our side mounted auxiliary contacts allow remote indication of the status of a circuit breaker or supplementary protector to which it is attached. These contacts come with IP20 guarded terminals and snap onto the left side of the circuit breaker or supplementary protector without the use of tools.

Ratings: AC12 - 6A @ 240V AC (50/60Hz)
DC12 - 1A @ 130V DC
2A @ 48V DC
6A @ 24V DC

CODE	DESCRIPTION	LIST
1100-SA211	1 Normally Open and 1 Normally Closed	\$ 52.60

**SIDE MOUNTED
SHUNT-TRIP MODULES**

Shunt-trip modules enable the circuit breaker or supplementary protector to trip, thereby by cutting off the power supply to any machine or equipment remotely. These modules snap onto the right side of the circuit breaker or supplementary protector without the use of tools. IP20 guarded terminals protect against accidental contact with live parts and can be used in conjunction with auxiliary contacts.

CODE	DESCRIPTION	LIST
1100-SRXD	110V AC, 50/60Hz	\$ 96.20
1100-SRXF	230V AC, 50/60Hz	\$ 96.20

**SIDE MOUNTED AUXILIARY
CONTACTS WITH ALARM**

This accessory provides remote indication when a circuit breaker or supplementary protector is tripped. The trip can be a result of an overload, short-circuit, operation of shunt-trip accessory, or undervoltage/overvoltage module. Features IP20 guarded terminals to protect against accidental contact with live parts and snap-on and installs without the use of tools.

Ratings: AC12 - 3A @ 400V AC (50/60Hz)
6A @ 230V AC (50/60Hz)

CODE	DESCRIPTION	LIST
1100-STA211	1 Normally Open and 1 Normally Closed	\$ 67.60

**SIDE MOUNTED
UNDER VOLTAGE MODULES**

Our under voltage modules can be attached on the right side of the circuit breaker or supplementary protector. The circuit breaker or supplementary protector will be forced to trip when the voltage is below ~30% of nominal voltage. These modules feature IP20 guarded terminals to protect against accidental contact with live parts and can be used in conjunction with auxiliary contacts.

CODE	DESCRIPTION	LIST
1100-URXD	110V AC, 50/60Hz	\$184.80
1100-URXF	230V AC, 50/60Hz	\$184.80

HEAVY DUTY LOCK-OFF ATTACHMENT

This lock-off attachment when used with a padlock ensures that no unauthorized person switches the circuit breaker or supplementary protector to the ON state after a trip.

CODE	DESCRIPTION	LIST
1100-L01	Lock-Off Attachment	\$ 9.80

CONTACTORS

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series 300/310 standard contactors below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 300 and 310 Standard Contactors are UL Listed and CE marked, meeting global standards requirements. 
✓ Compact Size	Reduced panel area for lower installed costs—Four (4) frame sizes directly interchangeable with other manufacturers.
✓ Lower Cost	Snap-on front mounted and side mounted auxiliary contacts install without the use of tools for lower installed costs.
✓ Convenient	Wide variety of AC and DC operating coils for control circuit application flexibility. 50A to 105A DC operated devices feature electronic coil control.
✓ Easy to Install	35mm DIN rail mounting for all contactors from 9A to 105A for fast and easy installation and removal, or panel mounting for more secure installation in high shock and vibration applications.
✓ Modular Design	Modular design allows easy installation of Series 320 Overload Relays and the complete range of Series 330 Motor Protection Circuit Breakers and accessories.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the device for easy reference during installation.
✓ Environmentally Friendly	Environmentally friendly contacts are cadmium free and non-metallic materials are asbestos, halogen, and cadmium free. All c3controls products are compliant to the RoHS directives.
✓ Added Safety	IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“When GinSan expanded to Canada, we needed to find a supplier that could provide us with motor protection products that conformed to Canadian standards without increasing our bottom line. During the evaluation and testing of a new supplier, c3controls motor control products met all of our quality standards. One added feature c3controls offers on their contactors is they have an extra, fourth contact—eliminating the need to add an extra auxiliary onto the device.”

Mike Fox, Engineering Chief • **GinSan Industries Inc.**

Non-Reversing Contactor

Reversing Contactor

UNIQUE PRODUCT LINE FEATURES

HIGH FAULT SCCR

High fault short circuit current rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.

INTEGRAL AUXILIARY

Integral auxiliary contacts, 3 power poles + 1 auxiliary, are standard on all c3controls 9A to 25A non-reversing contactors.

SEAMLESS COMPATIBILITY

c3controls Series 310, 9A to 25A, AC/DC Reversing Contactors are compatible with directly mounted Series 320-B2 Overload Relays, and our 9A to 40A AC/DC Reversing Contactors direct mount onto Series 330 Motor Protection Circuit Breakers.

COMMON ACCESSORIES

Designing starter assemblies and panels is easy! No more remembering which auxiliary works with each contactor. Our complete range of Series 300 Non-Reversing and Series 310 Reversing Contactors shares common accessories reducing inventory and simplifying installation and assembly.

MULTI-POINT TERMINAL COILS

Four terminal coils on all 9A to 105A AC and DC operated contactors are easily accessible, two on the line side and two on the load side.

QUICK IDENTIFICATION

Enhanced markings, improved identification labels, and dual IEC and NEMA terminal markings ensure quick identification of product from all angles simplifying troubleshooting in panels with many devices.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Ensures the protection of
equipment and user.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers					
	To Supply	NEC Part	c3controls Product Series		
Motor disconnecting means		Part IX			
			330	630	Type E: 330 630
Motor branch-circuit, short circuit, and ground-fault protection		Part IV			
					Type E: 330 630
Motor circuit conductor		Part II			
Motor controller		Part VII			
			300/310 330 620 630	Type E: 330 630	
Motor control circuits		Part VI			
Motor overload protection		Part III			
			320 330 620 630	Type E: 330 630	
Motor		Part I			
					

Our motor control products align with Article 430 Part VII, Motor Controller, of the NFPA 70, the National Electrical Code.

IT'S EASY TO BUILD YOUR OWN CONTACTOR

Simply pick the code number from each of the sections below and combine them to build your part number.

Non-Reversing Contactors

SOME OF OUR POPULAR CONFIGURATIONS:

NON-REVERSING CONTACTORS

CATALOG NUMBER	DESCRIPTION	LIST
300-S09N30D10	Non-Reversing, 9A, 3 Pole, 120V AC Coil, 1 NO Auxiliary Contact	\$ 71.00
300-S09N30ZC10	Non-Reversing, 9A, 3 Pole, 24V DC Coil, 1 NO Auxiliary Contact	\$106.00
300-S25N30D10	Non-Reversing, 25A, 3 Pole, 120V AC Coil, 1 NO Auxiliary Contact	\$117.00

NON-REVERSING CONTACTORS

c3controls Series 300 Contactors are ideal for motor, actuator, solenoid, and other power switching applications where panel space is at a premium and device modularity is required to satisfy virtually any application requirement. cULus and CE Markings make them suitable for use anywhere in the world. Small size, IP20 guarded terminals with dual terminal markings, and shared accessories will help reduce your total installed costs and enhance the features and performance of your equipment. Just look and see what the Series 300 has to offer.

Product features include:

- High fault short circuit rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.
- Series 300 25A contactor has an integral auxiliary, 3 power poles plus 1 auxiliary, provides more functionality in a smaller package, reducing bill of material and panel size.
- Removable and replaceable identification marker, standard on all c3controls contactors and Series 300-SFA Auxiliaries, for labeling contactors and front mounted auxiliary contacts - simplifies trouble shooting in panels with many contactors.
- Our side mounted auxiliaries and interlocks are 9mm wide and install without the use of tools onto Series 300 Contactors, reducing panel footprint and simplifying installation.
- Multi-point terminal coils on 9A to 80A AC and DC contactors providing wiring flexibility and installation convenience.
- Lower power consumption for 32A and 40A DC contactors.
- Enhanced markings and high visibility labels for ease of troubleshooting and maintenance.
- Compact size – four (4) frame sizes for devices rated from 9A to 105A. Contactors rated 15HP @ 460V (11kW @ 400V) are only 45mm (1-49/64”) wide reducing panel area requirements – smaller enclosures can be used for lower installed costs.
- AC and DC operating coils for control circuit application flexibility. 50A to 105A DC operated devices feature electronic coil control.
- Environmentally friendly contacts are cadmium free and non-metallic materials are asbestos, halogen, and cadmium free.
- IP20 guarded terminals prevent accidental contact with live parts.
- Dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.
- 35mm DIN rail mounting for all contactors from 9A to 105A for fast and easy installation and removal or panel mounting for more secure installation in high shock and vibration applications. Our 9A to 25A devices are easily installed or removed without the use of tools.
- Modular design allows easy installation of Series 320 Overload Relays and the complete range of Series 330 Motor Protection Circuit Breakers and accessories.
- Combination head terminal screws allow the use of straight, phillips, or posidrive screwdrivers. Allen head screws on 50A through 105A contactors make it easy to apply the proper terminal tightening torque for secure conductor connections.
- Snap-on front mounted auxiliary contacts install without the use of tools for lower installed costs. Single circuits available so you only purchase what you need.

UNIQUE PRODUCT FEATURES

MULTI-POINT TERMINAL COILS

Four terminal coils on all 9A to 105A AC and DC operated contactors are easily accessible on contactor and overload relay assemblies or contactor and motor protection circuit breaker assemblies. The control circuit can be wired from the line side or the load side of the contactor, whichever is most convenient for the installation. Control circuit wire runs can be minimized, and the devices can be easily substituted in your existing equipment without disturbing or changing your control wires. So no matter what components are being used, Series 300 Contactors can be easily and quickly wired, reducing your labor and installation costs.

REVERSING CONTACTORS

c3controls Series 310 Reversing Contactors are ideal for reversing motors in applications where panel space is at a premium and device modularity is required to satisfy virtually any application requirement. cULus and CE Markings make them suitable for use anywhere in the world. A common mechanical interlock, power wiring modules, IP20 guarded terminals with dual terminal markings, and shared accessories help reduce your total installed costs and enhance the features and performance of your equipment. Just look and see what our Series 310 has to offer.

Product features include:

- High fault short circuit rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.
- Series 300 25A contactor has an integral - auxiliary, 3 power poles plus 1 auxiliary, provides more functionality in a smaller package, reducing bill of material and panel size.
- Modular design allows Series 320-B2 Overload Relays to be directly mounted onto Series 310, 9A to 25A, reversing contactors resulting in a high functioning compact starter.
- Removable and replaceable identification marker, standard on all c3controls contactors, simplifies troubleshooting in panels with many devices.
- Multi-point terminal coils on 9A to 80A AC and DC contactors providing wiring flexibility and installation convenience.
- Lower power consumption for 32A and 40A DC contactors.
- Series 330 Motor Protection Circuit Breakers direct mount onto Series 310, 9A to 40A AC and DC, reversing contactors, resulting in a high functioning compact starter.
- Modular design allows use with separately mounted overload relays, or Series 320 Overload Relays can be directly mounted on Series 310 32A to 50A reversing contactors without load-side interconnecting power wires.
- AC and DC operating coils for control circuit application flexibility. 50A to 80A DC operated devices feature electronic coil control.
- Environmentally friendly contacts are cadmium free and non-metallic materials are asbestos, halogen and cadmium free.
- IP20 guarded terminals prevent accidental contact with live parts.
- Dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.
- Device identification marker for labeling contactors and front mounted auxiliary contacts simplify trouble shooting in panels without the use of tools.
- Power wiring modules provide reliable, rigid interconnections between the forward and reverse contactors.
- Combination head terminal screws allow the use of straight, phillips, or posidrive screwdrivers. Allen head screws on 50A through 80A contactors make it easy to apply the proper terminal tightening torque for secure conductor connections.
- Snap-on front mounted auxiliary contacts install without the use of tools for lower installed costs. Single circuits available so you only purchase what you need.

UNIQUE PRODUCT FEATURES

Series 310 Reversing Contactors feature a single, side mounted electrical and mechanical or mechanical only interlock that is used for the whole range of contactors, enabling a 9A contactor to be interlocked with a 105A contactor. The side mounted interlock doesn't increase the depth of the contactor and doesn't prevent front mounted auxiliary contacts from being added to either the forward or reverse contactors. Contactors are physically secured together with a dovetail bracket that installs from the bottom of the contactor - so it can't fall out when it is installed on a DIN rail or on a panel, even in high vibration applications. To complete the reversing contactor assembly, attractive, insulated wiring modules provide error free interconnections between the forward and reverse contactors. Simple to use, modular accessories make reversing contactors easy to assemble in the field - or order them factory assembled. Either way you'll get the performance and features you need for your reversing motor applications.

SOME OF OUR POPULAR CONFIGURATIONS:

REVERSING CONTACTORS		
CATALOG NUMBER	DESCRIPTION	LIST
310-S09N30D22	Reversing, 9A, 3 Pole, 120V AC Coil, 2 NO and 2 NC Auxiliary Contacts	\$261.00
310-S09N30ZC22	Reversing, 9A, 3 Pole, 24V DC Coil, 2 NO and 2 NC Auxiliary Contacts	\$331.00
310-S25N30D22	Reversing, 25A, 3 Pole, 120V AC Coil, 2 NO and 2 NC Auxiliary Contacts	\$389.00
310-S25N30ZC22	Reversing, 25A, 3 Pole, 24V DC Coil, 2 NO and 2 NC Auxiliary Contacts	\$459.00
310-S32N30D22	Reversing, 32A, 3 Pole, 120V AC Coil, 2 NO and 2 NC Auxiliary Contacts	\$462.00

FRONT MOUNTED AUXILIARY CONTACTS

Our front mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. The device identification marker simplifies trouble shooting in panels with many contactors. These contacts snap-on and install without the use of tools. NOTE: See chart below for maximum number of front mounted auxiliary contacts.

CODE	CONTACT CONFIGURATION	CONNECTION DIAGRAM	LIST
300-SFA10	1 Normally Open		\$11.50
300-SFA01	1 Normally Closed		\$11.50
300-SFA10EM	1 Normally Open Early Make		\$17.00
300-SFA01DB	1 Normally Closed Delayed Break		\$17.00

MAXIMUM NUMBER OF FRONT OR SIDE MOUNTED AUXILIARY CONTACTS

CONTACTOR	MAXIMUM NUMBER
S09, S12, S18, S25	4
S32, S40	6
S50, S65, S80, S95, S105	8

WIRING MODULES

Reversing contactor power wiring modules make field assembly of reversing contactors easy. Line and load side over-molded copper bus bar conductors ensure error free installation and make for a rigid assembly with a mechanical interlock (300-SMI) or electrical/mechanical interlock (300-SMEI).

CODE	FOR USE WITH CONTACTORS	LIST
300-RWS25	S09, S12, S18, S25	\$40.00
300-RWS40	S32, S40	\$51.00
300-RWS80	S50, S65, S80	\$97.00

SIDE MOUNTED AUXILIARY CONTACTS

Side mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. NOTE: See chart at left for maximum number of side mounted auxiliary contacts.

CODE	CONTACT CONFIGURATION	CONNECTION DIAGRAM	LIST
300-SSA11	1 Normally Open and 1 Normally Closed		\$31.00
300-SSA20	2 Normally Open		\$31.00
300-SSA11X	1 Normally Open and 1 Normally Closed*		\$31.00
300-SSA20X	2 Normally Open*		\$31.00

*NOTE: For use with 300-SSA11 or 300-SSA20 when more than one side mounted auxiliary contact module is installed on the same side of the contactor.

INTERLOCKS

MECHANICAL INTERLOCK

Our side mounted mechanical interlock for use with reversing contactors, reversing starters, two-speed starters and star-delta (wye-delta) starters. This single interlock can be used with all size contactors from 9A ~ 105A, preventing the forward and reverse contactors from being energized at the same time.

ELECTRICAL & MECHANICAL INTERLOCK

c3controls electrical/mechanical interlock for reversing contactors has the same features as the mechanical interlock but also has two normally closed auxiliaries built into the unit for electrical interlocking, eliminating the need for two normally closed auxiliary contacts and the mechanical interlock. The result of integrating the normally closed auxiliary contact is decreased width of reversing contactors and more available auxiliary contact locations.

CODE	DESCRIPTION	LIST
300-SMI	Side Mounted Mechanical Interlock	\$34.00
300-SMEI	Side Mounted Electrical/Mechanical Interlock	\$43.00

ACCESSORIES FOR NON-REVERSING AND REVERSING CONTACTORS

The complete range of Series 300 Non-Reversing Contactors and Series 310 Reversing Contactors share common accessories including single circuit front mounted auxiliary contacts, two circuit side mounted auxiliary contacts, a single electrical/mechanical or mechanical interlock, and coil mounted surge suppressors. Designing starter assemblies and panels is easy – you don't have to remember which auxiliary is required for each contactor, they all work together. Installation is easy too – once you learn how to install each accessory, it's always the same no matter what contactor it's being installed on. If simple design and assembly isn't enough – you'll also reduce your inventory and maximize its flexibility, because unique accessories are not required for each size contactor.

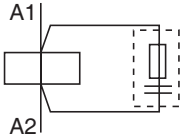

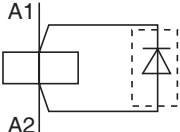

SURGE SUPPRESSORS

Coil mounted surge suppressors protect sensitive electronic components in control circuits from damaging line voltage spikes.

SERIES 300 NON-REVERSING CONTACTOR CIRCUIT DIAGRAMS

SERIES 310 REVERSING CONTACTOR CIRCUIT DIAGRAMS

ELECTRICAL LIFE IN UTILIZATION CATEGORY

To find a contactor's estimated life:

1. Identify the utilization category of the application.
2. Refer to the chart for the applicable utilization category.
3. Locate the intersection of the life-load curve for the contactor selected with the application breaking current (I_e) on the horizontal axis of the chart.
4. Read the estimated contactor life from the vertical axis of the chart.

The life-load curves are based on tests in accordance with IEC 60947-4-1. Many conditions of an actual application effect contact life such as the environment and duty cycle. Therefore, the actual contact life may vary from the life indicated by the curves shown here.

NOTE: **Represents the Non-Reversing or Reversing Contactor Code. Refer to Pages 6 & 8.

When you need reliable motor control and control relays for your control panel, but standard size devices are just too big, look to c3controls. Our Series 300 and Series 310 Miniature Contactors and Series 300 Control Relays are compact in size, available with AC or DC coils, and offer a wide variety of accessories including auxiliary contacts, electronic timers, reversing contactor modules, and more. Small in size, big in performance! It's just another c3controls advantage!

MINIATURE CONTACTORS & CONTROL RELAYS

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series 300/310 Miniature Contactors and Control Relays below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 300 Miniature Non-Reversing Contactors and Control Relays and Series 310 Miniature Reversing Contactors are UL Listed and CE marked, meeting global standards requirements. 
✓ Lower Cost	Snap-on, front mounted auxiliary contacts install without the use of tools for lower installed costs.
✓ Convenient	Wide variety of AC and DC operating coils for control circuit application flexibility.
✓ Easy to Install	35mm DIN rail mounting for all contactors and control relays for fast and easy installation and removal or panel mounting for more secure installation in high shock and vibration applications.
✓ Simplified Installation	Can be installed/mounted in multiple orientations, including upside down.
✓ Modular Design	Modular design allows Series 320 Overload Relays to be easily installed and allows use with the complete range of Series 330 Motor Protection Circuit Breakers and accessories.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the devices for easy reference during installation.
✓ Environmentally Friendly	Environmentally friendly contacts are cadmium free and non-metallic materials are asbestos, halogen, and cadmium free. All c3controls products are compliant to the RoHS directives.
✓ Added Safety	IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“After ranking each manufacturer by voltage pick-up/drop-off and decibel level, we discovered that when it came to performance versus price, c3controls held an edge over other competitive products.”

Joseph Scott, Project Manager • **Smith Pump Company**

Miniature Non-Reversing Contactor

Miniature Reversing Contactor

Miniature Control Relay

UNIQUE PRODUCT LINE FEATURES

HIGH FAULT SCCR

High fault short circuit current rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.

COMPACT SIZE

H: 58mm (2.28")
W: 45mm (1.77")
D: 52mm (2.05")

Leading the industry with our compact miniature 10HP contactors and control relays. One frame size (AC or DC) reduces panel area for lower installed costs – 28% reduction in panel area compared to standard devices.

INTEGRAL AUXILIARY

Integral auxiliary contacts, 1 NO or 1 NC, are standard on all c3controls miniature non-reversing contactors.

SEAMLESS COMPATIBILITY

Miniature Reversing Contactors are compatible with direct mounted Series 320-B1 Overload Relays and Series 330 Motor Protection Circuit Breakers.

COMMON ACCESSORIES

Designing starter assemblies and panels is easy! No more remembering which auxiliary works with each contactor. Our complete range of Series 300 Miniature Contactors and Control Relays share common accessories, reducing inventory and simplifying installation and assembly.

QUICK IDENTIFICATION

Enhanced markings, improved identification labels, and dual IEC and NEMA terminal markings ensure quick identification of product from all angles simplifying troubleshooting in panels with many devices.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls products deliver like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP contactors and control relays. One frame size (AC or DC)—28% reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Ensures the protection of equipment and user.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers					
	To Supply	NEC Part	c3controls Product Series

MINIATURE CONTACTORS AND CONTROL RELAYS

c3controls Series 300 Miniature Contactors and Control Relays are a compact family of control devices for switching motors and other logic control circuits. Our Series 310 Miniature Reversing Contactors are ideal for reversing motors in applications where panel space is at a premium and device modularity is required to satisfy virtually any application requirement. Common accessories enable the devices to be customized for each application. For motor overload protection, Series 320 Overload Relays can be directly mounted to miniature contactors. Just look and see what our Series 300 Miniature Non-Reversing Contactors and Control Relays and Series 310 Miniature Reversing Contactors have to offer.

Product features include:

- High fault short circuit rating of 100kA @ 480V and 600V with Class J Fuses, provides safety and reliability in high fault applications.
- Removable and replaceable identification marker, standard on all c3controls Miniature Non-Reversing Contactors and Control Relays, for labeling contactors and front mounted auxiliary contacts – simplifies trouble shooting in panels with many contactors.
- Series 330 Motor Protection Circuit Breakers direct mount onto Series 310 Reversing Contactors AC or DC delivering exceptional performance and functionality in a compact solution.
- Enhanced markings and high visibility labels for ease of troubleshooting and maintenance.
- Compact size – one (1) frame size for devices rated up to 16A, 10HP @ 460V (7.5kW @ 400V) reducing panel area requirements – smaller enclosures can be used for lower installed costs.
 - Miniature Non-Reversing Contactors and Control Relays: 45mm wide x 58mm high x 52mm deep (1-49/64" x 2-9/32" x 2-3/64")
 - Miniature Reversing Contactors: 90mm wide x 61mm high x 59mm deep (3-37/64" x 2-13/32" x 2-21/64")
- AC and DC operating coils for control circuit application flexibility – device is the same physical size with an AC or DC coil.
- Modular design and common snap-on accessories are easily installed without the use of tools, lowering assembly and installation costs.
- A wide variety of common accessories including:
 - 2 and 4 circuit front mounted auxiliary contacts with NO and NC configurations
 - Surge suppressors – RC, varistor, and diode
 - Electronic timers – On-Delay and Off-Delay with timing ranges up to 30 seconds
 - Reversing contactor accessories – mechanical interlock and interconnecting wiring modules
 - Printed circuit board link module
- Front mounted auxiliary contacts and surge suppressors install directly on top of the single front mounted mechanical interlock when used with our Miniature Reversing Contactors.
- Miniature Contactors compatible with direct mounted Series 320 Overload Relays with current ratings from 0.28 to 17A.
- IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
- Device identification marker for labeling the contactor or control relay simplifies troubleshooting in panels with many devices.
- Universal ratings and markings: A, kW, and HP ratings as well as applicable 3rd party certification markings.
- 35mm DIN rail mounting for fast and easy installation and removal without the use of tools, panel mounting for more secure installation in high shock and vibration applications.
- Miniature Non-Reversing Contactors and Control Relays feature printed circuit board mounting with an accessory link module.
- Control relay includes bifurcated contacts, rated 16A AC-1, A600, and Q600 for high current switching applications up to 600V.
- Four pole control relays with NO and NC contact configurations.

UNIQUE PRODUCT FEATURES

The Printed Circuit Board Link Module installs directly on the terminals of standard miniature contactors and control relays enabling them to be direct mounted on an electronic printed circuit board. The module is rated 16A AC-3 and 22A AC-1 to take full advantage of the maximum switching capability of the miniature contactor and control relay.

The insulated, over-molded wiring modules provide error free interconnections for reversing the power poles, and provide the electrical interlock through the integrated normally closed auxiliary contacts.

IT'S EASY TO BUILD YOUR OWN MINIATURE CONTROL RELAY

Simply pick the code number from each of the sections below and combine them to build your part number.

ACCESSORIES FOR MINIATURE CONTACTORS AND CONTROL RELAYS

The complete range of Series 300 Miniature Contactors and Control Relays share common accessories including auxiliary contacts, electronic timers, reversing contactor modules, surge suppressors and a printed circuit board link module if you don't want to mount these devices on a panel or 35mm DIN rail. Designing starter assemblies and panels is easy – you don't have to remember which auxiliary is required for each contactor or control relay, they all work together. Installation is easy too – once you learn how to install each accessory, it's always the same no matter what contactor or control relay it's being installed on. If simple design and assembly are not enough – you'll also reduce your inventory and maximize its flexibility, because unique accessories are not required for each size contactor or control relay.

IT'S EASY TO BUILD YOUR OWN OPERATING COIL

Simply pick the code number from each of the sections below and combine them to build your part number.

OVERLOAD RELAYS

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series 320 Overload Relays below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 320 Overload Relays are UL Listed and CE marked meeting global standards requirements. 
✓ Reliability	Trip Class 10 for reliable and accurate protection against overload conditions. Trips within 10 seconds when carrying a current of 720%.
✓ Trip Indication	Visible trip indication to provide clear indication of what device tripped, simplifies troubleshooting in panels.
✓ Visible Markings	High visibility labels and markings; dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.
✓ Modular Design	Modular design allows Series 320 Overload Relays to be direct mounted onto Series 300 Contactors.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the devices for easy reference during installation.
✓ Added Safety	IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“When I evaluate components for our machines I consider three things: quality, price, and lead-time. All are equally important, and most manufacturers can only deliver on any two out of the three. c3controls delivers all three without fail. We get quality products at a price that’s remained competitive since we first began doing business with them back in 2006, and what we buy is always in stock.”

Annie Carbajal, Purchasing Manager • **Aqueous Technologies**

UNIQUE PRODUCT LINE FEATURES

HIGH FAULT SCCR

High fault short circuit current rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.

ADJUSTABLE CURRENT SETTING

Full load current adjustment ratio of approximately 1:1.5 enables overload relay to be set to exact FLA of motor.

PHASE LOSS SENSITIVITY

Single phase sensitivity to protect motors against damaging phase loss conditions.

SELECTABLE RESET MODE

Manual or automatic reset and test modes, and stop button all in a single device for convenient control circuit wiring.

SEAMLESS COMPATIBILITY

Series 320-B2 Overload Relays direct mount onto all Series 300 Non-Reversing and Series 310, 9A to 25A AC/DC, Reversing Contactors and Series 320-B1 Overload Relays direct mount onto all Series 300/310 Miniature Non-Reversing and Reversing Contactors.

TRIP TEST FUNCTION

Trip test function standard on all c3controls Series 320-B2 to 320-B5, allows for easier installation, testing, and troubleshooting.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Ensures the protection of
equipment and user.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers					
	To Supply	NEC Part	c3controls Product Series		
Motor disconnecting means		Part IX			
			330	630	Type E: 330 630
Motor branch-circuit, short circuit, and ground-fault protection		Part IV			
					Type E: 330 630
Motor circuit conductor		Part II			
Motor controller		Part VII			
			300/310 330 620 630	Type E: 330 630	
Motor control circuits		Part VI			
Motor overload protection		Part III			
			320 330 620 630	Type E: 330 630	
Motor		Part I			

Our motor control products align with Article 430 Part VII, Motor Controller, of the NFPA 70, the National Electrical Code.

IT'S EASY TO BUILD YOUR OWN OVERLOAD RELAY

Simply pick the code number from each of the sections below and combine them to build your part number.

Bimetallic Overload Relays

320-B

/ //

Example: To build one of our most popular Overload Relays, the part number would be **320-B + II** or **320-B2U32**

FOR OVERLOAD RELAYS

BIMETALLIC OVERLOAD RELAYS

c3controls Series 320 Bimetallic Overload Relays provide a thermal Trip Class 10 overload protection for single and three phase motors, and phase loss protection for three phase motors. Other features like IP20 guarded terminals with dual terminal markings, integral stop button, and direct mounting will help you reduce your total installed costs and enhance the features and performance of your equipment. Just look and see what our Series 320 Overload Relays have to offer.

Product features include:

- High fault short circuit rating of 100kA @ 480V and 600V with Class J Fuses, provides safety and reliability in high fault applications.
- Visible trip indication provides clear indication of what device has tripped and simplifies trouble shooting in panels with many contactors.
- Trip test function standard on Series 320-B2 to 320-B5 overload relays, allows for easier installation, testing, and troubleshooting.
- Series 320-B1 and 320-B2 Overload Relays direct mount onto Series 310 Miniature Reversing Contactors and Series 310, 9A to 25A, Reversing Contactors. The result is seamless compatibility and a high performing multi-function solution.
- Enhanced markings and high visibility labels for ease of troubleshooting and maintenance.
- Series 320-B1 Overload Relays for use with Series 300 Miniature Contactors.
- Series 320-B1 Overload Relays include integral connection to auxiliary and coil terminations for ease of wiring during installation when installed on Series 300 Miniature Contactors.
- Series 320-B1 Overload Relays share the same great features and benefits of the larger frame sizes.
- Trip Class 10 for reliable and accurate protection against overload conditions.
- Single-phase sensitivity to protect motors against damaging phase loss conditions.
- Direct mounting to all contactors, Miniature and Standard.
- Dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.
- IP20 guarded terminals prevent accidental contact with live parts.
- Combination head terminal screws allow the use of straight, phillips or posidrive screwdrivers. Allen head screws on 320-B4 and 320-B5 overload relays make it easy to apply the proper terminal tightening torque for secure conductor connections.
- Stop button for convenient and economical control circuit wiring.
- Ambient temperature compensation ensures reliable motor protection even in high temperature environments.
- Electrically isolated and integral 1 Normally Open and 1 Normally Closed auxiliary contacts.
- Selectable reset mode (manual or automatic).

UNIQUE PRODUCT FEATURES

A – Automatic Reset Only
 AUTO – Automatic Reset and Test
 H – Manual Reset Only
 HAND – Manual Reset and Test

c3controls Series 320 Bimetallic Overload Relays feature a multi-function reset button enabling the user to select the reset mode – manual or automatic and whether or not to enable the test function. *All of this is achieved with just one unit, reducing your inventory!*

When the reset button is pressed, with the test function enabled, the Normally Open (NO) contact closes and the Normally Closed (NC) contact opens to verify the control circuit functionality. In addition, the NC contact can be used in a “Stop” circuit. With the test function disabled, the NO and NC contacts do not change state when the reset button is pressed – preventing unauthorized personnel from operating the control circuit.

Multiple functions in a single device help you to reduce inventory and customize the overload relay operation to provide the performance and features you need for your specific application.

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series 620 Contactor and Overload Relay Assemblies below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 620 DOL Starters are UL Listed and CE marked meeting global standards requirements. 
✓ Compact Size	Four (4) frame sizes for devices rated from 9A to 105A. Starter rated 15HP @ 460V (11kW @ 400V) are only 45mm (1-49/64") wide reducing panel area requirements – smaller enclosures can be used for lower installed costs.
✓ Lower Cost	Snap-on front mounted and side mounted auxiliary contacts install without the use of tools for lower installed costs.
✓ Visible Markings	High-visibility labels and markings. Dual IEC and NEMA terminal markings for easy wiring anywhere in the world.
✓ Easy to Install	35mm DIN rail mounting for all contactors from 9A to 105A for fast and easy installation and removal, or panel mounting for more secure installation in high shock and vibration applications.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the devices for easy reference during installation.
✓ Added Safety	IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“We look to c3controls first for all our standard controls. c3controls has always given us the best mix of value, product selection, and lead times.”

UNIQUE PRODUCT LINE FEATURES

CONVENIENCE

Factory assembly of a Series 300 Contactor and Series 320 Overload Relay provides the convenience of a single catalog number and shorter control panel bill of material.

HIGH FAULT SCCR

High fault short circuit current rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.

INTEGRAL AUXILIARY

Integral auxiliary contacts, 3 power poles + 1 auxiliary, are standard on all c3controls 9A to 25A non-reversing contactors.

ADJUSTABLE CURRENT SETTINGS

Full load current adjustment ratio of approximately 1:1.5 enables overload relay to be set to exact Full Load Ampere (FLA) of motor.

SELECTABLE RESET MODE

Manual or automatic reset and test modes, and stop button all in a single device for convenient control circuit wiring.

TRIP TEST FUNCTION

Trip test function comes standard on all c3controls Series 320-B2 to 320-B5 overload relays and allows for easier installation, testing, and troubleshooting.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Ensures the protection of
equipment and user.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers					
	To Supply	NEC Part	c3controls Product Series		
Motor disconnecting means		Part IX	 330	 630	 Type E: 330 630
Motor branch-circuit, short circuit, and ground-fault protection		Part IV			 Type E: 330 630
Motor circuit conductor		Part II			
Motor controller		Part VII	 300/310 330	 620 630	 Type E: 330 630
Motor control circuits		Part VI			
Motor overload protection		Part III	 320	 330	 620 630
Motor		Part I			 Type E: 330 630

Our motor control products align with Article 430 Part VII, Motor Controller, of the NFPA 70, the National Electrical Code.

IT'S EASY TO BUILD YOUR OWN DIRECT-ON-LINE (DOL) STARTER

Simply pick the code number from each of the sections below and combine them to build your part number.

Direct-On-Line Starters (Contactor + Overload Relay)

620 - I II III IV V

Example: To build one of our most popular DOL Starters, the part number would be **620 + II + III + IV + V** or **620-S09D10-2D63**

**AVAILABLE FRAME SIZES FOR
DOL STARTERS**

DIRECT-ON-LINE (DOL) STARTERS

c3controls Series 620 Direct-On-Line (DOL) Starters are assemblies of a Series 300 Contactor and a Series 320 Overload Relay. The contactor provides the repeated On/Off switching for the motor. The overload relay includes Class 10 thermal trip elements for overload protection of the motor and motor branch circuit conductors. Small size, IP20 guarded terminals with dual terminal markings, and shared accessories will help reduce your total installed costs and enhance the features and performance of your equipment. Just look and see what our Series 620 assembled starters have to offer.

Product features include:

- High fault short circuit rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.
- Compact size – devices rated 25A include 3 power poles that are 45mm (1.49/64”) wide reducing panel area requirements – smaller enclosures can be used for lower installed costs.
- Trip test function standard on Series 320-B2 to 320-B5 Overload Relays, allows for easier testing and troubleshooting.
- Modular design and common accessories including auxiliary contacts and surge suppressors.
- Snap-on accessories are easily installed without the use of tools, lowering assembly and installation costs.
- IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
- Device identification marker for labeling the starter simplifies trouble shooting in panels with many devices.
- Universal ratings and markings: A, kW, and HP ratings as well as applicable 3rd party certification markings.
- Single phase sensitivity to protect motors against damaging phase loss conditions.
- Stop button for convenient and economical control circuit wiring.
- Ambient temperature compensation ensures reliable motor protection even in high temperature environments.
- Compact size – four (4) frame sizes for devices rated from 9A to 105A. Starters rated 15HP @ 460V (11kW @ 400V) are only 45mm (1.49/64”) wide reducing panel area requirements – smaller enclosures can be used for lower installed costs.
- AC and DC operating coils for control circuit application flexibility. 50A to 105A DC operated devices feature electronic coil control.
- Single 35mm DIN rail mounting for all starters from 9A to 105A for fast and easy installation and removal or panel mounting for more secure installation in high shock and vibration applications. Our 9A to 25A starters are easily installed or removed without the use of tools.
- Unobstructed access to the two contactor coil terminals on the line-side of the starter makes control circuit wiring simple.
- All Series 300 Contactor and Series 320 Overload Relay features.

UNIQUE PRODUCT FEATURES

MULTI-FUNCTION RELAYS

c3controls Series 320 Bimetallic Overload Relays feature a multi-function reset button enabling the user to select the reset mode – manual or automatic and whether or not to enable the test function.

When the reset button is pressed, with the test function enabled, the Normally Open (NO) contact closes and the Normally Closed (NC) contact opens to verify the control circuit functionality. In addition, the NC contact can be used in a “Stop” circuit. With the test function disabled, the NO and NC contacts do not change state when the reset button is pressed – preventing unauthorized personnel from operating the control circuit.

Multiple functions in a single device help you to reduce inventory and customize the overload relay operation to provide the performance and features you need for your specific application.

A – Automatic Reset Only
AUTO – Automatic Reset and Test
H – Manual Reset Only
HAND – Manual Reset and Test

Modular contactor accessories can be installed in the field on all starters. Front and side mounted auxiliary contacts are common to all starter sizes. Surge suppressors install easily and securely to the contactor coil terminals.

FRONT MOUNTED AUXILIARY CONTACTS

Our front mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. The device identification marker simplifies trouble shooting in panels with many contactors. These contacts snap-on and install without the use of tools. NOTE: See chart below for maximum number of front mounted auxiliary contacts. See Contactor Section 4 Page 10 for front mounted auxiliary contact part number and ordering information.

MAXIMUM NUMBER OF FRONT OR SIDE MOUNTED AUXILIARY CONTACTS

CONTACTOR	MAXIMUM NUMBER
S09, S12, S18, S25	4
S32, S40	6
S50, S65, S80, S95, S105	8

SURGE SUPPRESSORS

Coil mounted surge suppressors protect sensitive electronic components in control circuits from damaging line voltage spikes. See Contactor Section 4 Page 11 for surge suppressor part number and ordering information.

SIDE MOUNTED AUXILIARY CONTACTS

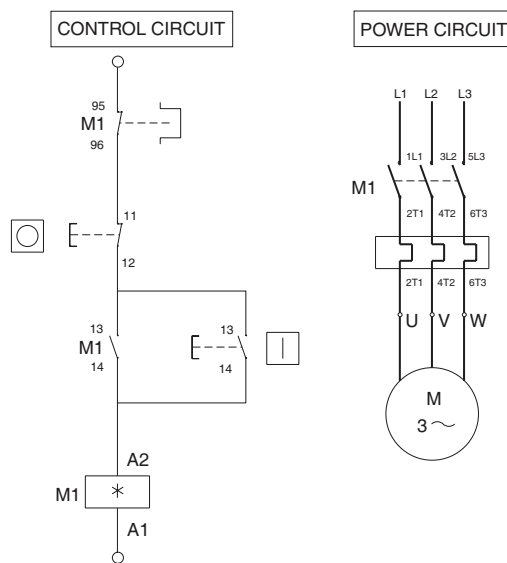

Side mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. NOTE: See chart at left for maximum number of side mounted auxiliary contacts. See Contactor Section 4 Page 10 for side mounted auxiliary contact part number and ordering information.

OPERATING COILS

Replacement coils for use with S09 - S105 Contactors. See Contactor Section 4 Page 12 for operating coil part number and ordering information.

ENCLOSED CONTACTOR & OVERLOAD RELAY ASSEMBLIES

For compact starters that offer reliable protection for your motors and perform in the most demanding situations, c3controls Enclosed Direct-On-Line (DOL) Starters are what you need. Our Series E620 comes pre-assembled with our Series 300 Contactor, Series 320 Overload Relay, and 22mm IEC pilot devices, all within the protection of our durable polycarbonate enclosure. With its compact size and factory wiring, our Series E620 is engineered to save you panel space, cost, and valuable time during installation.

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge. Check out all the features of our Series E620 Enclosed Contactor and Overload Relay Assemblies below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series E620 Enclosed DOL Starters are UL Listed and CE marked meeting global standards requirements.	
✓ Compact Size	Four (4) frame sizes for devices rated from 9A to 65A. Starters rated 15HP @ 460V (11kW @ 400V) are only 45mm (1-49/64") wide reducing panel area requirements – smaller enclosures can be used for lower installed costs.	
✓ Simple Customization	Our Series E620 Enclosed DOL Starters come with various pilot device and wiring options for appropriate operator interface.	
✓ Polycarbonate Enclosures	Available in two sizes, our polycarbonate enclosures come with a lift-off cover, and are rated Type 1, 4/4X, and IP66 for the most demanding applications—including wash-downs and corrosive environments.	
✓ Visible Markings	High visibility labels and markings; dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.	
✓ Lower Cost	Snap-on front mounted and side mounted auxiliary contacts install without the use of tools for lower installed costs.	
✓ Environmentally Secure	With 4/4X and IP66, our E620 line is built to last and withstand dust, corrosion, ice and rain.	
✓ Added Safety	IP66 guarded terminals with dual terminal markings prevent accidental contact with live parts.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Quick Shipment	We assemble, test and ship within 3 days, including legend plates—and confirm every order ensuring accuracy.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

“Once we switched to c3controls’ Series 300 Contactors and Series 320 Overload Relays, we immediately reduced field failures and maintenance costs.”

Craig Boozer, AVP Electrical/Technical Support • **Ice House America**

Type F Enclosure
(180mm x 130mm x 127mm)

Type G Enclosure
(255mm x 180mm x 177mm)

UNIQUE PRODUCT LINE FEATURES

FACTORY ASSEMBLED AND WIRED

Factory assembled and wired starters and pilot devices provide the convenience of a single catalog number and a shorter control panel bill of material.

HIGH FAULT SCCR

High fault short circuit current rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.

INTEGRAL AUXILIARY

Integral auxiliary contacts, 3 power poles + 1 auxiliary, are standard on all c3controls 9A to 25A non-reversing contactors.

ADJUSTABLE CURRENT SETTING

Full load current adjustment ratio of approximately 1:1.5 enables overload relay to be set to exact FLA of motor.

SELECTABLE RESET MODE

Manual or automatic reset and test modes, and stop button all in a single device for convenient control circuit wiring.

TRIP TEST FUNCTION

Trip test function standard on all c3controls Series 320-B2 to 320-B5 overload relays, allows for easier installation, testing, and troubleshooting.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Ensures the protection of
equipment and user.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers

SERIES E620 ENCLOSED DIRECT-ON-LINE (DOL) STARTERS

c3controls Series E620 Enclosed Direct-On-Line (DOL) Starters are assemblies of a Polycarbonate Enclosure, Series 300 Contactor, Series 320 Overload Relay, and Series 22mm IEC pilot devices. Our pilot devices and enclosures are rated for Type 4X and IP65. The contactor provides the repeated On/Off switching for the motor, and the overload relay includes Class 10 thermal trip elements for overload protection of the motor and motor branch circuit conductors. A variety of pilot devices are available, including non-illuminated momentary push buttons, non-illuminated momentary dual push buttons (flush green, extended red and blue reset), maintained selector switches (2- and 3-position), auxiliary contacts (NO and NC) and pilot lights (red, green and amber) for operation and indication. To save time and reduce installation cost, c3controls Series E620 are factory assembled and wired. We also offer the option of no pre-wiring.

Product features include:

- High fault short circuit rating of 100kA @ 480V and 600V with Class J fuses, provides safety and reliability in high fault applications.
- Visible trip indication on Series 320 provides clear indication of what device has tripped, simplifies troubleshooting in panels with many devices.
- Trip test function standard on Series 320-B2 to 320-B5 Starters, allows for easier testing, installation, and troubleshooting.
- Lower power consumption for Series 300-S32 to 300-S40 DC Contactors, reducing power supply size, saving space and money.
- Enhanced markings and high visibility labels for ease of troubleshooting and maintenance.
- Enclosed starters provide convenience of a single catalog number.
- Provides the same great features and benefits as our Enclosures, Series 300 Contactors, Series 320 Overload Relays and Series 22mm IEC pilot devices.
- Our compact, Polycarbonate enclosures come with a lift-off cover and are rated Type 1, 4/4X and IP66, making them suitable for the most demanding applications – including wash-downs and corrosive environments.
- Pilot devices installation and a variety of wiring options are available.
- Compact starter size reduces enclosure size resulting in space savings and lower installed costs.
- A wide variety of AC and DC operating coils for control circuit application flexibility. 50A to 80A DC operated devices feature electronic coil control.
- Universal ratings and markings: A, kW, and HP ratings as well as applicable 3rd party certification markings.
- Single phase sensitivity to protect motors against damaging phase loss conditions.
- The cover mounted Reset push button allows the starter to be reset from outside the enclosure.
- Ambient temperature compensation ensures reliable motor protection even in high temperature environments.
- Unobstructed access to the two contactor coil terminals on the line-side of the starter makes control circuit wiring simple.
- Shares common accessories with Series 300 Contactors, see Section 4 Pages 10-12.

UNIQUE PRODUCT FEATURES

MULTI-FUNCTION RELAYS

Multi-function reset button enables the user to select the reset mode, manual or automatic, and whether or not to enable the test function.

When the reset button is pressed and the test function is enabled, the Normally Open (NO) contact closes and the Normally Closed (NC) contact opens to verify the control circuit functionality. In addition, the NC contact can be used in a “Stop” circuit. With the test function disabled, the NO and NC contacts do not change state when the reset button is pressed – preventing unauthorized personnel from operating the control circuit.

Multiple functions allow you to customize the overload relay operation to provide the performance and features you require for your application.

FACTORY ASSEMBLED AND WIRED

Convenient and reliable factory wired starters and pilot devices save time and reduce installation cost.

MOTOR PROTECTION CIRCUIT BREAKERS

c3controls' Series 330 Motor Protection Circuit Breakers provide reliable overload and short circuit protection for all your motor control applications. Our motor protection circuit breakers are ideal for use in multi-motor applications – providing space savings, labor savings, and cost savings. They install on a standard 35mm DIN rail, and they work with a variety of accessories to make wiring as easy as possible.

MOTOR PROTECTION CIRCUIT BREAKERS

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series 330 Motor Protection Circuit Breakers below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 330 Motor Protection Circuit Breakers are UL Listed and CE marked meeting global standards requirements.	
✓ Self-Protected	Our self-protected devices eliminate the need for upstream fuses and circuit breakers, and they provide reliable motor protection.	
✓ Compact	Only 45mm (1-49/64") wide up to 20HP @ 460V (15kW @ 400V) in both thermal and magnetic and magnetic only versions.	
✓ Wide Variety of Accessories	Including standard auxiliary contacts, trip indicating auxiliary contacts, shunt and undervoltage release modules, and many wiring accessories such as commoning links and feeder terminals for easy distribution of power to multiple motor protection circuit breakers.	
✓ Modular Design	Modular design allows Series 330 Motor Protection Circuit Breakers to be easily used with the complete range of Series 300 Contactors and accessories.	
✓ Easy to Install	35mm DIN rail mounting for fast and easy installation and removal, or panel mounting with mounting feet for more secure installation in high shock and vibration applications.	
✓ Visible Markings	High visibility labels and markings; dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.	
✓ Space Savings	Control panel sizes can be reduced because the short circuit protection provided by the Series 330 enables individual motor branch circuit fuses or circuit breakers and overload relays to be eliminated.	
✓ Added Safety	IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

“We began to think we weren’t going to find a vendor who could provide us with Motor Protection Circuit Breakers at a price that made replacing fuses affordable. And then we found c3controls.”

Joe O’Leary, Chief Engineer • **Aztec Machinery Company**

Motor		Part I

Our Series 330 MPCBs are certified as Manual Motor Controllers Suitable as Motor Disconnects, can be used in Group Motor Installations, and can be used to manually control individual motors and protect them against overload and short circuit currents.

SELF-PROTECTED

Listed as a UL 60947-4-1 Type E self-protected combination Manual Motor Controller for circuits capable of delivering up to 50kA @ 460V.

HIGH FAULT SCCR

High fault short circuit current rating of 50kA @ 480V provides safety and reliability in high fault applications.

SEAMLESS COMPATIBILITY

The modular design of our Series 330 MPCB allows for direct mounting onto Series 310 (9A to 40A) AC/DC Contactors and Series 300 and 310 AC/DC Miniature Contactors.

ADJUSTABLE CURRENT SETTING

Full load current adjustment ratio enables overload relay to be set to exact FLA of motor. Provides phase protection for the motor against overload currents.

SNAP-ON ACCESSORIES

Snap-on accessories are easily installed without the use of tools, lowering assembly and installation costs.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Ensures the protection of
equipment and user.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers

MOTOR PROTECTION CIRCUIT BREAKERS

c3controls Series 330-T25S Motor Protection Circuit Breakers include both thermal and magnetic trip elements for overload and short circuit protection. They are ideal for use with Series 300 Contactors in group motor installations where panel space is at a premium and device modularity is required to satisfy virtually any application requirement. For the simplest applications, they can also be used by themselves as manual motor controllers. cULus and CE Markings make them suitable for use anywhere in the world. Small size, IP20 guarded terminals with dual terminal markings, and shared accessories will help reduce your total installed costs and enhance the features and performance of your equipment. Just look and see what the Series 330-T25S and 330-M25S have to offer.

Product features include:

- Series 330 Motor Protection Circuit Breakers direct mount onto:
 - Series 300 Non-Reversing and Series 310 Reversing, 9A to 40A AC and DC, Contactors
 - Series 300-M Miniature Non-Reversing and Series 310-M Miniature Reversing AC and DC Contactors
- Line side terminal barrier accessory snaps-on and installs without the use of tools.
- Removable and replaceable identification marker, standard on all c3controls Series 330 Motor Protection Circuit Breakers, simplifies troubleshooting in panels with many devices.
- High fault short circuit current rating of 50kA @ 480V provides safety and reliability in high fault applications.
- Certified as Manual Motor Controllers Suitable as Motor Disconnects for use in group motor installations in accordance with the NEC (National Electrical Code).
- Two versions available – with thermal and magnetic trip elements which provide overload (Trip Class 10) and short circuit protection, and magnetic trip element only for short circuit protection. Use the magnetic trip element only version with Series 320 Overload Relays for overload protection and the other outstanding features of the Series 320.
- Single phase sensitivity to protect motors against damaging phase loss conditions.
- Designed for optimum performance with Series 300-S09 to 300-S40 Contactors in group motor installations, and can achieve Type 2 coordination in circuits capable of delivering up to 50kA at 460V.
- Meets IEC 60947 requirements for starters and circuit breakers and provides isolation functionality.
- Modular design accommodates a wide variety of accessories, some of which snap-on without tools, lowering assembly and installation costs.
- 18mm wide trip indicating auxiliary contacts can be used to identify the trip cause – overload (1 NO and 1 NC) or short circuit (1 NO and 1 NC), to help determine the type of service/maintenance that may be required.
- Compact size – only 45mm (1-49/64”) wide up to 20HP @ 460V (15kW @ 400V) to minimize the amount of panel area required.
- The “ON/OFF” manual operator enables individual motor circuits to be easily isolated without having to disconnect all of the circuits in a control panel.
- Operators can be padlocked in the “OFF” position (max. one 4.9mm [3/16”] padlock) preventing the motor protection circuit breaker from being turned “ON” when the equipment is being serviced.
- Visible trip indication for fast identification of which device tripped in a control panel where multiple motor protection circuit breakers are installed.
- IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
- Combination head terminal screws allow the use of “straight”, “phillips”, or “posidrive” screwdrivers for fast and reliable wiring.
- Universal ratings and markings: A, kW, and HP ratings as well as applicable 3rd party certification markings.
- Test function to verify the performance of the device and the proper operation of the control circuit and accessories.

MOTOR PROTECTION CIRCUIT BREAKERS

While our Series 330 Motor Protection Circuit Breakers are certified as Manual Motor Controllers Suitable as Motor Disconnects, and can be used to manually control individual motors and protect them against overload and short circuit currents, the greatest benefits can be realized by using the Series 330 Motor Protection Circuit Breakers in conjunction with Series 300 Contactors and Series 330 wiring accessories in Group Motor Installations.

UNIQUE PRODUCT FEATURES

SPACE SAVINGS

Control panel sizes can be reduced because the short circuit protection provided by the Series 330 Motor Protection Circuit Breaker enables individual motor branch circuit fuses or circuit breakers and overload relays to be eliminated.

LABOR SAVINGS

Starter assembly and installation of the starter assemblies in Group Motor Installations is easier and faster with the use of connection modules between the contactor and motor protection circuit breaker and commoning links to conveniently distribute power to multiple starter assemblies. In addition to labor savings, the components look nice too, and provide IP20 protection to guard against accidental contact with live parts.

COST SAVINGS

Smaller size enclosures, reduced wiring, and DIN rail installation all combine to provide a lower cost control panel with superior performance in normal operating conditions as well as in overload or short circuit conditions.

DISCOVER TYPE E

Listed as a UL 60947-4-1 Self-protected Combination Manual Motor Controller when accessories trip indicating auxiliary contact (330-STA22S25) and line side terminal barrier (330-LSTBS25) are assembled for circuits capable of delivering up to 50kA @ 460V. For field assembly only.

Type E devices provide motor disconnect means, branch short circuit and ground fault protection, motor control and motor overload protection, reducing panel size and eliminating upstream fuses or circuit breakers for a motor circuit.

We also offer fully assembled Type E and Type F Direct-On-Line (DOL) Starters, refer to Section 11 Pages 10-17. For Enclosed Type E and Type F assemblies refer to Section 12 Pages 10-17.

V. OPERATING SHAFT LENGTH

CODE	DESCRIPTION	LIST
06	150mm (5-57/64")	\$ 6.30
12	300mm (11-13/16")	\$12.60

UNIQUE PRODUCT FEATURES

NOTE: Motor Protection Circuit Breaker sold separately.

c3controls stylish operating handles are easy to install in standard 4-hole panel drilling layouts [36mm x 36mm (1-7/16" x 1-7/16")]. Operating handles can be installed in enclosures with door thicknesses up to 4mm (5/32"). Rated Type 1, 2, 3, 3R, 4/4X, 12, 13 and IP65 for the most demanding industrial environments.

1. Provide reliable actuation of Series 330 Motor Protection Circuit Breakers and Series 630 Direct-On-Line (DOL) Starters from the outside of the enclosure and can be locked OFF for extra safety. Refer to Section 9 Pages 6 & 7 for our complete selection of Series 330 Motor Protection Circuit Breakers and Section 11 Pages 6 & 7 for Series 630 Direct-On-Line (DOL) Starters.
2. Handles can be padlocked OFF with up to three padlocks.
3. Operating handles with ON/OFF and I/O markings.
4. Door interlock – can only be opened in the OFF position.
5. Positive, reliable actuation of our Series 330 Motor Protection Circuit Breaker is ensured through the rigid steel operating shaft that can be cut to length to fit in enclosures up to 421mm (16-37/64") deep.

MIX AND MATCH ANY COLOR

64mm x 64mm

330-S2PHGRY12	Round	Red/Yellow	\$72.60

FRONT MOUNTED AUXILIARY CONTACTS

Our front mounted auxiliary contacts do not add depth to the motor protection circuit breaker and installs within its foot print – no extra panel area is required. IP20 guarded terminals protect against accidental contact with live parts. These contacts snap-on and install without the use of tools.

CODE	CONTACT CONFIGURATION	LIST
330-FA11S25	1 Normally Open and 1 Normally Closed	\$21.00

MOTOR PROTECTION CIRCUIT BREAKER ENCLOSURES

Our Motor Protection Circuit Breaker Enclosure accessory is a custom fit enclosure design specifically for use with our Series 330 Motor Protection Circuit Breaker providing reliable operation and superior performance. CE certified with an IP55 environmental rating.

Available in two frame sizes: Frame Size 1– 55mm internal mounting width allows the assembly of a side mounted auxiliary contact, and Frame Size 2 – 65mm internal mounting width allows the assembly of a shunt release module or undervoltage module.

The enclosure has integrated ground and neutral connections, and four (4) standard PG16 knock outs (2 on the top and 2 on the bottom).

The operating handle, which is available in two colors, can be padlocked in the “OFF” position with up to three padlocks for extra safety and the security necessary during maintenance activities.

FRAME SIZE 1 (55MM INTERNAL MOUNTING WIDTH)		
CODE	DESCRIPTION	LIST
330-BABS1RY	Motor Protection Circuit Breaker Enclosure with ABS Plastic and Red/Yellow Handle	\$63.00
330-BABS1BG	Motor Protection Circuit Breaker Enclosure with ABS Plastic and Black/Grey Handle	\$63.00
FRAME SIZE 2 (65MM INTERNAL MOUNTING WIDTH)		
330-BABS2RY	Motor Protection Circuit Breaker Enclosure with ABS Plastic and Red/Yellow Handle	\$78.00
330-BABS2BG	Motor Protection Circuit Breaker Enclosure with ABS Plastic and Black/Grey Handle	\$78.00

SIDE MOUNTED AUXILIARY CONTACTS

Our side mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. These contacts snap-on to the left side of the motor protection circuit breaker and install without the use of tools.

CODE	CONTACT CONFIGURATION	LIST
330-SA11S25	1 Normally Open and 1 Normally Closed	\$21.00
330-SA20S25	2 Normally Open	\$21.00

MOUNTING FOOT KIT

The mounting foot kit enables motor protection circuit breakers to be panel mounted instead of installed on a 35mm DIN rail.

CODE	DESCRIPTION	LIST/PC.
330-MF1	Mounting Foot Kit (2 per pkg.)	\$ 1.50

DISCOUNT
SCHEDULE**F**

SHUNT RELEASE MODULES

The shunt release module enables the motor protection circuit breaker to be turned "OFF" from a remote location. Snaps-on and installs on the right side of the motor protection circuit breaker without the use of tools. IP20 guarded terminals to protect against accidental contact with live parts. Wide range of 50/60Hz operating voltages. Can be used in conjunction with front mounted and side mounted auxiliary contacts.

CODE	VOLTAGE RANGE	LIST
330-SR25XC	20 ~ 24V 50/60Hz	\$50.00
330-SR25XJ	40 ~ 48V 50/60Hz	\$50.00
330-SR25XAH	100 ~ 127V 50/60Hz	\$50.00
330-SR25XF	200 ~ 240V 50/60Hz	\$50.00
330-SR25XQ	365 ~ 440V 50/60Hz	\$50.00

TRIP INDICATING AUXILIARY CONTACTS

The trip indicating auxiliary contact module includes Overload Contacts and Short Circuit Contacts. When an overload trip occurs the Overload Contacts change state. When a short circuit trip occurs, the Overload Contacts and Short Circuit Contacts change state. In addition to the electrical contacts, the trip indicating auxiliary contact module includes a mechanical trip indication – the blue button protrudes from the module after a short circuit trip. The trip indicating contact module can be field installed without the use of tools on Series 330-T25S and 330-M25S Motor Protection Circuit Breakers and can be used in conjunction with standard front mounted (330-FA) and side mounted (330-SA) auxiliary contacts. NOTE: The Trip Indicating Auxiliary Contact and the Line Side Terminal Barrier are required to achieve Type E construction with a Series 330-T25S device.

CODE	DESCRIPTION	LIST
330-STA22S25	18mm Wide - Left Side Mounted Trip Indicating Auxiliary Contact (1 NO and 1 NC overload and 1 NO and 1 NC short circuit)	\$57.00

UNDERVOLTAGE RELEASE MODULES

The undervoltage release module automatically trips the motor protection circuit breaker when the supply voltage is less than 70 - 35% of the rated voltage of the undervoltage release module. Undervoltage release modules are ideal to ensure motors do not automatically restart after a power outage when the motor protection circuit breaker is being used by itself as a manual motor controller. Snaps-on and installs on the right side of the motor protection circuit breaker without the use of tools. IP20 guarded terminals to protect against accidental contact with live parts. Wide range of 50/60Hz operating voltages. Can be used in conjunction with front mounted and side mounted auxiliary contacts.

CODE	VOLTAGE RANGE	LIST
330-UR25C	20V 50Hz / 24V 60Hz	\$50.00
330-UR25XC	24V 50/60Hz	\$50.00

330-UR25T	500V 50Hz / 600V 60Hz	\$50.00

LINE SIDE TERMINAL BARRIER

The line side terminal barrier provides increased electrical clearances to comply with the UL 60947-4-1 Self-Protected Combination Motor Controller (Type E) requirements. The terminal barrier can be field installed on Series 330-T25S and 330-M25S Motor Protection Circuit Breakers. NOTE: The Line Side Terminal Barrier and the Trip Indicating Auxiliary Contact are required to achieve Type E construction with a Series 330-T25S device.

CODE	DESCRIPTION	LIST
330-LSTBS25	Line Side Terminal Barrier	\$30.75

COMMONING LINKS

Commoning links provide a convenient means of distributing 3-phase power to a group of motor protection circuits. 45mm spacing commoning links are for use with motor protection circuit breakers without auxiliary contact modules or with a front mounted auxiliary contact module (330-FA11S25). 54mm spacing commoning links are for use with motor protection circuit breakers with a side mounted auxiliary contact module (330-SA11S25 or 330-SA20S25). IP20 construction to guard against accidental contact with live parts. Used in conjunction with 330-FT1S2 Feeder Module.

FEEDER TERMINAL FOR COMMONING LINK TERMINALS

The feeder terminal accepts the main branch circuit conductors and distributes power to the 330-CL Commoning Links. The feeder terminal overlaps the commoning link when installed. IP20 guarded terminals to protect against accidental contact with live parts. Continuous current rating: 63A.

CODE	DESCRIPTION	LIST
330-FT1S2	Feeder Terminal	\$39.00

ADJUSTMENT SCALE COVER

The adjustment scale cover prevents inadvertent or unauthorized adjustment of the full load current dial setting of the motor protection circuit breaker.

CODE	DESCRIPTION	LIST/PC.
330-SCS2	Adjustment Scale Cover (5 per pkg.)	\$ 5.50

SHROUD FOR UNUSED COMMONING LINK TERMINALS

The highly visible yellow terminal shroud with the hazard symbol is for covering unused terminals of the 330-CL commoning links. Use of the shroud insulates the unused terminals and enables the easy installation of additional motor protection circuit breakers in the future.

CODE	DESCRIPTION	LIST
330-CLS2	Shroud	\$11.00

CIRCUIT BREAKER - CONTACTOR LINK MODULE

The circuit breaker - contactor link module provides a mechanical and electrical linkage between a motor protection circuit breaker and a Series 300 Contactor. The circuit breaker - contactor link module makes starter assembly easy and enables the starter assembly to be installed on a single or two 35mm DIN rails.

CODE	FOR USE WITH	LIST
330-CMS216	Series 300-M07 to 300-M16 AC or DC Operated Contactors	\$26.00
330-CMS225A	Series 300-S09 to 300-S25 AC Operated Contactors	\$26.00

① Type 2 Coordination requires that, under short-circuit conditions, the contactor or starter shall cause no danger to persons or installation and shall be suitable for further use. The risk of contact welding is recognized, in which case the manufacturer shall indicate the measures to be taken with regard to the maintenance of the equipment.

② Per the National Electrical Code.

③ Minimum size contactor shown. Type 2 Coordination can also be achieved with a larger size contactor. For example: a 300-S12 instead of a 300-S09, or a 300-S18 instead of a 300-S12.

ENCLOSED MOTOR PROTECTION CIRCUIT BREAKERS

When you need reliable overload and short circuit protection for your motor control application, look to c3controls. Our Series E330 Enclosed Motor Protection Circuit Breakers are ideal for use in multi-motor applications – providing space, labor, and cost savings. The ABS plastic enclosure is rated IP55 and is CE certified, making them suitable for use anywhere in the world.

ENCLOSED MOTOR PROTECTION CIRCUIT BREAKERS

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series E330 Enclosed Motor Protection Circuit Breakers below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 330 Motor Protection Circuit Breakers are UL Listed and CE marked and our enclosures are CE marked meeting global standards requirements.	
✓ Self-Protected	Our self-protected devices eliminate the need for upstream fuses and circuit breakers, and they provide reliable motor protection.	
✓ Ratings	Compact size – Series 330 Motor Protection Circuit Breakers are only 45mm (1-49/64") wide up to 20HP @ 460V (15kW @ 400V).	
✓ Visible Markings	High visibility labels and markings; dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.	
✓ Convenient	Factory assembly of a Series 330-T25S Motor Protection Circuit Breaker and ABS Plastic Enclosure, and configured accessories provide the convenience of a single catalog number simplifying bill of material and ordering.	
✓ Space Savings	Control panel sizes can be reduced because the short circuit protection provided by the Series 330 enables individual motor branch circuit fuses or circuit breakers and overload relays to be eliminated.	
✓ Added Safety	IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.	
✓ Reliability	Series 330 Motor Protection Circuit Breakers provide reliable and accurate Trip Class 10 protection against overload and phase-loss conditions.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

“In an economy where nearly everyone is cutting quality and raising costs, c3controls is still offering an excellent range of products. We’ve never had a quality control issue and anytime we place an order we know it will be on the truck for delivery that afternoon. When there’s a need for a part no one else provides, c3controls always seems to have it, and they make getting it easy.”

Jason Clark, Senior Engineer • **Plant Power & Control Systems**

UNIQUE PRODUCT LINE FEATURES

CUSTOM FIT ENCLOSURE DESIGN

ABS Plastic enclosure designed specifically for the motor protection circuit breaker with integrated ground and neutral connections, and four knock outs.

PADLOCKABLE SWITCHES

Handle can be padlocked in the "OFF" position with up to three padlocks for extra safety during maintenance.

SNAP-ON ACCESSORIES

Snap-on side mounted accessories easily install on Series 330 Motor Protection Circuit Breakers without the use of tools, lowering assembly and installation costs.

REMOVABLE MARKINGS

Removable/replaceable identification marker, standard on all c3controls Series 330 Motor Protection Circuit Breakers, simplifies troubleshooting.

ADDED SAFETY

Our door interlock allows entry into the enclosure only when the switch is in the OFF position, while our pistol operating handles include a concealed "defeater mechanism" that must be operated with a tool and allows entry when the switch is in the ON position.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Ensures the protection of
equipment and user.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, and can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers					
	To Supply	NEC Part	c3controls Product Series		
Motor disconnecting means		Part IX			
Motor branch-circuit, short circuit, and ground-fault protection		Part IV			
Motor circuit conductor		Part II			
Motor controller		Part VII			
Motor control circuits		Part VI			
Motor overload protection		Part III			
Motor		Part I			

Our motor control products align with Article 430 Part VII, Motor Controller, of the NFPA 70, the National Electrical Code.

IT'S EASY TO BUILD YOUR OWN ENCLOSED MOTOR PROTECTION CIRCUIT BREAKER

Simply pick the code number from each of the sections below and combine them to build your part number.

Enclosed Motor Protection Circuit Breakers

E330 - I - II - III E IV - V - VI / VII

Example: To build one of our most popular Enclosed MPCBs, the part number would be **E330 + II + III + E + V + VI + VII** or **E330-T2U10-ABS1ERY-F11**

UNIQUE PRODUCT FEATURES

1. The 330 Motor Protection Circuit Breaker Enclosure Accessory is a custom fit enclosure design specifically for the Motor Protection Circuit Breaker, allowing superior performance.
2. ABS Plastic enclosure has integrated ground and neutral connections, and four (4) standard PG16 knock outs (2 on the top and 2 on the bottom).
3. ABS Plastic enclosure handle can be padlocked in the "OFF" position with up to three padlocks for extra safety and the security needed during maintenance activities.
4. The lift off ABS Plastic enclosure has an IP55 environmental rating and is CE certified. Enclosure is interlocked with device and cannot be removed when in the "ON" position.

FRONT MOUNTED AUXILIARY CONTACTS

Our front mounted auxiliary contacts do not add depth to the motor protection circuit breaker and installs within its foot print – no extra panel area is required. IP20 guarded terminals protect against accidental contact with live parts. These contacts snap-on and install without the use of tools. NOTE: See chart below for maximum number of front mounted auxiliary contacts. See MPCB Section 9 Page 10 for front mounted auxiliary contact part number and ordering information.

MAXIMUM NUMBER OF FRONT OR SIDE MOUNTED AUXILIARY CONTACTS

MOTOR PROTECTION CIRCUIT BREAKER	MAXIMUM NUMBER
330-T25S2, 330-M25S2	8 (one front mounted auxiliary contact module, one side mounted auxiliary contact module, and one side mounted trip indicating auxiliary contact module.)

SHUNT RELEASE MODULES

The shunt release module enables the motor protection circuit breaker to be turned “OFF” from a remote location. Snaps-on and installs on the right side of the motor protection circuit breaker without the use of tools. IP20 guarded terminals protect against accidental contact with live parts. Wide range of 50/60Hz operating voltages. Can be used in conjunction with front mounted and side mounted auxiliary contacts. See MPCB Section 9 Page 11 for shunt release module part number and ordering information.

ADJUSTMENT SCALE COVER

The adjustment scale cover prevents inadvertent or unauthorized adjustment of the full load current dial setting of the motor protection circuit breaker. See MPCB Section 9 Page 12 for adjustment scale cover part number and ordering information.

SIDE MOUNTED AUXILIARY CONTACTS

Our side mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. These contacts snap-on to the left side of the motor protection circuit breaker and install without the use of tools. NOTE: See chart at left for maximum number of side mounted auxiliary contacts. See MPCB Section 9 Page 10 for side mounted auxiliary contact part number and ordering information.

UNDERVOLTAGE RELEASE MODULES

The undervoltage release module automatically trips the motor protection circuit breaker when the supply voltage is less than 70 - 35% of the rated voltage of the undervoltage release module. Undervoltage release modules are ideal to ensure motors do not automatically restart after a power outage when the motor protection circuit breaker is being used by itself as a manual motor controller. Snaps-on and installs on the right side of the motor protection circuit breaker without the use of tools. IP20 guarded terminals to protect against accidental contact with live parts. Wide range of 50/60Hz operating voltages. Can be used in conjunction with front mounted and side mounted auxiliary contacts. See MPCB Section 9 Page 11 for undervoltage release module part number and ordering information.

MOTOR PROTECTION CIRCUIT BREAKER & CONTACTOR ASSEMBLIES

series
630

If you're looking for a line of compact, easy-to-install assembled starters that offer reliable protection for your motors against short circuit, overload, and phase loss conditions, look to c3controls. Our Series 630 assembled starters are ideal for use in multi-motor applications, and feature power and control circuit terminals that are readily accessible for easy wiring. They're perfect for where panel space is a premium and device modularity is a must.

MPCB & CONTACTOR ASSEMBLIES

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge, and we guarantee same-day shipping. Check out all the features of our Series 630 Motor Protection Circuit Breaker and Contactor Assemblies below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series 630 DOL Starters are UL Listed and CE marked, meeting global standards requirements. 
✓ Modular Design	The modular design allows Series 300 and Series 330 to be mixed-and-matched in an assembled starter for any combination of a FLC and desired electrical life.
✓ Circuit Isolation	The "ON/OFF" manual operator enables individual motor circuits to be easily isolated without having to disconnect all of the circuits in a control panel.
✓ Type 2 Coordination	Designed for optimum performance in multi-motor installations, and can achieve Type 2 coordination in circuits capable of delivering up to 50kA at 460V.
✓ Wide Variety of Accessories	Including standard auxiliary contacts, trip indicating auxiliary contacts, shunt and undervoltage release modules, and many wiring accessories such as commoning links and feeder terminals for easy distribution of power to multiple motor protection circuit breakers.
✓ Easy to Install	35mm DIN rail mounting for fast and easy installation and removal, or panel mounting with mounting feet for more secure installation in high shock and vibration applications.
✓ Visible Markings	High visibility labels and markings; dual IEC and NEMA terminal markings for ease of wiring anywhere in the world.
✓ Space Savings	Control panel sizes can be reduced because the short circuit protection provided by the Series 330 enables individual motor branch circuit fuses or circuit breakers and overload relays to be eliminated.
✓ Added Safety	IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“Even though they come from the factory preassembled, c3controls’ Series 630 starters are much more affordable than the individual parts from Allen Bradley.”

Larry Fontaine, EE Design/Purchasing • **Teemark Corp.**

MPCB + Contactor Assembly

Type E MPCB + Contactor Assembly

**UNIQUE PRODUCT LINE FEATURES****CONVENIENCE**

Factory assembly of a Series 330 Motor Protection Circuit Breaker and Series 300 Contactor provides the convenience of a single catalog number and shorter control panel bill of material.

SELF-PROTECTED

Listed as a UL 60947-4-1 Type E self-protected combination Motor Controller for circuits capable of delivering up to 50kA @ 460V.

HIGH FAULT SCCR

High fault short circuit current rating of 50kA @ 480V provides safety and reliability in high fault applications.

INTEGRATED AUXILIARY CONTACTS

Integral right side mounted auxiliary contacts, 3 power poles + 1 auxiliary, are standard on all c3controls 9A to 25A non-reversing contactors.

ADJUSTABLE CURRENT SETTING

Full load current adjustment ratio enables overload relay to be set to exact FLA of motor. Provides phase protection for the motor against overload currents.

SNAP-ON ACCESSORIES

Snap-on accessories are easily installed without the use of tools, lowering assembly and installation costs.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Ensures the protection of
equipment and user.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers					
	To Supply	NEC Part	c3controls Product Series		
Motor disconnecting means		Part IX			
Motor branch-circuit, short circuit, and ground-fault protection		Part IV			
Motor circuit conductor		Part II			
Motor controller		Part VII			
Motor control circuits		Part VI			
Motor overload protection		Part III			
Motor		Part I			

Our motor control products align with Article 430 Part VII, Motor Controller, of the NFPA 70, the National Electrical Code.

IT'S EASY TO BUILD YOUR OWN DIRECT-ON-LINE (DOL) STARTER

Simply pick the code number from each of the sections below and combine them to build your part number.

Direct-On-Line (DOL) Starters

630 - - - / - -

I II III IV V VI VII VIII IX

Example: To build one of our most popular DOL Starters (MPCB + Contactor), the part number would be **630 + II + III + IV + V + VI + VII + VIII + IX** or **630-S09D10-2D63-F11**

DIRECT-ON-LINE (DOL) STARTERS

c3controls Series 630 Direct-On-Line (DOL) Starters are assemblies of a Series 330 Motor Protection Circuit Breaker and a Series 300 Contactor. The motor protection circuit breaker includes both thermal and magnetic trip elements for overload and short circuit protection of the motor, and motor branch circuit components including the conductors. The contactor provides the repeated ON/OFF switching for the motor. These assemblies are ideal for use in multi-motor installations where panel space is at a premium and device modularity is required to satisfy virtually any application requirement. Small size, IP20 guarded terminals with dual terminal markings, and shared accessories will help reduce your total installed costs and enhance the features and performance of your equipment. Just look and see what our Series 630 assembled starters have to offer.

Product features include:

- The Line Side Terminal Barrier accessory snaps on and installs without the use of tools.
- Removable and replaceable identification marker, standard on all c3controls Series 630 DOL Starters, simplifies troubleshooting in panels with many devices.
- Modular design and a wide variety of contactor and motor protection circuit breaker accessories including standard auxiliary contacts, trip indicating auxiliary contacts, shunt release modules and surge suppressors.
- Many wiring accessories such as commoning links and feeder terminals for easy distribution of power to multiple starters.
- Snap-on accessories are easily installed without the use of tools, lowering assembly and installation costs.
- Compact size – only 45mm (1-49/64”) wide up to 20HP @ 460V (15kW @ 400V) to minimize the amount of panel area required.
- The “ON/OFF” manual operator enables individual motor circuits to be easily isolated without having to disconnect all of the circuits in a control panel.
- Operators can be padlocked in the “OFF” position (max. one 4.9mm [3/16”] padlock) preventing the motor protection circuit breaker from being turned “ON” when the equipment is being serviced.
- Visible trip indication for fast identification of which device tripped in a control panel where multiple starters with motor protection circuit breakers are installed.
- Trip indicating auxiliary contacts can be used to identify the trip cause - overload (1 NO and 1 NC) or short circuit (1 NO and 1 NC), to help determine the type of service/maintenance that may be required.
- IP20 guarded terminals with dual terminal markings prevent accidental contact with live parts.
- The contactor and motor protection circuit breaker are assembled with a contactor-circuit breaker link module, enabling the starter to be installed on a single 35mm DIN rail. Installation is fast and the starter can be removed from the DIN rail easily without tools.
- Unobstructed access to the two contactor coil terminals on the load-side of the starter makes control circuit wiring simple.
- Designed for optimum performance in multi-motor installations, and can achieve Type 2 coordination in circuits capable of delivering up to 50kA at 460V.
- All Series 300 Contactor and Series 330 Motor Protection Circuit Breaker features.

UNIQUE PRODUCT FEATURES

SPACE SAVINGS

Control panel sizes can be reduced because the short circuit protection provided by the Series 330 Motor Protection Circuit Breaker enables individual motor branch circuit fuses or circuit breakers and overload relays to be eliminated.

LABOR SAVINGS

Starter assembly and installation of the starter assemblies in Group Motor Installations is easier and faster with the use of connection modules between the contactor and motor protection circuit breaker and commoning links to conveniently distribute power to multiple starter assemblies. In addition to labor savings, the components look nice too, and provide IP20 protection to guard against accidental contact with live parts.

COST SAVINGS

Smaller size enclosures, reduced wiring, and DIN rail installation all combine to provide a lower cost control panel with superior performance in normal operating conditions as well as in overload or short circuit conditions.

TYPE E DIRECT-ON-LINE (DOL) STARTERS

Traditionally, motor short circuit protection has been provided by fuses or molded case circuit breakers that are often cumbersome and costly. Type E has proven to be a simple and cost-effective alternative, providing all the protection required for your motor circuit. As you search for ways to reduce panel size, expense and total cost of installation, Discover Type E and simplify your motor circuit.

Product features include:

- A Type E self-protected combination motor controller integrates protective functions into a single unit suitable for use in circuits delivering up to 50kA at 480V.
- Type E devices provide motor disconnecting means, branch short circuit and ground fault protection, motor control and motor overload protection, reducing size and eliminating upstream fuses or circuit breakers for a motor circuit.
- Modular design and a wide variety of contactor and motor protection circuit breaker accessories including standard auxiliary contacts, trip indicating auxiliary contacts, and line side terminal barriers.
- Snap-on accessories are easily installed without the use of tools, lowering assembly and installation costs.
- Trip indicating auxiliary contacts can be used to identify the trip cause – overload (1 NO and 1 NC) or short circuit (1 NO and 1 NC), to help determine the type of service/maintenance that may be required.
- Trip Class 10 overload protection.
- All Series 300 Contactor, Series 330 Motor Protection Circuit Breaker, and standard Series 630 DOL Starter features.

UNIQUE PRODUCT FEATURES

The trip indicating auxiliary contact accessory distinguishes between overload and short circuit fault conditions. This enhances functionality, minimizes downtime and reduces cost after a fault because the fault can be easily identified.

Trip indicating auxiliary and line side terminal barrier accessories are required to construct a UL 60947-4-1 combination motor controller.

SELECTING THE COMPONENTS NEEDED TO CONFIGURE A TYPE E OR TYPE F COMBINATION MOTOR CONTROLLER

c3controls makes it easy to identify and select the components needed to configure our Series 630 Direct-On-Line (DOL) Starters listed as a UL 60947-4-1 self-protected combination motor controller.

The Type E and Type F parts configurator charts on pages 10-17 of this catalog are broken down by motor voltage, therefore you will need to know your Motor Voltage and Motor Size prior to configuring a Type E or Type F Direct-On-Line (DOL) Starter.

1. Select your appropriate Motor Voltage: 200V, 240V, 480Y/277V or 600Y/347V. Motor Voltages are located at the top of pages 10-17 for easy reference.
2. Follow the step-by-step parts configurator by simply choosing a code from each of the sections and create the exact product match for your needs. If a code is pre-filled, that means there is no option for that part, but you MUST include that code in your part builder number. Don't forget to include hyphens and slashes where indicated.
3. The motor protection circuit breaker options are broken down by type of contactor and motor size. Select the appropriate motor protection circuit breaker by choosing from the options listed below the Motor Size.
4. Type E self-protected combination motor controllers as fully assembled Direct-On-Line (DOL) Starters are available in up to 10A relay ranges. Type F combination motor controllers as fully assembled Direct-On-Line (DOL) Starters are available in up to 32A.

Our complete line of Type E and Type F Direct-On-Line (DOL) Starters can be found on our website at www.c3controls.com, and have the same easy step-by-step configurator to help you create the exact product match for your needs.

IT'S EASY TO BUILD YOUR OWN TYPE E DIRECT-ON-LINE (DOL) STARTER

Simply pick the code number from each of the sections below and combine them to build your part number.

Type E Direct-On-Line (DOL) Starters (FOR MOTOR VOLTAGE 200V)

630 - **II** **III** **IV** - **V** - **VI** / **VII** - **T22** - **L**
I II III IV V VI VII VIII IX

Example: To build one of our most popular Type E DOL Starters (MPCB + Contactor), the part number would be **630 + II + III + IV + V + VI + VII + T22 + L** or **630-S09D10-2D63-F11-T22-L**

ACCESSORIES FOR SERIES 300 CONTACTORS

Modular contactor accessories can be installed in the field on all starters. Front and side mounted auxiliary contacts are common to all starter sizes. Surge suppressors install easily and securely to the contactor coil terminals.

FRONT MOUNTED AUXILIARY CONTACTS

Our front mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. The device identification marker simplifies trouble shooting in panels with many contactors. These contacts snap-on and install without the use of tools. NOTE: See chart below for maximum number of front mounted auxiliary contacts. See Contactor Section 4 Page 10 for front mounted auxiliary contact part number and ordering information.

MAXIMUM NUMBER OF FRONT OR SIDE MOUNTED AUXILIARY CONTACTS

CONTACTOR	MAXIMUM NUMBER
S09, S12, S18, S25	4
S32, S40	6

SURGE SUPPRESSORS

Coil mounted surge suppressors protect sensitive electronic components in control circuits from damaging line voltage spikes. See Contactor Section 4 Page 11 for surge suppressor part number and ordering information.

DISCOUNT
SCHEDULE **F**

SIDE MOUNTED AUXILIARY CONTACTS

Side mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. NOTE: See chart at left for maximum number of side mounted auxiliary contacts. See Contactor Section 4 Page 10 for side mounted auxiliary contact part number and ordering information.

OPERATING COILS

Replacement coils for use with S09 - S40 Contactors. See Contactor Section 4 Page 12 for operating coil part number and ordering information.

ACCESSORIES FOR SERIES 330 MOTOR PROTECTION CIRCUIT BREAKERS

TRIP INDICATING AUXILIARY CONTACTS

The trip indicating auxiliary contact module includes Overload Contacts and Short Circuit Contacts.

When an overload trip occurs the Overload Contacts change state. When a short circuit trip occurs, the Overload Contacts and Short Circuit Contacts change state. In addition to the electrical contacts, the trip indicating auxiliary contact module includes a mechanical trip indication - the blue button protrudes from the module after a short circuit trip. The trip indicating contact module can be field installed without the use of tools on Series 330-T25S and 330-M25S Motor Protection Circuit Breakers and can be used in conjunction with standard front mounted (330-FA) and side mounted (330-SA) auxiliary contacts. NOTE: The Trip Indicating Auxiliary Contact and the Line Side Terminal Barrier are required to achieve Type E construction with a Series 330-T25S device. See MPCB Section 9 Page 11 for trip indicating auxiliary contact part number and ordering information.

LINE SIDE TERMINAL BARRIER

The line side terminal barrier provides increased electrical clearances to comply with the UL 60947-4-1 Self-protected Combination Motor Controller (Type E) requirements. The terminal barrier can be field installed on Series 330-T25S and 330-M25S Motor Protection Circuit Breakers. NOTE: The Line Side Terminal Barrier and the Trip Indicating Auxiliary Contact are required to achieve Type E construction with a Series 330-T25S device. See MPCB Section 9 Page 11 for line side terminal barrier part number and ordering information.

DISCOUNT
SCHEDULE **F**

ACCESSORIES FOR SERIES 330 MOTOR PROTECTION CIRCUIT BREAKERS

FRONT MOUNTED AUXILIARY CONTACTS

Our front mounted auxiliary contacts do not add depth to the motor protection circuit breaker and installs within its foot print – no extra panel area is required. IP20 guarded terminals protect against accidental contact with live parts. These contacts snap-on and install without the use of tools. See MPCB Section 9 Page 10 for front mounted auxiliary contact part number and ordering information.

SHUNT RELEASE MODULES

The shunt release module enables the motor protection circuit breaker to be turned “OFF” from a remote location. Snaps on and installs on the right side of the motor protection circuit breaker without the use of tools. IP20 guarded terminals to protect against accidental contact with live parts. Wide range of 50/60Hz operating voltages. Can be used in conjunction with front mounted and side mounted auxiliary contacts. See MPCB Section 9 Page 11 for shunt release module part number and ordering information.

COMMONING LINKS

Commoning links provide a convenient means of distributing 3-phase power to a group of motor protection circuits. 45mm spacing commoning links are for use with motor protection circuit breakers without auxiliary contact modules or with a front mounted auxiliary contact module (330-FA). 54mm spacing commoning links are for use with motor protection circuit breakers with a side mounted auxiliary contact module (330-SA). IP20 construction to guard against accidental contact with live parts. Used in conjunction with 330-FT1S2 Feeder Module. See MPCB Section 9 Page 12 for commoning link part number and ordering information.

EXTERNAL OPERATING HANDLE

Our external operating handle provides reliable actuation of Series 630 Direct-On-Line (DOL) Starters from the outside of the enclosure and can be locked “OFF” for extra safety. Operating handles can be installed in enclosures with door thicknesses up to 4mm (5/32”). IP65 Ingress protection rating for the most demanding industrial environments. See MPCB Section 9 Page 10 for external operating handle part number and ordering information.

SIDE MOUNTED AUXILIARY CONTACTS

Our side mounted auxiliary contacts feature IP20 guarded terminals to protect against accidental contact with live parts. These contacts snap-on to the left side of the motor protection circuit breaker and install without the use of tools. See MPCB Section 9 Page 10 for side mounted auxiliary contact part number and ordering information.

ADJUSTMENT SCALE COVER

The adjustment scale cover prevents inadvertent or unauthorized adjustment of the full load current dial setting of the motor protection circuit breaker. See MPCB Section 9 Page 12 for adjustment scale cover part number and ordering information.

SHROUD FOR UNUSED COMMONING LINK TERMINALS

The highly visible yellow terminal shroud with the hazard symbol is for covering unused terminals of the 330-CL commoning links. Use of the shroud insulates the unused terminals and enables the easy installation of additional motor protection circuit breakers in the future. See MPCB Section 9 Page 12 for shroud part number and ordering information.

FEEDER TERMINAL FOR COMMONING LINK TERMINALS

The feeder terminal accepts the main branch circuit conductors and distributes power to the 330-CL Commoning Links. The feeder terminal overlaps the commoning link when installed. IP20 guarded terminals protect against accidental contact with live parts. Continuous current rating: 63A. See MPCB Section 9 Page 12 for feeder terminal part number and ordering information.

ENCLOSED MOTOR PROTECTION CIRCUIT BREAKER & CONTACTOR ASSEMBLIES

c3controls' Series E630 Enclosed Direct-On-Line (DOL) Starters come with all the features and benefits of our Series 330 Motor Protection Circuit Breaker, Series 300 Contactor, and 22mm IEC pilot devices with the added protection of our Polycarbonate enclosures rated Type 4X and IP65. Our compact components and enclosures save space in your control panel, and come pre-assembled and wired to reduce your installation time and costs.

c3controls' Series E630 is also available in Type E.

ENCLOSED MPCB & CONTACTOR ASSEMBLIES

c3controls offers a comprehensive line of Motor Control products designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge. Check out all the features of our Series E630 Enclosed Motor Protection Circuit Breaker and Contactor Assemblies below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series E630 Enclosed DOL Starters are UL Listed and CE marked meeting global standards requirements.	
✓ Compact	Reduced panel area for lower installed costs—Three (3) contactor frame sizes directly interchangeable with other manufacturers.	
✓ Simple Customization	Our Series E630 Enclosed DOL Starters are available with various pilot device and wiring options for appropriate operator interface.	
✓ Polycarbonate Enclosures	Available in two sizes, our polycarbonate enclosures come with a lift-off cover, and are rated Type 1, 4, 4X, and IP66 for the most demanding applications—including wash-downs and corrosive environments.	
✓ Reliable	Contactor provides repeated ON/OFF switching for the motor, and the motor protection circuit breaker includes both a Class 10 thermal and magnetic trip elements for overload and short circuit protection of the motor and motor branch circuit conductors.	
✓ Environmentally Secure	With 4/4X and IP65, our Series E630 line is built to last and withstand dust, corrosion, ice and rain.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Quick Shipment	We assemble, test and ship within 3 days, including legend plates—and confirm every order ensuring accuracy.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

“c3controls’ products uphold our commitment to provide quality solutions to our customers while keeping our costs under control.”

(378mm x 188mm x 181mm)**UNIQUE PRODUCT LINE FEATURES****FACTORY ASSEMBLED AND WIRED**

Factory assembled and wired starters and pilot devices provide the convenience of a single catalog number and shorter control panel bill of material.

SELF-PROTECTED

Listed as a UL 60947-4-1 Type E Self-protected Combination Motor Controller for circuits capable of delivering up to 50kA @ 480V.

HIGH FAULT SCCR

High fault short circuit current rating of 50kA @ 480V provides safety and reliability in high fault applications.

MULTI-FUNCTION DEVICE**ARTICLE 430 PART VII - NFPA 70**

	To Supply	NEC Part
Motor disconnecting means		Part IX
Motor branch-circuit, short circuit, and ground-fault protection		Part IV
Motor circuit conductor		Part II
Motor controller		Part VII
Motor control circuits		Part VI
Motor overload protection		Part III
Motor		Part I

Our Series 330 MPCBs are certified as Manual Motor Controllers Suitable as Motor Disconnects, can be used in Group Motor Installations, and can be used to manually control individual motors and protect them against overload and short circuit currents.

ADJUSTABLE CURRENT SETTING

Full load current adjustment ratio enables overload relay to be set to exact FLA of motor. Provides phase protection for the motor against overload currents.

Motor Control Device Solutions

c3controls motor control devices are the perfect solution for manufacturers who want proper motor control and superior motor protection without having to overpay or compromise on quality. In fact, we engineer so much performance and flexibility into our products, we can deliver a remarkably better value than our competitors.

c3controls
products deliver
like no other.

Seamless Compatibility

Contactors, overload relays and motor protection circuit breakers are designed by c3controls to work together, with common connections and accessories, resulting in a high functioning compact starter.

LEADING THE INDUSTRY
with our compact miniature 10HP
contactors and control relays.
One frame size (AC or DC)—28%
reduction in panel area.

Compact

The small size of c3controls motor control devices, plus features like common accessories, enable assembly into smaller control panels for lower installed costs.

Reliable Protection

Contactors provide the repeated on/off switching for the motor and are designed for motor, actuator, solenoid, and other power switching applications. Overload relays provide Trip Class 10 protection against overload and phase-loss conditions, and have ambient temperature compensation for motor protection in high temperature environments.

Ensures the protection of
equipment and user.

Motor protection circuit breakers provide overload, phase-loss and short circuit protection, can be used by themselves as manual motor controllers or with contactors in group motor installations, and can achieve Type 2 coordination for optimum performance.

Type E self-protected combination manual motor controllers provide disconnecting means, branch circuit protection, motor control and motor overload protection all in a single device.

Proven

Our motor control devices are UL Listed and CE marked, meeting global standards requirements for use anywhere in the world.

NFPA 70 - National Electrical Code (NEC)

Understanding what functions are needed in your motor control circuit is critical when selecting motor control devices. Engineers benefit from the standards and codes established to ensure safety and protection to personnel and equipment.

More than just knowing the standards, c3controls, as a manufacturer of motor control products, has the application expertise you need to select the right products.

c3controls & Article 430 - Motors, Motor Circuits and Controllers					
	To Supply	NEC Part	c3controls Product Series		
Motor disconnecting means		Part IX			
			330	630	Type E: 330 630
Motor branch-circuit, short circuit, and ground-fault protection		Part IV			
					Type E: 330 630

SERIES E630 AND SERIES E630 TYPE E ENCLOSED DIRECT-ON-LINE (DOL) STARTERS

c3controls Series E630 Enclosed Direct-On-Line (DOL) Starters are assemblies of a Polycarbonate Enclosure, Series 330 Motor Protection Circuit Breaker, Series 300 Contactor and Series 22mm IEC pilot devices. Our pilot devices and enclosures are rated for Type 4X and IP65. The motor protection circuit breaker includes both a class 10 thermal and magnetic trip elements for overload and short circuit protection of the motor and motor branch circuit components including the conductors. The contactor provides the repeated On/Off switching for the motor. A variety of pilot devices are available, including non-illuminated momentary push buttons, non-illuminated momentary dual push buttons (flush green and extended red), maintained selector switches (2 and 3 position), auxiliary contacts (NO and NC) and pilot lights (red, green and amber) for operation and indication. These assemblies are designed for controlling and protecting single and three phase motors. To save time and reduce installation cost, c3controls Series E630 and Type E are factory assembled and wired. We also offer the option of no pre-wiring.

Product features include:

- Enclosed starters provide the convenience of a single catalog number.
- Our compact, polycarbonate enclosures come with a lift-off cover and are rated Type 1, 4/4X and IP66, making them suitable for the most demanding applications – including wash-downs and corrosive environments.
- Pilot devices installed and a variety of wiring options are available.
- Red/Yellow or Black/Grey Operating Handles that can be padlocked in the “OFF” position with up to three padlocks for extra safety and the security needed during maintenance activities.
- Universal ratings and markings: A, kW, and HP ratings as well as applicable 3rd party certification markings.
- Unobstructed access to the two contactor coil terminals on the load-side of the starter makes control circuit wiring simple.
- Provides the same great features and benefits as our Enclosures, Series 330 Motor Protection Circuit Breakers, Series 300 Contactors and Series 22mm IEC pilot devices.
- Compact starter size reduces enclosure size resulting in space savings and lower installed costs.
- Single phase sensitivity to protect motors against damaging phase loss conditions.
- Series E630 provides Type 2 coordination in circuits capable of delivering up to 50kA at 460V.
- Trip indicating auxiliary contact can be used to identify the trip cause, either overload (1 NO and 1 NC) or short circuit (1 NO and 1 NC) – helping you determine the type of service/maintenance that may be required.
- Available as Enclosed Type E Starter.

UNIQUE PRODUCT FEATURES

SPACE SAVINGS

Overall space requirement can be reduced because the short circuit protection provided by the Series 330 enables individual motor branch circuit fuses or circuit breakers and overload relays to be eliminated.

LABOR SAVINGS

Enclosed starters are factory assembled and wired, reducing installation time.

COST SAVINGS

Smaller size enclosures, reduced wiring, and factory wired pilot devices all combine to provide a lower cost enclosed starter with superior performance in normal operating conditions as well as in overload or short circuit conditions.

DISCOVER TYPE E

UL 60947-4-1 Self-protected combination motor controller integrates protective functions into a single unit suitable for use in circuits delivering up to 50kA at 480V.

Type E devices provide motor disconnecting means, branch short circuit and ground fault protection, motor control and motor overload protection, reducing size and eliminating upstream fuses or circuit breakers for a motor circuit.

SERIES E630 TYPE E ENCLOSED DIRECT-ON-LINE (DOL) STARTERS

TYPE E FEATURES

The trip indicating auxiliary contact accessory distinguishes between overload and short circuit fault conditions. This enhances functionality, minimizes downtime and reduces cost after a fault because the fault can be easily identified.

Trip indicating auxiliary contact and line side terminal barrier accessories are required to construct a UL 60947-4-1 combination motor controller.

SELECTING THE COMPONENTS NEEDED TO CONFIGURE A TYPE E OR TYPE F COMBINATION MOTOR CONTROLLER

c3controls makes it easy to identify and select the components needed to configure our Series E630 Enclosed Direct-On-Line (DOL) Starters as a listed UL 60947-4-1 combination motor controller.

The Type E and Type F configurator charts on pages 10-17 of this catalog are broken down by motor voltage, therefore you will need to know your Motor Voltage and Motor Size prior to configuring a Series E630 Type E or Type F Enclosed Direct-On-Line (DOL) Starter.

1. Select your appropriate Motor Voltage: 200V, 240V, 480Y/277V or 600Y/347V. Motor Voltages are located at the top of pages 10-17 for easy reference.
2. Follow the step-by-step configurator by simply choosing a code from each of the sections and create the exact product match for your needs. If a code is pre-filled, that means there is no option for that part, but you MUST include that code in your part builder number. Don't forget to include hyphens where indicated.
3. The motor protection circuit breaker options are broken down by type of contactor and motor size. Select the appropriate motor protection circuit breaker by choosing from the options listed below the Motor Size.
4. Type E self-protected combination motor controllers as fully assembled Direct-On-Line (DOL) Starters are available in up to 10A relay ranges. Type F combination motor controllers as fully assembled Direct-On-Line (DOL) Starters are available in up to 32A.

Our complete line of Series 630 Type E and Type F and Series E630 Type E and Type F Enclosed Direct-On-Line (DOL) Starters can be found on our website at www.c3controls.com, and have the same easy step-by-step configurator to help you create the exact product match for your needs.

IT'S EASY TO BUILD YOUR OWN ENCLOSED DOL STARTER

Simply pick the code number from each of the sections below and combine them to build your part number.

ENCLOSED UL508A COMBINATION MOTOR STARTERS

All our products are fully certified, rated, and backed by our limited lifetime warranty to meet the needs of the machine builder, and our Enclosed Combination Motor Starters are no exception. Check out the incredible features in the chart below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series ECP-300 Enclosed UL508A Combination Motor Starters are UL508A Listed and CE marked meeting global standards requirements.	
✓ Enclosure Flexibility	Our ECP-300 Enclosed UL508A Motor Starters are available in Polycarbonate (Type 4X) and two versions of Carbon Steel (Type 1 or Type 3R, 4).	
✓ Reliable	Contactor provides repeated ON/OFF switching for the motor, and the motor protection circuit breaker includes both a Class 10 thermal and magnetic trip elements for overload and short circuit protection of the motor and motor branch circuit conductors.	
✓ Enhanced Integration	Our ECP-300 Enclosed UL508A Motor Starters are pre-wired to accept inputs from your BAS, PLC, relay or other dry contact for control in Auto mode.	
✓ Simple Solution	c3controls' Electrical Engineers have designed enclosed combination motor starters specifically for any electric impeller, fan, pump, conveyor, or air handling motor applications.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Quick Shipment	We assemble, test and ship within 5 days,—and confirm every order ensuring accuracy.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

Polycarbonate Enclosure

Carbon Steel Enclosure

UNIQUE PRODUCT LINE FEATURES

FACTORY ASSEMBLED AND WIRED

Factory assembled and wired starters and pilot devices provide the convenience of a single catalog number and shorter control panel bill of material.

SELF-PROTECTED

Listed as a UL 60947-4-1A Type E Self-Protected Combination Manual Motor Controller for circuits capable of delivering up to 10kA @ 600V.

HIGH FAULT SCCR

High fault short circuit current rating of 50kA @ 480V provides safety and reliability in high fault applications.

PRE-WIRED CONTROL CIRCUIT

Pre-wired for quick and easy field installation, including color-coded and marked terminal blocks, control transformer, and controls circuit protection for simplicity of control circuit voltage, 24VAC or 120VAC options available.

ADJUSTABLE CURRENT SETTING

Full load current adjustment ratio enables overload relay to be set to exact FLA of motor. Provides phase protection for the motor against overload currents.

INTEGRATION READY

The integration ready Hand-Off-Auto control circuit is pre-wired to accept Auto Run, On / Off commands from your BAS, PLC, relay or other dry contact for remote control in Auto mode.

ENCLOSED UL508A E630 COMBINATION MOTOR STARTERS

c3controls Series ECP-300 Enclosed UL508A Combination Motor Starters are assembled from our Series 330 Motor Protection Circuit Breaker, Series 300 Contactor, Series 1100 489 Branch Circuit Breaker, and 22mm IEC pilot devices, all within the protection of a durable Polycarbonate or Carbon Steel enclosure. Our Series ECP-300 combination motor starters are factory wired with a control transformer saving you time and reducing installation costs.

Product features include:

- Enclosed combination motor starters offer the convenience of a single catalog number.
- Provides the same great features and benefits as our Enclosures, Series 330 Motor Protection Circuit Breakers, Series 300 Contactors, Series 1100 UL 489 Branch Circuit Breakers, and Series 22mm IEC Pilot Devices.
- Polycarbonate enclosure comes with a lift-off cover and is rated Type 4X.
- Carbon Steel enclosure comes in two versions; Type 1 or Type 3R, 4.
- Integration ready control circuit comes equipped with a Hand-Off-Auto selector switch and pre-wired connection points to accept Auto Run, On / Off commands from your BAS, PLC, relay or other dry contact for remote operation in Auto mode.
- Red/Yellow operating handle can be padlocked in the OFF position with up to three padlocks for extra safety and security needed during maintenance activities.
- Unobstructed access to the two contactor coil terminals on the load-side of the starter makes control circuit wiring simple.
- Compact starter size reduces enclosure size resulting in space savings and lower installed costs.
- Single phase sensitivity to protect motors against damaging phase loss conditions.
- Universal ratings and markings: A, kW, and HP ratings as well as applicable 3rd party certifications.

CONTROL CIRCUIT TRANSFORMERS

Discover c3controls' exceptional line of Control Circuit Transformers, meticulously engineered to meet the needs of residential and commercial HVAC/Building Management Systems (BMS), as well as a wide array of industrial applications. Our innovative design approach not only ensures top-tier performance but also introduces these products at unprecedented, budget-friendly prices. Dive into the rich tapestry of features that this product line unfolds, and experience excellence like never before.

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series CCT Control Circuit Transformers are UL Listed and CE marked to meet global standards requirements and are compliant to the RoHS directives. 
✓ Environmentally Secure	Designed and tested for ensuring operation in extreme temperatures, to keep your application running.
✓ Easy to Install	Panel-mountable with four screws, one in each corner, for fast and simple installation as well as reliability in vibrating environments.
✓ Added Safety	The transformer windings are enclosed, providing much needed safety for a critical application.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the device for easy reference during installation.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

UNIQUE PRODUCT LINE FEATURES

OVERCURRENT PROTECTION

All our Class 2 devices come with an overcurrent protection option, either inherent or non-inherent, eliminating the need for additional protection in a panel.

CLASS 2 DESIGN

Transformers up to 100VA are Class 2 certified making them the safest device in your control application.

CONNECT TO ANYTHING

Primary and secondary wires are 10-inches long, making them easy to connect to a nearby load.

COLOR-CODED WIRES

Secondary as well as different taps on primary are uniquely color-coded to facilitate error-proof installation.

VERSATILE

Options are available to offer multiple voltages: 120V to 480V on primary side in a single device, making it usable in a variety of applications and saving on your inventory.

CONTROL CIRCUIT TRANSFORMERS

c3controls offers a comprehensive range of Control Circuit Transformers (CCT) designed with precise attention to detail, to cater to a wide array of applications. Whether it's residential and commercial HVAC systems, Building Management Systems (BMS), or the intricate demands of complex industrial environments, we offer a variety of options spanning from 20 to 300VA, featuring a 10-inch-long wire for seamless connectivity, having them color-coded for easy identification. These devices offer flexible primary voltage options ranging from 120 to 480V, with 24V secondary. Additionally, devices up to 100VA are Class 2, equipped with built-in overcurrent protection

Product features include:

- Engineered for high efficiency, minimizing energy loss during conversion & isolation.
- Built with high-quality materials to withstand harsh environmental conditions & rigorously tested to meet the highest UL safety standards, ensuring industry-leading safety for your peace of mind.
- Equipped with an integrated grounding system for an additional layer of safety.
- Select models feature manual resettable circuit breakers, offering both protection and reliability. This feature enhances reusability, a capability not found in transformers with fuse or no protection.
- Designed with a space-saving footprint, allowing for installation in constrained environments.
- Designed with lead wires emanating from a single hub, allowing for easy connection to conduit for a secure and stable setup.
- Versatile for Class 2, Class 3, and general-purpose applications, with the added ability to accommodate a wide range of North American European voltages/frequencies. This universality makes them an adaptable energy source for various settings.

CONTROL POWER TRANSFORMERS

c3controls' Series CPT Control Power Transformers are open-type control transformers ranging from 50 to 5000VA with reliable output voltage stability and designed for lower inrush applications (Lighting, Motor Control, Circuit Isolation, etc). These transformers are commonly preferred solutions to power control circuits including: PLCs, protective relays, meters, control panels, and other auxiliary devices. Additionally, they are widely used in electrical substations, data centers, and other power systems.

PROVEN

Conformity to Standards:

UL 5085-2
CSA C22.2 No. 66.2
IEC 61558

Certifications:

UL File #: E541700

CE Marked (per EU Low Voltage Directive
2014/35/EC and RoHS Directive 2015/863/EU)

CONTROL POWER TRANSFORMERS

At c3controls, we offer a comprehensive line of Control Power Transformers, part of our extensive portfolio designed to meet the specific needs of machine and panel builders. Our products are engineered for reliability and performance, ensuring durability in demanding applications while remaining cost-effective. With a focus on providing robust solutions, our transformers are built to last and are available at competitive price points. Explore the full range of features and benefits of our Series CPT to see how our transformers can elevate your project with both quality and value.

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Control Power Transformers are certified to UL Standards and CE marked for global versatility.	The UL logo (a circle with 'UL' inside) and the CE mark.
✓ Easy to Install	Panel-mountable with four screws, one in each corner, for fast and simple installation as well as reliability in vibrating environments.	
✓ Simple Wiring	Integrated molded terminal blocks, equipped with IP20 protection, facilitate simplified wiring and safeguard against accidental contact with the power source.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship the same day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

CPT1-3000-RD-FD

UNIQUE PRODUCT LINE FEATURES

WIDE RANGE OF VA RATINGS

Available in multiple VA ratings from 50VA to 5000VA.

EASE OF WIRING

Integrated terminal blocks and a finger-safe terminal guard, with IP20 protection on primary as well as secondary sides.

CLEAR TERMINAL IDENTIFICATION

Improved terminal identification through clear labeling helps save time.

CLASS H

Each transformer variant features a Class H insulation system, ensuring the highest level of safety for your control application.

DUAL FREQUENCY RATING

With a versatile dual frequency rating of 50/60Hz, these products are well-suited for global applications.

FUSE MOUNTING ACCESSORY

An optional fuse block adapter kit can be added to a variant up to 3000VA (or a variant having current up to 30A) for overcurrent protection, applicable for both primary and secondary sides of the transformer.

CONTROL POWER TRANSFORMERS

c3controls offers a comprehensive range of Control Power Transformers (CPT) designed with precise attention to detail, catering to a wide array of applications. Whether it's Control Panels, Motor Control Centers, HVAC Systems, or the complex demands of industrial environments, these transformers offer versatile solutions with a wide range of options from 50 to 5000 VA with six distinct voltage variants. Our CPTs feature integrated terminal blocks for convenient and flexible connections.

Product features include:

- Transformer windings are subjected to a vacuum pressure impregnation (VPI) using insulating varnish to enhance dielectric strength and thermal performance.
- High-quality silicon steel laminations are used to reduce core losses and enhance performance.
- The integrated terminal block, equipped with a finger guard, enhances safety and reliability.
- Designed to optimize efficiency, reducing energy waste during conversion and isolation.
- Designed with high-quality materials to resist adverse environmental factors and rigorously evaluated to adhere to stringent UL safety standards, providing industry-leading safety for your peace of mind.
- The unrestricted airflow facilitated by the open design enables rapid cooling.
- Capable of handling dynamic loads effectively, suitable for industrial applications with fluctuating power demands.
- Ability to provide multiple voltage outputs from a single unit.

ACCESSORIES

Fuse Block Adapter Plates

The Fuse Block Adapter Plate facilitates the seamless installation of fuse blocks on transformers, ensuring a secure and efficient setup. Engineered for universal compatibility, it supports transformers across a wide range (50 – 3000 VA), providing enhanced flexibility for diverse applications.

Note: The Fuse Block Adapter Plate provides only the mechanical means of attaching a third-party aftermarket fuse block; electrical compatibility and wiring must be ensured separately.

CODE	FOR USE WITH	LIST
CPT1-FBAP1	50VA to 150VA Transformers	\$ 10.60
CPT1-FBAP2	250VA to 3000VA Transformers	\$ 10.60

TRANSFORMERS SELECTION GUIDE

Selection of Proper VA rating of Transformer:

In order to choose the appropriate transformer, you must first identify three characteristics of the load circuit: the total steady-state (sealed) VA, the total inrush VA, and the inrush load power factor.

1. The total steady-state (sealed) VA refers to the volt-amperes that the transformer needs to supply to the load circuit continuously. This represents the amount of current required to maintain the contact within the circuit. (Calculate by adding the total steady-state VA of all devices in your control circuit.)
2. Total inrush VA represents the volt-amperes that the transformer is required to supply when the control circuit is initially powered on. This value is determined by summing the inrush VA of all components that are energized at startup. Additionally, it is important to include the VA of components which do not have inrush VA, such as indicating lights, lamps, timers, etc, since they also impose a load on the transformer during peak inrush.
3. The total inrush VA can be computed using the following formula:

$$\text{Total Inrush VA} = \sqrt{(VA \text{ sealed})^2 + (VA \text{ inrush})^2}$$

4. To determine the appropriate VA rating, consult the Regulation Data Table. If the nominal supply voltage exhibits a fluctuation of no more than 5%, reference the 90% secondary voltage column. For supply voltage variations up to 10%, utilize the 95% secondary voltage column. The 85% secondary voltage column provides minimum values necessary for correct electromagnetic device operation and should be employed solely as a reference.
5. Using the provided regulation data table, select a transformer with a continuous VA rating that meets or exceeds the value calculated in Step 1, and with a maximum inrush VA rating that matches or surpasses the value determined in Step 3.

SERIES CPT VOLTAGE REGULATION TABLE

CONTINUOUS VA TRANSFORMER NAMEPLATE	INRUSH VA @ 40% POWER FACTOR		
	85% SECONDARY VOLTAGE	90% SECONDARY VOLTAGE	95% SECONDARY VOLTAGE
50	177	139	102
100	350	275	203
150	715	554	400
250	1653	1264	895
350	2604	1947	1321
500	4004	3023	2090
750	6933	5088	3352
1000	10087	7340	4764
1500	14178	10232	6508
2000	17604	12669	8080
3000	39213	27539	16780
5000	68344	47498	28803

Note: It is advisable to select a control transformer with a power factor of 40%. Many circuit components, particularly electromagnetic devices, exhibit inherently low power factors approximating this value. By choosing a transformer with a 40% power factor, sufficient capacity is ensured to accommodate the diverse load characteristics within the circuit.

30MM INDUSTRIAL PILOT DEVICES

c3controls' 30mm Industrial Pilot Devices offer superior quality at an affordable price. These modular devices feature a rugged, all-polyester construction, are UL listed and are rated Type 4/4X as standard for watertight and corrosion resistance. c3's pilot devices are also listed for Type 1, 2, 3, 3R, 12 and 13 requirements.

30MM INDUSTRIAL PILOT DEVICES

All our products are fully certified, rated, and backed by our limited lifetime warranty to meet the needs of the machine builder, and our 30mm Industrial Pilot Devices are no exception. Check out the incredible features in the chart below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our 30mm industrial operators are UL Listed, CSA Certified and CE marked meeting global standards requirements.	  
✓ Easy to Install	Our “snap-on” contact blocks are color coded for quick circuit identification and feature 35° angled captive terminal screws and self-lifting pressure plates for fast and easy wiring.	
✓ Simple Customization	Our light modules come with various lens color options for appropriate operator interface and are available in incandescent, neon, or our LED lamps with leakage protection.	
✓ Rugged Design	Optional polyester or polished aluminum clamp rings with coarse 16 pitch threads for quick and easy utilization that won't cross thread or strip.	
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the contact blocks for easy reference during installation.	
✓ Heavy Duty	Polyester construction provides superior durability, corrosion resistance, moisture rejection and electrical insulation.	
✓ Flexible	Our contact blocks can be stacked 4 deep and up to 2 across for a total of 8 circuits, providing the flexibility to operate multiple control circuits from a single operator.	
✓ Convenient	Reduce inventory with our interchangeable modular design, providing endless options for appropriate operator interface.	
✓ Environmentally Secure	With 4/4X and IP65 ratings, our 30mm line of pilot devices are built to last and withstand dust, corrosion, ice, and rain.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

“By utilizing the 30mm Multi-Voltage LED Pilot Lights from c3controls, there is no need for us to specify several devices for one job. With one product, we can meet every one of our needs.”

Scott Grinwis, Inside Sales • **Kent Industries**

Emergency Stop

Pilot Light

Selector Switch

UNIQUE PRODUCT LINE FEATURES

METAL ON THE INSIDE

c3controls 30mm Emergency Stop devices contain a solid brass detent mechanism ensuring reliable operation in emergency stop applications, and providing safe interruption of circuits and longer life.

EXCLUSIVE MULTI-VOLTAGE LIGHTS

c3controls state-of-the-art multi-voltage light modules—the only U.S. engineered multi-voltage light in the industry!—operate at any voltage from 20V to 277V AC or DC without losing intensity.

U-CUP SEAL

Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions and keeps water, oils, and dust away from the contact blocks.

INTERNAL SELF-LUBRICANT

All frictional parts are molded with an internal self-lubricant to provide outstanding wear without troublesome greases used by others.

ONE CAM DESIGN

Our single cam design eliminates the need for multiple cam and selector switch configurations, reducing inventory and saves you labor time and costs.

RUBBER BOOTS

Our state-of-the-art rubber boots are available in both Neoprene and Fluorosilicone, and protect the operators and the circuits behind them from harsh chemicals and climates.

DISCOUNT
SCHEDULE **E**

Our Contact Blocks save you time and money by offering the flexibility to operate multiple control circuits from a single pilot device. Most operators can be stacked 4 deep and up to 2 across, providing a total of 8 circuits per operator in any combination. Compared to others, our quick install snap-on feature makes installing multiple blocks a “snap” — they install in less time than it takes to pick up a screwdriver! And our heavy-duty construction ensures that these contact blocks stay connected.

Tired of wiring contact blocks in cramped spaces?

Our unique 35 degree angled terminals provide ease of wiring for quick installation. In fact, you can wire the contact blocks outside the tight space of the control panel, then simply “snap-on” to the operator. All terminal screws have self-lifting captive wire clamps to speed wiring.

Enhanced safety with field installable IP20 terminal guards

are transparent to maintain terminal visibility. Their construction provides easy access to the device terminals - making wiring fast and convenient, and they snap securely in place without the use of tools. NOTE: IP20 terminal guards must be installed before wiring.

For convenient terminal marking our IP20 terminal guards utilize Series WTB2 markers (see Section 22 Page 32), simplifying wiring and troubleshooting.

30MM STANDARD CONTACT BLOCKS

Our standard contact blocks are stackable 4 deep and up to 2 across on most operators for a total of 8 circuits per operator. They are color coded for instant circuit identification to minimize wiring errors and to expedite the wiring process. You can combine contact block types to achieve your desired function.

Also refer to Section 14 Pages 4 & 5 for our complete selection of Hermetically Sealed and Factory Sealed Contact Blocks in our 30mm H-Line section.

UNIQUE PRODUCT FEATURES

c3CONTROLS MANUFACTURES THE MOST INNOVATIVE, USER-FRIENDLY LINE OF CONTACT BLOCKS ON THE MARKET TODAY!

NOTE: Gold plated contacts are available on standard blocks for dry circuit applications. The cover will be gold (amber) in place of clear.

1. Vibration resistant snap-on assembly simplifies installation.
2. Selflubricating thermoplastic stroker prevents sticking and corrosive build-up that is often associated with other competitor products.
3. 35 degree angle plated steel terminal screws with captive pressure plates facilitate wiring and protect against corrosion.
4. Clear V-0 plastic covers resist combustion and aid in visual confirmation of circuit configuration.
5. Stainless steel spring for protection in corrosive environments.
6. Built-in self-wiping cleaning action and high point contact pressure for low-level switching. Silver contact rivets provide long life in normal control circuits.
7. Color-coded body for quick circuit identification (green = NO, red = NC, white = EM, black = DB).
8. Optional IP20 terminal guards protect against accidental contact with live parts. Can be ordered separately as an accessory or factory assembled providing the convenience of a single catalog number.

MIX AND MATCH ANY COLOR AND MOMENTARY NON-ILLUMINATED PUSH BUTTON CAP

30MM MOMENTARY NON-ILLUMINATED PUSH BUTTONS

c3controls goes the extra step to make sure that our products outlast the competition. Our 30mm Momentary Non-Illuminated Push Buttons are durable and flexible for a variety of uses. All c3controls 30mm operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Polyester or polished aluminum clamp rings with coarse 16 pitch threads.
- Available in both Neoprene and Fluorosilicone, our state-of-the-art rubber boots protect the operators and the circuits behind them from harsh chemicals and climates.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 1-13/64" (30.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

1. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. This U-cup seal also acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X with or without a rubber boot. *In fact, our push button was the first to be rated Type 4X without using a rubber boot!*
2. Our push buttons modular design provides endless options for appropriate operator interface with a variety of interchangeable cap types and colors which ultimately will save you time and money by reducing your inventory.

MIX AND MATCH ANY COLOR AND PUSH-PULL MAINTAINED NON-ILLUMINATED CAP

30MM MAINTAINED NON-ILLUMINATED PUSH BUTTONS

**THE MOST RUGGED EMERGENCY STOP AVAILABLE
IN THE INDUSTRY!**

All c3controls 30mm operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Polyester or polished aluminum clamp rings with coarse 16 pitch threads that easily thread on and won't cross thread or strip.
- All cap types are secured by the clamp ring once installed for tamper protection, unlike snap-on/snap-out caps used by others.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 1-13/64" (30.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

30MM INDUSTRIAL PILOT DEVICES

UNIQUE PRODUCT FEATURES

We Put The Metal On The Inside — Where It Counts!

c3controls Emergency Stops contain a solid brass detent mechanism and are the best-engineered, most reliable heavy-duty emergency stop buttons in the world. This rugged design, which comes standard with a polyester clamp ring or optional aluminum clamp ring, ensures reliable operation in emergency applications, providing safe interruption of circuits, and much longer life when compared to any competitor's product. A stainless steel version is also available for corrosive environments (see Section 14 Pages 8 & 9).

MIX AND MATCH ANY COLOR AND MOMENTARY ILLUMINATED PUSH BUTTON LENS

30MM MOMENTARY ILLUMINATED PUSH BUTTONS

c3controls goes the extra step to make sure that our products outlast the competition. Our 30mm Momentary Illuminated Push Buttons are durable and flexible for a variety of uses. All c3controls 30mm operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Polyester or polished aluminum clamp rings.
- Full voltage lights incorporate a unique insulated socket design to minimize accidental contact during lamp change.
- All lights use miniature bayonet base lamps to provide reliable lamp secureness.
- Available with Incandescent, Neon, or our LED lamps with leakage protection.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 1-13/64" (30.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

1. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. This U-cup seal also acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X standards.
2. All frictional parts are molded with an internal self lubricant to provide outstanding wear without troublesome greases used by others.
3. Our rugged Lexan™ caps can resist high impact for reliable performance in most environments even in high ambient temperatures.

DUAL INPUT REMOTE TEST

Our unique Dual Input Remote light unit can be used as an illuminated push button while also permitting the testing of a number of lights from a single push button. A diode circuit isolates the test supply from the normal supply.

The schematic shown represents a typical dual input application.

RESET PUSH BUTTON

Our unique Reset Push Button mounts in a standard 1-13/64" (30.5mm) hole and accepts either 20 hex head bolts or 20 thread rod to provide adjustable extension and save on all rod cutting and fitting labor.

Universal styles include two bolts to cover 1" to 3" (25.4mm to 76.2mm) space from cover to overload reset rod. It is rated Type 4/4X as standard.

CODE	DESCRIPTION	LIST
RPB	Reset Push Button	\$19.00
RPB-B	RPB with Bolts (1/4-20 x 1-3/4" & 3")	\$22.00
RPB-W	RPB with Washers	\$22.00

RPB BOLTS	2 Bolts (1/4-20 x 1-3/4" & 3")	\$ 2.00
RPB WASHERS	Washer Set	\$ 2.00

Special bolt lengths available — consult factory (not available for guaranteed same day shipping).

WOBBLE STICK

Designed primarily for use with pendant stations, the wobble stick may be mounted in oil tight or watertight stations. The unit has spring return action to center and may be operated from any angle. It is rated Type 4/4X as standard. NOTE: Our Wobble Stick is a linear device similar to a push button. It is not a joystick or directional.

CODE	DESCRIPTION	LIST

CABLE PULL OPERATORS

Our unique low-energy cable pull operators are available in four styles and are UL Listed for Type 1, 2, 3, 3R, 4/4X, 12 and 13 requirements. Our cable pull operators are reverse spring biased to hold contact blocks in the operated position until a force (varies by operator) is applied to the included eyebolt. Contact operation is opposite of normal (i.e., CBNO is held closed and opens only when the eyebolt is pulled). Units are available with or without contact blocks and can be supplied in Type 4X surface mounting enclosures as a custom order (not available for guaranteed same day shipping). See Section 21 for a complete selection of our control stations.

MOMENTARY CABLE PULL OPERATOR

Constructed to withstand corrosive environments.

It holds contact blocks in the operated position until a 4 - 6 pound force is applied to the included eyebolt.*

CODE	DESCRIPTION	LIST
WITH BLACK POLYESTER (TYPE 4X) CLAMP RING		
CP0	Operator Only	\$108.00
CP0-NO	with CBNO held closed	\$123.00
CP0-NC	with CBNC held open	\$123.00

ACPO	Operator Only	\$113.00
ACPO-NO	with CBNO held closed	\$128.00
ACPO-NC	with CBNC held open	\$128.00

BOOTED MOMENTARY CABLE PULL OPERATOR

Provides protection in the most severe environments, such as when sleet, freeze and thaw conditions are prevalent. It holds contact blocks in the operated position until a 4 - 6 pound force is applied to the included eyebolt.*

CODE	DESCRIPTION	LIST
CPORB4	Operator only with Type 4X Boot	\$147.00

NOTE: Not available with aluminum clamp ring.

HEAVY-DUTY MOMENTARY CABLE PULL OPERATOR

Constructed of solid brass to provide the most reliable operation.

It holds contact blocks in the operated position until a 13 pound force is applied to the included eyebolt.*

CODE	DESCRIPTION	LIST
WITH BLACK POLYESTER (TYPE 4X) CLAMP RING		
HDCPO	Operator Only	\$123.00
HDCPO-NO	with CBNO held closed	\$137.00
HDCPO-NC	with CBNC held open	\$137.00
WITH ALUMINUM (TYPE 4) CLAMP RING		
AHDCPO	Operator Only	\$127.00
AHDCPO-NO	with CBNO held closed	\$142.00
AHDCPO-NC	with CBNC held open	\$142.00

PUSH-PULL MAINTAINED CABLE PULL OPERATOR

Operating head is provided with a latch detent mechanism to hold the operator in the pulled or "out" position when operated. It holds contact blocks in the operated position until a 4 - 6 pound force is applied to the included eyebolt. Requires a manual reset after actuation. Also available in solid stainless steel as a custom order (not available for guaranteed same day shipping)—consult the factory.*

CODE	DESCRIPTION	LIST
WITH BLACK POLYESTER (TYPE 4X) CLAMP RING		
PPCPO	Operator Only	\$123.00
PPCPO-NO	with CBNO held closed	\$137.00
PPCPO-NC	with CBNC held open	\$137.00

APPCPO	Operator Only	\$127.00
APPCPO-NO	with CBNO held closed	\$142.00
APPCPO-NC	with CBNC held open	\$142.00

*NOTE: The c3controls Cable Pull Switch is a "pull operated" switch designed to be operated by pulling on a rope or cable. It is not designed to the Machine Directives for Emergency Devices for Safeguarding Machinery. It does not offer direct drive, positive break/positive transfer contacts. It is a spring operated momentary device that operates "slow make/slow break" normally open and normally closed contact blocks. Pulling the eyebolt collapses an internal spring, which allows contact blocks mounted on the rear of the operator to open or close and actuate the intended circuit. Releasing the eyebolt allows the internal spring to return and depress the contact blocks to their original state. The device is designed to provide in excess of 1 million mechanical operations and is frequently applied in overhead door applications.

30MM POTENTIOMETER OPERATORS

Our single-turn Potentiometer Operators utilize standard 2 watt potentiometers with 1/4" (6.4mm) bushing and 7/8" (22.5mm) long slotted shafts. A 5/64" allen wrench is required for installation. All c3controls 30mm operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements. CSA File # LR 47446-9.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Polyester or polished aluminum clamp rings.
- Single-turn standard 2 watt potentiometer.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 1-13/64" (30.5mm) hole that is directly interchangeable with competitors units.

UNIQUE PRODUCT FEATURES

1. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight.
2. All frictional parts are molded with an internal self-lubricant to provide outstanding wear without troublesome greases used by others that attracts dust and other particles in the area.
3. Three point terminal block and hardware.

DUAL INPUT REMOTE TEST

Our unique Dual Input Remote light unit can be used as a pilot light while also permitting the testing of a number of lights from a single push button. A diode circuit isolates the test supply from the normal supply. The schematic shown represents a typical dual input application.

AVAILABLE LENS COLORS FOR PILOT LIGHTS

30MM PILOT LIGHTS

Our 30mm Pilot Lights, when utilized with our LED lamps provide leakage protection, long-lasting life and high quality with tremendous resistance to shock and vibration. Our reflection technology and state-of-the-art LED lamps improve visibility from all angles. c3controls LED lamps last 100,000 hours – *that's 11.4 years!* Combine these LEDs with our full voltage or resistor packages for optimum durability. All c3controls 30mm operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Full voltage lights incorporate a unique insulated socket design to minimize accidental contact during lamp change.
- All lights use miniature bayonet base lamps to provide reliable lamp secureness.
- Available with Incandescent, Neon, or our LED lamps with leakage protection.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 1-13/64" (30.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

1. Compact, thin design is also vibration resistant.
2. Our seal is infused with a coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. This seal also acts as a light reflector because it is white which increases light output and improves visibility from all angles.
3. Our rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments, even in high ambient temperatures.
4. We utilize premium 130V incandescent and LED lamps for improved, long-lasting life.

AVAILABLE LENS COLORS FOR MULTI-VOLTAGE PILOT LIGHTS

30MM MULTI-VOLTAGE PILOT LIGHTS

When you match up our 30mm Pilot Lights with our LED lamps you get a quality, long-lasting, leakage protected pilot device that withstands shock and vibration. Our state-of-the-art LED lamps last 100,000 hours—that's 11.4 years! And we nest them in a bright white cup that casts light through two lenses scored to improve visibility from all angles. c3controls' 30mm multi-voltage pilot lights are UL listed and rated Type 4/4X as standard to resist water and corrosion. In addition, these lights are listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- #6 terminal screws with self-lifting captive wire clamps to accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Bi-polar design means functionality is independent of which lead is connected to each terminal.
- Rugged Lexan™ lenses can resist high impact for reliable performance in most environments—even in high ambient temperatures.
- Superior performance even in high vibration and shock applications.
- Enhanced safety with field installable IP20 terminal guards are transparent to maintain terminal visibility. Their construction provides easy access to the device terminals—so wiring is convenient and quick, and they snap securely in place without tools.

For your convenience when marking terminals, our IP20 guards use Series WTB2 markers (see Section 22 Page 32), simplifying wiring and troubleshooting.

UNIQUE PRODUCT FEATURES

c3
Exclusive!

ELIMINATE THE HEADACHE OF MULTIPLE LIGHTS TO MATCH MULTIPLE VOLTAGES!

Our state-of-the-art, super bright LEDs and printed circuit boards allow you to operate this light at any voltage from 20V to 277V AC or DC without losing light intensity or consuming a lot of power. One light unit covers a lot of applications, reducing your inventory! All you have to do is choose your lens color.

- Wider operating voltage range of 20V-277V AC or DC.
- Depth behind the panel at 1-11/16" / 42.8mm.
- Integrated light circuit protection. We included a fusible link in the electronic circuit, resulting in predictable failure mode (open circuit) and improving reliability.
- A redesigned circuit allows you to use the light unit in a wider range of applications, including electronic and coil applications where leakage current and voltages may exist.

UNIQUE PRODUCT FEATURES

SAVE TIME & MONEY - WITH c3CONTROLS, ONE CAM DOES IT ALL!

1. One-Cam does it all vs. our competitors who need up to fifteen cams to perform the same function. This One-Cam design eliminates the need for multiple cam configurations and selector switch configuration nightmares, saving time, inventory, money, and ensuring 100% cam selection configuration accuracy.

2. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight.

3. All frictional parts are molded with an internal self-lubricant to provide outstanding wear and smooth cam operations without troublesome greases used by others that attracts dust and other particles in the area.

30MM KEYED SELECTOR SWITCHES

c3controls Keyed Selector Switches offer multiple functions in a single device eliminating the need to install separate devices with individual functions based on contact block configuration. All operators feature polyester housings and all locks are premium quality brass for superior corrosion resistance. Keys are made of extra heavy brass for long life. Our Keyed Selector Switches are UL Listed and are rated Type 4/4X as standard. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements. We also offer you the opportunity to choose the appropriate clamp ring for your specific work environment; polyester clamp rings, which are designed to provide you with a modern appearance, or polished aluminum clamp rings for those who prefer a shiny rugged metal appearance. Add-on contact blocks are available for up to 8 contacts per operator. See pages 4 & 5 for our complete line of 30mm standard contact blocks.

IT'S EASY TO BUILD YOUR OWN LEGEND PLATE

Simply pick the code number from each of the sections below and combine them to build your part number.

Special Legend Plates

All legend plates are a 2-ply laminated plastic, laser engraved for a permanent and quality appearance. Uppercase is standard unless specified.

I. LEGEND PLATE TYPE

CODE	DESCRIPTION	LIST
LP	Standard 2" h x 2" w	\$ 4.00
LPN	Narrow 2" h x 1-3/4" w	\$ 4.00
LPS	Short 1-3/4" h x 2" w	\$ 4.00
LPT	Tall 2-1/4" h x 2" w*	\$ 5.00
LPR	Standard Round 2-13/32" Dia.	\$ 9.00
LPRM	Medium Round 2-3/4" Dia.	\$11.00
LPRJ	Jumbo Round 3-3/4" Dia.	\$12.00

Legend plates feature 2 lines of text with approximately 16 characters per line.

*The tall legend plate (LPT) features 3 lines of text with 16 characters per line.

Upon receipt of your order, legend plates will be set-up as specified and a proof will be sent to you prior to production to ensure accuracy.

To order, submit your drawing to:

Mail: c3controls
Attn: Customer First
PO Box 496
Beaver, PA 15009

Fax: 724.775.5283

Email: legendplates@c3controls.com

To help simplify your order process, templates are available by calling our factory at 724.775.7926 or reference one of the drawings shown on page 42.

Special legend plates are not available for same day shipping.

(Sample custom plate)

CUSTOM LEGEND PLATES

- **Add your Corporate Logo!** Send us your corporate logo electronically to promote your company image in a clean professional legend plate.
- Available in 2-ply 12" x 24" (304.8mm x 609.6mm) sheets of laminated plastic for custom laser engraving.
- To order, specify part number LP-CP (no adhesive back) or LP-CP-A (adhesive back).
- Initial Set-Up Fee Per Legend Plate: \$50/hour (minimum fee \$50.00).
- \$2.00/Square Inch (minimum \$18.00).
- Design services available. Consult factory for details and hourly rate.
- Custom legend plates are not available for same-day shipping.

To order, submit your drawing to:

Mail: c3controls

EXTENDED CLAMP RINGS

We offer four types of 30mm extended clamp rings that guard against accidental operation. Use our Extended Clamp Rings (ECR or AECR) with flush caps, our Clear Guarded Clamp Ring (EECR) with illuminated push buttons and our Large Extended Clamp Ring (LECR) with flush or extended caps, which also provides easier access to your push buttons.

FOR USE WITH NON-ILLUMINATED CAPS

CODE	DESCRIPTION	LIST
ECR	Extended Ring	\$ 6.00
LECR	Large Extended Ring	\$10.00
AECR	Aluminum Extended Ring	\$10.00

FOR USE WITH ILLUMINATED LENS

CODE	DESCRIPTION	LIST
EECR	Guarded Clear Polyester Ring	\$ 8.00

PANEL GASKETS

Our panel gaskets are constructed of Neoprene for long life and low compression set and provide a watertight seal. Panel gaskets are supplied to accommodate different panel thickness. In order to meet Type 4/4X requirements, at least one 1/16" (1.6mm) gasket must be used. NOTE: All c3controls 30mm operators are provided with gaskets.

CODE	DESCRIPTION	LIST
PG2	1/16" (1.6mm) Gasket	\$ 1.00
PG6	3/16" (4.8mm) Gasket	\$ 1.00

THRUST & TRIM WASHERS

Anti-rotation device for use with 30mm push buttons, selector switches and pilot lights to provide additional protection from rotation and aid in alignment. This product is optional with c3controls gasket technology.

CODE	DESCRIPTION	LIST
TTW	30mm Anti-Rotation Washers	\$ 4.00

LAMP REMOVAL TOOL

Used to facilitate the removal of lamps particularly in illuminated push buttons and push-to-test operators.

CODE	DESCRIPTION	LIST
LRT	Lamp Removal Tool	\$ 8.00

LOCK OFF ATTACHMENTS

c3controls offers a wide variety of 30mm corrosive resistant lock-off attachments for maintained and momentary push buttons and selector switches. Our LOAX, LOAM and LOAP lock-offs permit locking operators in the depressed position. Our LOAFC lock-off covers and locks the operator so its position cannot be changed and features a 1/4" (6.4mm) diameter padlocking hasp.

LOAFC

LOAX/LOAM/LOAP

CODE	FITS	LIST
LOAX	Standard Extended Cap	\$32.00
LOAM	Standard Momentary Mushroom Cap	\$32.00
LOAP	Push-Pull Maintained Mushroom Cap (PPMC) or Push Maintained Extended Cap (PMXC)	\$32.00
LOAFC	Most Push Buttons and Selector Switches	\$50.00

GUARD ATTACHMENT

Our PPGD guards against accidental operation and is made of a high strength polyester material.

CODE	FITS	LIST
PPGD	Maintained Push Buttons	\$40.00

HOLE PLUG

Use to seal unused panel holes. Our hole plug comes with additional sealing panel gaskets to ease installation and is rated Type 4X.

CODE	DESCRIPTION	LIST
HP	30mm Grey Hole Plug	\$11.00

CLAMP RING WRENCH

To simplify tightening and loosening of standard polyester and aluminum 1-3/8" (34.9mm) octagonal clamp rings. Won't scratch your lens or panel.

CODE	DESCRIPTION	LIST
CRW	30mm Clamp Ring Wrench	\$20.00

PUSH MAINTAINED FLUSH AND EXTENDED CAPS

Use with a secondary standard cap and mechanical interlock to provide two button momentary/maintained operation or use on adjacent operators with mechanical interlock to provide two-button maintained/maintained operation.

COLOR	FLUSH CODE	EXTENDED CODE	LIST
WITH BLACK POLYESTER (TYPE 4X) CLAMP RING

Red	APMFCRD	APMXCRD	\$48.00
Yellow	APMFCYW	APMXCYW	\$48.00

MECHANICAL INTERLOCK

Our Mechanical Interlock features a 2" (50.8mm) center and can be used to interlock two adjacent operators. This may also be used to interlock a two-unit maintained/momentary assembly. NOTE: Factory installation recommended.

CODE	DESCRIPTION	LIST
MI	30mm Mechanical Interlock	\$48.00

IP20 TERMINAL GUARDS

Our IP20 terminal guards protect against accidental contact with live parts and can be ordered separately as an accessory or factory installed providing the convenience of a single catalog number. NOTE: IP20 terminal guards must be installed before wiring. For factory installed guards, refer to the operator page to determine the appropriate part number. For terminal marking convenience, our guards can be utilized with Series WTB2 markers (see Section 22 Page 32).

CODE	FITS	LIST

LED, INCANDESCENT & NEON REPLACEMENT LAMPS

c3controls offers a full range of lamp options in a miniature bayonet base for direct interchangeability which provides flexibility in choosing the best lamp for each installation application. Multiple voltage options in Incandescent, LED and Neon lamps are available. Please refer to the chart at the bottom of the page to determine the appropriate replacement lamp based on your operator voltage. For lamp technical data, see page 34.

STANDARD CONTACTS

Utilization Category

	IEC	UL	Make Rating	Break Rating	Ith-Thermal Current
AC	AC-15	A600	7200VA	720VA	10A
DC	DC-13	P300	138VA	138VA	5A

NOTE: For AC voltage below 72V AC the max. allowed switching current is 10A = Ith. For DC voltages below 28V DC the max. allowed switching current is 5A = Ith.

For switching applications below 24V/40mA - Hermetic REED contacts are recommended. Hermetic Reeds are also excellent in environments containing chemical vapors, oxidizing agents, and explosive gases. Please refer to the HAZARDOUS section of the Series 30 devices for more information. Available on c3controls' 30MM products only.

30MM HAZARDOUS DUTY PILOT DEVICES

c3controls' 30mm H-Line Pilot Devices are designed for your most demanding hazardous duty applications. Specially engineered for Class 1, Division 2 and Zone 2, our 30mm H-Line offers a wide selection of hermetically sealed reed and factory sealed contact blocks, and each is made of an all-polyester construction with nickel-plated or stainless steel metal parts for superior corrosion resistance.

30MM HAZARDOUS DUTY PILOT DEVICES

Every product in our portfolio is designed and manufactured to meet the needs of the machine builder, including our comprehensive line of 30mm Hazardous Location Pilot Devices. Check out all the features of our Series 30 H-Line below!

LEADING THE INDUSTRY WITH OUR INNOVATIVE AND RUGGED DESIGN

✓ Proven	Our 30mm hazardous operators are UL Listed and CE Marked meeting global standards requirements.    
✓ Easy to Install	Our contact blocks snap-on for secure assembly and are color coded for quick circuit identification.
✓ Simple Customization	Our light modules come with various lens color options for appropriate operator interface and are available in incandescent, neon, or our LED lamps with leakage protection.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the contact blocks for easy reference during installation.
✓ Heavy Duty	Polyester construction provides superior durability, corrosion resistance, moisture rejection and electrical insulation. For added protection, metal parts are nickel-plated.
✓ Convenient	Reduce inventory with our interchangeable modular design, providing endless options for appropriate operator interface.
✓ 100% Reliability	Hermetically sealed and factory sealed contact blocks are manufactured with all stainless steel hardware for use in harsh environments.
✓ Added Security	All 30mm hazardous location operators come with a screw-tightening mounting bracket to ensure contact blocks remain snug against operator.
✓ Environmentally Secure	With 4/4X and IP65 ratings, our 30mm line of pilot devices are built to last and withstand dust, corrosion, ice, and rain.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“We were very pleased with the performance of c3controls’ 30mm Hazardous Duty Pilot Devices, and by purchasing direct from the manufacturer, we have reduced costs without reducing quality.”

Charlie Johnson, Applications Engineer • **ECI Industrial, LLC**

UNIQUE PRODUCT LINE FEATURES

CLASS 1, DIVISION 2

Leading the industry with the widest range of hermetically sealed reed and factory sealed contact blocks.

METAL ON THE INSIDE

c3controls 30mm Push-Twist-Release Emergency Stop devices feature a nickel-plated detent mechanism with stainless steel ball, and our Push-Pull operators contain a solid stainless steel detent mechanism. These features ensure reliable operation in emergency stop applications and provide safe interruption of circuits and longer life.

EXCLUSIVE MULTI-VOLTAGE LIGHTS

c3controls state-of-the-art multi-voltage light modules—the only U.S. engineered multi-voltage light in the industry!—operate at any voltage from 20V to 277V AC or DC without losing intensity.

U-CUP SEAL

Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions and keeps water, oils, and dust away from the contact blocks.

ONE CAM DESIGN

Our single cam design eliminates the need for multiple cam and selector switch configurations, reducing inventory and saves you labor time and costs.

INTERNAL SELF-LUBRICANT

All frictional parts are molded with an internal self-lubricant to provide outstanding wear without troublesome greases used by others.

30MM H-LINE CONTACT BLOCKS

Our H-Line Contact Blocks feature convenient snap-on secured assembly, saving valuable time and money. For added security, all H-Line operators come standard with a screw-tightening mounting bracket to ensure the contact blocks remain snug to the operator. The hermetically sealed and factory sealed contact blocks are manufactured with all stainless steel hardware, which is excellent for harsh environments and for 100% reliability. We also offer ordinary location contact blocks, please refer to Section 13 Pages 4 & 5.
Note: Hermetically and factory sealed contact blocks cannot be assembled stacked from the factory.

FACTORY SEALED FEATURES

- 1. Glass Reinforced Thermoplastic Body
- 2. Fine Silver Contacts
- 3. Stainless Steel Bushing
- 4. Stainless Steel Terminal Screw
- 5. Stainless Steel Shaft
- 6. Nickel-Plated Terminals
- 7. Stainless Steel Overtravel Spring
- 8. Stainless Steel Kickout Spring

VI. CONTACT BLOCK CONFIGURATION (RIGHT SIDE)

(USE CHART V. FROM ABOVE)

30MM H-LINE MOMENTARY NON-ILLUMINATED PUSH BUTTONS

c3controls goes the extra step to make sure that our products outlast the competition. Our 30mm H-Line Momentary Non-Illuminated Push Buttons are durable and flexible for a variety of uses, and all metal parts are nickel-plated for superior corrosion resistance. All c3controls 30mm H-Line operators are UL Listed and are rated Type 4/4X standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Our 30mm H-Line operators come standard with a polyester clamp ring, although optional aluminum clamp rings are available.
- #6 stainless steel terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 1-13/64" (30.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

1. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. This U-cup seal also acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X with or without a rubber boot. *In fact, our push button was the first to be rated Type 4X without using a rubber boot!*
2. Our push buttons modular design provides endless options for appropriate operator interface by alternating cap types and colors which ultimately will save you time and money by reducing your inventory.

ADDED SECURITY!

For added security, all H-Line Push Buttons come standard with a screw tightening mounting bracket to ensure the contact blocks remain snug to the operator.

30MM H-LINE MAINTAINED NON-ILLUMINATED PUSH BUTTONS

THE MOST RUGGED EMERGENCY STOP AVAILABLE IN THE INDUSTRY!

The 30mm H-Line of maintained non-illuminated push buttons feature all polyester construction and all metal parts are nickel-plated or stainless steel for superior corrosion resistance; #6 stainless steel terminal screws have self-lifting captive wire clamps to accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal. Units mount in a round 1-13/64" (30.5mm) hole and are directly interchangeable with competitors units. Operators are UL Listed and are rated Type 4/4X standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

UNIQUE FEATURES

We Put The Metal
On The Inside —
Where It Counts!

Our push-twist operator features a nickel-plated detent mechanism with stainless steel ball while our push-pull operator contains a solid stainless steel detent mechanism. These are the best-engineered, most reliable heavy-duty emergency stop buttons in the world. This rugged design, which comes standard with a polyester clamp ring or optional aluminum clamp ring, ensures reliable operation in emergency applications, providing safe interruption of circuits, and much longer life when compared to any competitor's product.

ADDED SECURITY!

For added security, all H-Line Push Buttons come standard with a screw tightening mounting bracket to ensure the contact blocks remain snug to the operator.

30MM H-LINE MOMENTARY ILLUMINATED PUSH BUTTONS

c3controls 30mm H-Line Momentary Illuminated Push Buttons are durable and flexible for a variety of uses, and all metal parts are nickel-plated for superior corrosion resistance. All c3controls 30mm H-Line operators are UL Listed and are rated Type 4/4X standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Our 30mm H-Line operators come standard with a polyester clamp ring, although optional aluminum clamp rings are available.
- Full voltage lights incorporate a unique insulated socket design to minimize accidental contact during lamp change.
- All lights use miniature bayonet base lamps that are nickel-plated for corrosion-resistance and to provide reliable lamp secureness.
- #6 stainless steel terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 1-13/64" (30.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

30MM HAZARDOUS DUTY PILOT DEVICES

UNIQUE PRODUCT FEATURES

1. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. This U-cup seal also acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X standards.
2. All frictional parts are molded with an internal self lubricant to provide outstanding wear without troublesome greases used by others.

AVAILABLE LENS COLORS FOR MULTI-VOLTAGE PILOT LIGHTS

30MM MULTI-VOLTAGE PILOT LIGHTS

When you match up our 30mm Pilot Lights with our LED lamps you get a quality, long-lasting, leakage protected pilot device that withstands shock and vibration. Our state-of-the-art LED lamps last 100,000 hours—that's 11.4 years! And we nest them in a bright white cup that casts light through two lenses scored to improve visibility from all angles. c3controls' 30mm multi-voltage pilot lights are UL listed and rated Type 4/4X as standard to resist water and corrosion. In addition, these lights are listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- #6 terminal screws with self-lifting captive wire clamps to accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Nickel plated clamp rings are ideal for corrosive environments. Heavy-duty brass current carrying components for improved conductivity and corrosion resistance.
- Bi-polar design means functionality is independent of which lead is connected to each terminal.
- Rugged Lexan™ lenses can resist high impact for reliable performance in most environments—even in high ambient temperatures.
- Superior performance even in high vibration and shock applications.
- Enhanced safety with field installable IP20 terminal guards are transparent to maintain terminal visibility. Their construction provides easy access to the device terminals—so wiring is convenient and quick, and they snap securely in place without tools.

For your convenience when marking terminals, our IP20 guards use Series WTB2 markers (see Section 22 Page 32), simplifying wiring and troubleshooting.

Exclusive!

ELIMINATE THE HEADACHE OF MULTIPLE LIGHTS TO MATCH MULTIPLE VOLTAGES!

Our state-of-the-art, super bright LEDs and printed circuit boards allow you to operate this light at any voltage from 20V to 277V AC or DC without losing light intensity or consuming a lot of power. One light unit covers a lot of applications, reducing your inventory! All you have to do is choose your lens color.

- Wider operating voltage range of 20V-277V AC or DC.
- Depth behind the panel at 1-11/16" / 42.8mm.
- Integrated light circuit protection. We included a fusible link in the electronic circuit, resulting in predictable failure mode (open circuit) and improving reliability.
- A redesigned circuit allows you to use the light unit in a wider range of applications, including electronic and coil applications where leakage current and voltages may exist.

IT'S EASY TO BUILD YOUR OWN SELECTOR SWITCH

Simply pick the code number from each of the sections below and combine them to build your part number.

Selector Switches

I - **II** **III** **IV** - **V*** / **VI***

Example: To build one of our most popular Selector Switches, the part number would be **I + II + III + IV + V + VI** or **HSSOR3-SHWE-PRNO/PRNO**

*NOTE: Contact block configurations are based on circuit designations (see page 21 for circuit designation charts).

I. SELECTOR SWITCH OPERATOR FUNCTION

CODE	POS./FUNCTION	LIST
FOR USE WITH FACTORY SEALED CONTACT BLOCKS		
HSSO2	2/Maintained	\$ 25.00
HSROLR	2/Spring Return, L to R	\$ 42.00
HSRORL	2/Spring Return, R to L	\$ 42.00

30MM H-LINE SELECTOR SWITCHES

With our unique universal cam design, c3controls Selector Switches offer multiple functions in a single device eliminating the need to install separate devices to perform individual functions based on contact block configuration. In addition, interchangeable selector handles provide product selection and field flexibility. All operators feature polyester housings, are UL

Listed and are rated Type 4/4X standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

HANDLE POSITIONS

2-POSITION

3-POSITION

UNIQUE PRODUCT FEATURES

SAVE TIME & MONEY - WITH c3CONTROLS, ONE CAM DOES IT ALL!

1. One-Cam does it all vs. our competitors who need up to fifteen cams to perform the same function. This One-Cam design eliminates the need for multiple cam configurations and selector switch configuration nightmares, saving time, inventory, money, and ensuring 100% cam selection configuration accuracy.
2. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight.
3. All frictional parts are molded with an internal selflubricant to provide outstanding wear and smooth cam operations without troublesome greases used by others that attracts dust and other particles in the area.

Upon receipt of your order, legend plates will be set-up as specified and a proof will be sent to you prior to production to ensure accuracy.

To order, submit your drawing to:

Mail: c3controls
Attn: Customer First
PO Box 496
Beaver, PA 15009

Fax: 724.775.5283

Email: legendplates@c3controls.com

To help simplify your order process, templates are available by calling our factory at 724.775.7926 or reference one of the drawings shown on page 36.

Special legend plates are not available for same day shipping.

(Sample custom plate)

CUSTOM LEGEND PLATES

- **Add your Corporate Logo!** Send us your corporate logo electronically to promote your company image in a clean professional legend plate.
- Available in 2-ply 12" x 24" (304.8mm x 609.6mm) sheets of laminated plastic for custom laser engraving.
- To order, specify part number LPCP (no adhesive back) or LPCP-A (adhesive back).
- Initial Set-Up Fee Per Legend Plate: \$50/hour (minimum fee \$50.00).
- \$2.00/Square Inch (minimum \$18.00).
- Design services available. Consult factory for details and hourly rate.
- Custom legend plates are not available for same-day shipping.

To order, submit your drawing to:

Mail: c3controls
Attn: Customer First
PO Box 496
Beaver, PA 15009

EXTENDED CLAMP RINGS

We offer four types of 30mm extended clamp rings that guard against accidental operation. Use our Extended Clamp Rings (ECR or AECR) with flush caps, our Clear Guarded Clamp Ring (EECR) with illuminated push buttons and our Large Extended Clamp Ring (LECR) with flush or extended caps, which also provides easier access to your push buttons.

FOR USE WITH NON-ILLUMINATED CAPS

CODE	DESCRIPTION	LIST
ECR	Extended Ring	\$ 6.00
LECR	Large Extended Ring	\$10.00
AECR	Aluminum Extended Ring	\$10.00

FOR USE WITH ILLUMINATED CAPS

CODE	DESCRIPTION	LIST
EECR	Guarded Clear Polyester Ring	\$ 8.00

GUARD ATTACHMENT

Our PPGD guards against accidental operation and is made of a high strength polyester material.

CODE	FITS	LIST
PPGD	Maintained Push Buttons	\$40.00

MECHANICAL INTERLOCK

Our Mechanical Interlock features a 2" (50.8mm) center and can be used to interlock two adjacent operators. This may also be used to interlock a two-unit maintained/momentary assembly. NOTE: Factory installation recommended.

CODE	DESCRIPTION	LIST
MI	30mm Mechanical Interlock	\$48.00

HOLE PLUG

Use to seal unused panel holes. Our hole plug comes with additional sealing panel gaskets to ease installation and is rated Type 4X.

CODE	DESCRIPTION	LIST
HP	30mm Grey Hole Plug	\$11.00

LOCK OFF ATTACHMENTS

c3controls offers a wide variety of 30mm corrosive resistant lock-off attachments for maintained and momentary push buttons and selector switches. Our LOAX, LOAM and LOAP lock-offs permit locking operators in the depressed position. Our LOAFC lock-off covers and locks the operator so its position cannot be changed and features a 1/4" (6.4mm) diameter pad locking hasp.

LOAFC

LOAX/LOAM/LOAP

CODE	FITS	LIST
LOAX	Standard Extended Cap	\$32.00
LOAM	Standard Momentary Mushroom Cap	\$32.00
LOAP	Push-Pull Maintained Mushroom Cap (PPMC) or Push Maintained Extended Cap (PMXC)	\$32.00
LOAFC	Most Push Buttons and Selector Switches	\$50.00

PANEL GASKETS

Our panel gaskets are constructed of Neoprene for long life and low compression set and provide a watertight seal. Panel gaskets are supplied to accommodate different panel thickness. In order to meet Type 4/4X requirements, at least one 1/16" (1.6mm) gasket must be used. NOTE: All c3controls 30mm operators are provided with gaskets.

CODE	DESCRIPTION	LIST
PG2	1/16" (1.6mm) Gasket	\$ 1.00
PG6	3/16" (4.8mm) Gasket	\$ 1.00

THRUST & TRIM WASHERS

Anti-rotation device for use with 30mm push buttons, selector switches and pilot lights to provide additional protection from rotation and aid in alignment. This product is optional with c3controls gasket technology.

CODE	DESCRIPTION	LIST
TTW	30mm Anti-Rotation Washers	\$ 4.00

PUSH MAINTAINED FLUSH AND EXTENDED CAPS

Use with a secondary standard cap and mechanical interlock to provide two button momentary/maintained operation or use on adjacent operators with mechanical interlock to provide two-button maintained/maintained operation.

COLOR	FLUSH CODE	EXTENDED CODE	LIST
WITH BLACK POLYESTER (TYPE 4X) CLAMP RING

*NOTE: Aluminum clamp rings are NOT corrosion resistant.

CLAMP RING WRENCH

To simplify tightening and loosening of standard polyester and aluminum 1-3/8" (34.9mm) octagonal clamp rings. Won't scratch your lens or panel.

CODE	DESCRIPTION	LIST
CRW	30mm Clamp Ring Wrench	\$20.00

RESET PUSH BUTTON

Our unique Reset Push Button mounts in a standard 1-13/64" (30.5mm) hole and accepts either 20 hex head bolts or 20 thread rod to provide adjustable extension and save on all rod cutting and fitting labor. Universal styles include two bolts to cover 1" to 3" (25.4mm to 76.2mm) space from cover to overload reset rod. It is rated Type 4/4X as standard.

CODE	DESCRIPTION	LIST
RPB	Reset Push Button	\$18.00
RPB-B	RPB w/Bolts (1/4-20 x 1-3/4" & 3")	\$20.00

CONTACT BLOCKS

FACTORY SEALED: Contact Blocks are Certified as "Explosion Proof". Devices employing this method of protection are designed so that all electrical parts are enclosed in a switch housing that is capable of withstanding, without damage, an explosion of a specified gas or vapor/air mixture which may occur during the operation of the switch. Further, the explosion internal to the switch body is controlled so that the hot gases are extinguished and cooled before they are allowed to escape to the surrounding atmosphere.

HERMETICALLY SEALED: Contact Blocks are Certified as "Non-Incendive". Devices employing this method of protection are designed so that all electrical parts are a bonded part of the switch housing that forms an arcing chamber that is evacuated of all oxygen, filled with an inert gas, and then sealed to prohibit the exchange of gases with the surrounding environment. These devices are incapable of igniting the surrounding gases or vapor/air mixtures under normal operation. Devices of this type are suitable for use in Div. 2/ Zone 2 applications. Hermetically Sealed contact blocks are also extremely useful for switching low energy circuits or circuits applied in atmospheres containing oxidizing agents and pollutants that might effect the performance of silver switching and metal contact elements. Hermetically Sealed Switch performance is consistent and repeatable in almost any environment.

FACTORY SEALED CONTACT BLOCK - CBFS/CBFSR - Class I Div. 2 Gr. B, C & D / Zone 2 Gr. IIB +H2

	Utilization Category		Make Rating	Break Rating	Ith-Thermal Current
	IEC	UL			
AC	AC-15	A600	7200VA	720VA	10A
DC	DC-13	P300	138VA	138VA	5A

NOTE: For AC voltage below 72V AC the maximum allowed switching current is 10A = Ith. For DC voltages below 28V DC the maximum allowed switching current is 5A = Ith.

For switching applications below 24V/40mA, Hermetic REED contacts are recommended.

HERMETICALLY SEALED POWER REED CONTACT BLOCK - Class I Div. 2 Gr. A, B, C & D / Zone 2 Gr. IIC

	Utilization Category		Make Rating	Break Rating	Ith-Thermal Current
	IEC	UL			
AC	AC-15	B300	3600VA	360VA	5A
	AC-15	C600	1800VA	180VA	2.5A
DC	DC-13	Q300	69VA	69VA	2.5A

NOTE: For AC voltage below 72V AC the maximum allowed switching current is 5A = Ith. For DC voltages below 28V DC the maximum allowed switching current is 2.5A = Ith.

Suitable for switching DRY Circuits and Low Energy Circuits (Less than 24V-40mA).

30MM HAZARDOUS DUTY PILOT DEVICES

CONTACT BLOCKS (CONTINUED)

HERMETICALLY SEALED MEDIUM-LOGIC REED CONTACT BLOCK - Class I Div. 2 Gr. A, B, C & D / Zone 2 Gr. IIC

	Utilization Category		Inductive	Resistive	Ith-Thermal Current
	IEC	UL			
AC	AC-12	250V Max.	40VA	100 Watt	3A

NOTE: Suitable for switching DRY Circuits and Low Energy Circuits (Less than 24V-40mA).

HERMETICALLY SEALED MID-POWER REED CONTACT BLOCK - Class I Div. 2 Gr. A, B, C & D / Zone 2 Gr. IIC

	Utilization Category		Make Rating	Break Rating	Ith-Thermal Current
	IEC	UL			
AC	AC-15	C300	1800VA	180VA	2.5A
DC	DC-13	Q150	69VA	69VA	2.5A

NOTE: For AC voltage below 72V AC the maximum allowed switching current is 2.5A = Ith. For DC voltages below 28V DC the maximum allowed switching current is 2.5A = Ith. Suitable for switching DRY Circuits and Low Energy Circuits (Less than 24V-40mA).

HERMETICALLY SEALED LOGIC REED CONTACT BLOCK - Class I Div. 2 Gr. A, B, C & D / Zone 2 Gr. IIC

	Utilization Category		Inductive	Resistive	Ith-Thermal Current
	IEC	UL			
AC		250V Max.	N/A	40 Watt	2A

NOTE: Suitable for switching DRY Circuits and Low Energy Circuits (Less than 24V-40mA).

22MM IEC PILOT DEVICES

c3controls offers the best selection of illuminated and non-illuminated push buttons and selector switches on the market today. We also have a full line of unibody and modular pilot lights, all engineered for superior durability and long life. Check out our multi-voltage LED light module that can be operated at any voltage from 20V to 277V AC or DC. Their modular design and easy-to-create assemblies offer convenience in ordering and assembly. Our line of factory assembled 22mm IEC Compact Control Stations offers the convenience of a single catalog number, shorter control panel bill of material, and easier inventory management.

22MM IEC PILOT DEVICES

c3controls offers a comprehensive line of 22mm IEC Pilot Devices. Each product is designed and manufactured to the needs of the machine builder. Check out all the features of our Series 22 IEC below!

THE MOST INNOVATIVE LINE OF AMERICAN-MADE 22MM IEC PILOT DEVICES.

✓ Proven	Our 22mm IEC operators are UL Listed and CE marked meeting global standards requirements.	
✓ Easy to Install	Our “snap-on” contact blocks are color coded for quick circuit identification and feature 35° angled captive terminal screws and self-lifting pressure plates for fast and easy wiring.	
✓ Quick and Simple	The latching mechanism enables the user to wire the contact blocks and light modules separate from the operator and outside the confined space of the control panel.	
✓ Low Profile	The 22mm line assumes the lead in the industry with the shortest depth behind the panel.	
✓ Rugged Design	Manufactured to be the highest quality—inside and out. With its metal appearance and sleek design, you know you are getting the quality you deserve.	
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the contact blocks for easy reference during installation.	
✓ Flexible	Our contact blocks can be stacked 2 deep and up to 3 across for a total of 6 circuits, providing the flexibility to operate multiple control circuits from a single operator.	
✓ Heavy Duty	Polyester construction provides superior durability, corrosion resistance, moisture rejection and electrical insulation.	
✓ Convenient	Reduce inventory with our interchangeable modular design, providing endless options for appropriate operator interface.	
✓ Environmentally Secure	With 4/4X and IP66 ratings, our 22mm line of pilot devices are built to last and withstand dust, corrosion, ice, and rain.	
✓ Lifetime Warranty*	Every product is backed by our lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

c3controls’ 22mm IEC Multi-Voltage Pilot Lights, along with their outstanding customer and delivery services, give us what we need to maintain a competitive edge.

Illuminated E-Stop

Modular Pilot Light

Illuminated Selector Switch

UNIQUE PRODUCT LINE FEATURES

SHORTER DEPTH

Our compact line saves you valuable space in your control panel with our shorter contact blocks and light modules. We deliver the shortest depth 22mm Pilot Devices engineered in the USA, exceeding the demands of our customers and the industry.

EN418 EMERGENCY STOP

c3controls' maintained push-twist-release operators meet the global compliance standards for EN418 - *Safety of Machinery*, and they feature a unique trigger action and are available in both non-illuminated and illuminated versions.

EXCLUSIVE MULTI-VOLTAGE LIGHTS

c3
Exclusive!

Our non-relampable multi-voltage light units—the only U.S. engineered multi-voltage light in the industry!—operate at any voltage from 20V to 277V AC or DC without losing intensity, making them easily interchangeable across multiple applications.

ONE CAM DESIGN

Our single cam design eliminates the need for multiple cam and selector switch configurations, reducing inventory and saving you labor time and costs.

LABOR AND COST SAVINGS

Available in non-illuminated and illuminated versions, our dual-push button operators do the work of two operators in one 22.5mm hole, saving time, labor and space.

COMPACT CONTROL STATIONS

Factory assembly of our 22mm IEC Compact Control Stations provide the convenience of a single catalog number, no assembly required, shorter control panel bill of materials, and easier inventory management.

Simple, Fast and Time Saving.

c3controls 22mm IEC modular contact blocks are constructed out of the finest materials ensuring secure assembly at every “snap”. Our contact blocks can be stacked 2 deep and up to 3 across for a total of 6 circuits. 35 degree angled captive terminal screws and self-lifting pressure plates make wiring fast and easy. Also, our contact blocks are color coded for quick circuit identification.

22MM IEC CONTACT BLOCKS

Our contact blocks save you time and money by offering the flexibility to operate multiple control circuits from a single pilot device. This capability includes stacking up to 2 contact blocks deep and up to 3 across providing a total of 6 circuits on most operators in any combination. And, unlike the competition, our standard latching device allows for 3-across contact blocks without the hassle of ordering separate latches. In addition, our “snap-on” contact blocks are color coded for instant circuit identification and take less time to install than it takes to pick up a screwdriver! The heavy-duty construction ensures these contact blocks will remain installed. Our contact blocks are rated A600 (AC), Q600 (DC) and IP20 for finger safe terminations.

UNIQUE PRODUCT FEATURES

c3CONTROLS MANUFACTURES THE MOST INNOVATIVE, USER-FRIENDLY LINE OF CONTACT BLOCKS ON THE MARKET TODAY!

Gold plated contacts are available on standard blocks for dry circuit applications.

1. 35 Degree angled captive terminal screws and self-lifting pressure plates facilitate wiring even when blocks are stacked.
2. Stainless steel spring for protection against corrosion.
3. Color-coded body for quick circuit identification (green = NO, red = NC, white = EM, black = DB).
4. Built-in self-wiping cleaning action and high contact point pressure for low-level switching. Silver contact rivets provide long life on normal control circuits.
5. Single mounting position allows for proper installation everytime and constant terminal position from block to block, reducing installation and wiring time.

IT'S EASY TO BUILD YOUR OWN PUSH BUTTON

Simply pick the code number from each of the sections below and combine them to build your part number.

Momentary Push Buttons (Non-Illuminated)

W22PB - - / /
I II III IV V* VI* VII*

Example: To build one of our most popular Push Buttons, the part number would be **W22PB + II + III + IV + V + VI + VII** or **W22PB-FG-10**

*NOTE: Contact block configurations are based on circuit designation. If only two contact blocks are selected, they will be assembled in the left and right positions.

MIX AND MATCH ANY BEZEL, COLOR AND MOMENTARY NON-ILLUMINATED PUSH BUTTON CAP

22MM IEC MOMENTARY NON-ILLUMINATED PUSH BUTTONS

Our line of 22mm IEC Momentary Non-Illuminated Push Buttons feature contact blocks that are stackable up to 2 deep and 3 across for a total of 6 circuits per operator. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Compact size, only 45.6mm (1-57/64") deep from the front of the panel.
- Six color options are available in three different cap types.
- Removable latching device allows for easy installation and wiring for up to three contact blocks across.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

Our revolutionary U-cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. The U-Cup seal also acts like a squeegee and forms a permanent watertight seal that meets or exceeds Type 4/4X.

IT'S EASY TO BUILD YOUR OWN PUSH BUTTON

Simply pick the code number from each of the sections below and combine them to build your part number.

Momentary Dual Push Buttons (Non-Illuminated)

W22DPB - - /
I II III IV V VI* VII*

Example: To build one of our most popular Push Buttons, the part number would be **W22DPB + II + III + IV + V + VI + VII** or **W22DPB-ERFG-01/10**

*NOTE: Contact block mounted on left side is operated by the bottom push button and contact block mounted on right side is operated by the top push button.

22MM IEC MOMENTARY NON-ILLUMINATED DUAL PUSH BUTTONS

Our line of 22mm IEC Momentary Non-Illuminated Push Buttons feature contact blocks that are stackable up to 2 deep and 3 across for a total of 6 circuits per operator. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Two color options are available in both flush and extended caps.
- The Dual Push Button design incorporates all the features and advantages of the Series 22 IEC products.
- Removable latching device allows for easy installation and wiring of contact blocks.
- An illuminated version is also available, see pages 18 & 19.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

Labor & Cost Savings

Combine the functionality of two operators in one 22.5mm (7/8") hole—saving time, labor and space!

Environmentally Secure

The seal acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X and IP66 without a rubber boot.

IT'S EASY TO BUILD YOUR OWN PUSH BUTTON

22MM IEC MAINTAINED NON-ILLUMINATED PUSH BUTTONS

THE MOST RUGGED EMERGENCY STOP IN THE INDUSTRY!

If you are looking for a 22mm heavy-duty emergency stop, look no further. The c3controls 22mm IEC Emergency Stop Push Button is the best in the industry. These operators are manufactured with polyester construction for superior corrosion resistance, moisture rejection and electrical insulation. The solid brass detent mechanism ensures safe circuit interruption every time. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Compact size, only 45.6mm (1-51/64") deep from the front of the panel.
- Direct drive contacts feature a mechanical linkage from the operator to ensure contact separation when actuated, even if the contacts have lightly welded.
- Removable latching device allows for easy installation and wiring for up to three contact blocks across.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps to accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Contact blocks are stackable up to 2 deep and 3 across for a total of 6 circuits per operator.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

22MM IEC PILOT DEVICES

UNIQUE PRODUCT FEATURES

We Put The Metal On The Inside – Where It Counts!

c3controls Emergency Stops contain a solid brass detent mechanism and are the best-engineered, most reliable heavy-duty emergency stop buttons in the world. This rugged design ensures reliable operation in emergency applications, providing safe interruption of circuits, and much longer life when compared to any competitor's product.

22MM IEC MAINTAINED NON-ILLUMINATED EMERGENCY STOP PUSH BUTTONS

Our 22mm IEC Maintained Non-Illuminated Push-Twist Release Push Buttons rugged design ensures reliable operation in emergency stop applications, providing safe interruption of circuits. The operators provide a trigger action function with direct drive contacts meeting global standards for emergency stop buttons. Contact blocks can be stacked up to 2 deep and 3 across for a total of 6 circuits per operator. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Meets global standards for Emergency Stop buttons.
- An illuminated version is also available, see pages 22 & 23.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

ERGONOMICALLY DESIGNED

Cone shaped head with knurls fit easily into your hand for a comfortable operation.

EASE OF VISIBILITY

Molded bold white arrows (black arrows on yellow and white caps) indicate the 45° twist-to-release operation for easy visibility over the life of the product.

EN418 EMERGENCY STOP OPERATORS

c3controls maintained non-illuminated push-twist-release operators were designed to meet EN418 Standards for "Safety of Machinery." Constructing an EN418 Emergency Stop Push Button from our standard operators is easy—simply select a red mushroom cap with a yellow housing.

- Ergonomically designed red mushroom cap (40mm (1-9/16")) with white arrows for quick identification and ease of control.
- Trigger Action Function—Operator requires dedicated push action to operate contacts, eliminating accidental operation and meeting global standards.
- Latching mechanism which is activated when the actuator of the device is depressed to a certain point and the contacts open.
- The anti-teasing function guarantees the contacts will remain open until a person manually intervenes and releases the actuator.
- The direct drive design mechanically links the mushroom cap operator and contacts to drive the electrical contacts open. The trigger action makes the Emergency Stop operator more than a push button.
- Red operator, yellow housing, and molded white directional arrows are all designed to meet global standards for Emergency Stop operators.

MIX AND MATCH ANY BEZEL, COLOR AND MOMENTARY ILLUMINATED PUSH BUTTON LENS

22MM IEC MOMENTARY ILLUMINATED PUSH BUTTONS

Our 22mm IEC Momentary Illuminated Push Buttons feature contact blocks that are stackable up to 2 deep and 2 across for a total of 4 circuits per operator, depending on the light unit module. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Available state-of-the-art non-relampable multi-voltage light module with super-bright LED can be operated at any voltage from 20V to 277V AC or DC.
- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Full voltage light modules use miniature bayonet base lamps to provide reliable lamp secureness.
- c3controls LED lamp design life is 100,000 hours – that's 11.4 years!
- Removable latching device allows for easy installation and wiring for up to two contact blocks across.
- Compact size, only 45.6mm (1-51/64") deep from the front of the panel.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

- Our rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments, even in high ambient temperatures.
- Our lenses feature a diffuser insert that provides outstanding light output from all angles, along with a thin O-ring which provides a watertight seal to meet Type 4/4X standards.
- Multi-Voltage and Full Voltage light units available in a wide range of voltages to meet your specific needs.

Flush/Flush

Extended/Flush

Flush/Extended

22MM IEC MOMENTARY ILLUMINATED DUAL PUSH BUTTONS

Our 22mm IEC Momentary Illuminated Dual Push Buttons are designed to operate independently of each other. The Dual Push Button design gives you the flexibility to mount two push buttons and one indicating light into one 22.5mm hole, allowing you to perform multiple operations from one device. These push buttons are great for motor and pump applications. Contact blocks can be stacked up to 2 deep and 2 across for a total of 4 circuits per operator. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- The Dual Push Button design incorporates all the features and advantages of the Series 22 IEC products.
- In addition to the two push buttons, an indicating light can be mounted between the two push buttons.
- Available state-of-the-art non-relampable multi-voltage light module with super-bright LED can be operated at any voltage from 20V to 277V AC or DC.
- Full voltage light modules use miniature bayonet base lamps to provide reliable lamp secureness.
- c3controls LED lamp design life is 100,000 hours – that's 11.4 years!
- Removable latching device allows for easy installation and wiring of contact blocks.
- A non-illuminated version is also available, see pages 8 & 9.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

Labor & Cost Savings

Combine the functionality of replacing up to three devices in one 22.5mm (7/8") hole—saving time, labor and space!

Environmentally Secure

The seal acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X and IP66 without a rubber boot.

Wide Range of Operation

Full Voltage and Non-Relampable Multi-Voltage light units are available in a variety of voltages to meet your specific needs.

(USE CHART VIII FROM ABOVE)

The Push-Pull Illuminated devices are available in three basic styles. The two position push-pull is maintained in both the push and pull positions. The primary application is “push” to “stop” and “pull” to “start”. The three position has two options. One features the “out” position as momentary, the “center” as maintained, and the “in” position as maintained. The other version features the “center” as maintained while the “out” and “in” positions are momentary.

22mm IEC MAINTAINED ILLUMINATED PUSH BUTTONS

Our 22mm IEC Maintained Illuminated 2 & 3-Position Push Buttons feature contact blocks that are stackable up to 2 deep and 2 across for a total of 4 circuits per operator, depending on your light unit module. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Available state-of-the-art non-relampable multi-voltage light modules with super-bright LEDs can be operated at any voltage from 20V to 277V AC or DC.
- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Wide variety of operator types and colors, and contact block configurations are available to meet your specific application needs.
- Full voltage light modules use miniature bayonet base lamps to provide reliable lamp secureness.
- c3controls LED lamp design life is 100,000 hours – that's 11.4 years!
- Removable latching device allows for easy installation and wiring.
- Compact size, only 45.6mm (1-57/64") deep from the front of the panel.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

22mm IEC PILOT DEVICES

UNIQUE PRODUCT FEATURES

WE PUT THE METAL ON THE INSIDE—WHERE IT COUNTS!

- The solid brass detent mechanism is the best engineered, most reliable heavy-duty emergency stop button in the world. This rugged design ensures reliable operation in emergency applications, providing safe interruption of circuits, and much longer life when compared to any competitor's product.
- Rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments – even high ambient temperatures.
- Our 22mm IEC Illuminated Push Buttons can be utilized with our state-of-the-art super bright LED multi-voltage light modules.

22MM IEC MAINTAINED ILLUMINATED EMERGENCY STOP PUSH BUTTONS

Our 22mm IEC Maintained Illuminated Push-Twist Release Push Buttons rugged design ensures reliable operation in emergency stop applications, providing safe interruption of circuits. The operators provide a trigger action function with direct drive contacts meeting global standards for emergency stop buttons. Contact blocks can be stacked up to 2 deep and 2 across for a total of 4 circuits per operator. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Meets global standards for Emergency Stop buttons.
- A non-Illuminated version is also available, see pages 14 & 15.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.
- Available state-of-the-art non-relampable multi-voltage light module with super-bright LED can be operated at any voltage from 20V to 277V AC or DC.

UNIQUE PRODUCT FEATURES

ERGONOMICALLY DESIGNED

Cone shaped head with knurls fit easily into your hand for a comfortable operation.

EASE OF VISIBILITY

Molded bold white arrows indicate the 45° twist-to-release operation for easy visibility over the life of the product.

EN418 EMERGENCY STOP OPERATORS

c3controls maintained illuminated push-twist-release operators were designed to meet EN418 Standards for "Safety of Machinery." Constructing an EN418 Emergency Stop Push Button from our standard operators is easy—simply select a red mushroom cap with a yellow housing.

- Ergonomically designed red mushroom cap (40mm (1-9/16")) with white arrows for quick identification and ease of control.
- Trigger Action Function—Operator requires dedicated push action to operate contacts, eliminating accidental operation and meeting global standards.
- Latching mechanism which is activated when the actuator of the device is depressed to a certain point and the contacts open.
- The anti-teasing function guarantees the contacts will remain open until a person manually intervenes and releases the actuator.
- The direct drive design mechanically links the mushroom cap operator and contacts to drive the electrical contacts open. The trigger action makes the Emergency Stop operator more than a push button.
- Red operator, yellow housing, and molded white directional arrows are all designed to meet global standards for Emergency Stop operators.
- Illuminated constructions available in full voltage and state-of-the-art non-relampable multi-voltage light module with super bright LED can be operated at any voltage from 20V to 277V AC or DC.

22MM IEC POTENTIOMETERS

Our single-turn Potentiometer Operators utilize standard 2 watt potentiometers with 6.4mm (1/4") bushing and 22.5mm (7/8") long slotted shafts. A 5/64" allen wrench is required for installation. All c3controls 22mm operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Three point terminal block and hardware.
- Single-turn standard 2 watt potentiometer.
- All frictional parts are molded with an internal self-lubricant to provide outstanding wear without troublesome greases used by others that attracts dust and other particles in the area.
- Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight.
- #6 terminal screws with self-lifting captive wire clamps accommodate 0.5 ~ 4mm² (#22 ~ two #12 AWG) wires per terminal.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units.

LEGEND PLATES FOR POTENTIOMETER OPERATORS are available for same day shipping. See pages 41-43 for complete selection.

22MM IEC UNIBODY RELAMPABLE PILOT LIGHTS

Our 22mm IEC Unibody Pilot Lights were designed with simplicity in function to save you valuable time and money. This full voltage light unit is available in 12, 24 and 120 volts using either Incandescent or our LED lamps with leakage protection. We offer five different lens color options to add to your flexibility. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Vibration resistant compact design.
- Our seal is infused with a coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. This seal also acts as a light reflector because it is white which increases light output and improves visibility from all angles.
- Our rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments, even in high ambient temperatures.
- Wiring is made easy by utilizing rear access captive mounting screws with side wire entry.
- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

22MM IEC UNIBODY NON-RELAMPABLE PILOT LIGHTS

Our 22mm IEC Non-Relampable Unibody Pilot Lights were designed with simplicity in function to save you valuable time and money. This full voltage light features integral LED lamps that provide great light output and leakage protection. Available in a variety of full voltage options and six lens color options. Wiring is made easy by utilizing rear access captive mounting screws with side wire entry. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13, IP66 and IP67 applications, and meet global standards requirements.

Product features include:

- Wider range of operation; from 12V to 240V.
- Shortest depth behind the panel 22mm IEC unibody pilot light by over 6mm (1/4") to allow mounting in shallow enclosures.
- High-tech integral LED lamps offer the latest and most current technology providing leakage protection, great light output and increased visibility from side views—and lasts up to 100,000 hours!
- Vibration resistant compact, low power consumption energy saving design.
- AC and DC devices are bi-polar design, functionality is independent of which lead is connected to each terminal.
- Rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments—even in high ambient temperatures.
- IP20 guarded terminals prevent accidental contact with live parts.
- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Terminal screws with self-lifting captive wire clamps accommodate 0.5 ~ 4mm² (#22 ~ two #12 AWG) wires per terminal.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

Exclusive!**

ELIMINATE THE HEADACHE OF MATCHING SPECIFIC LAMPS WITH SPECIFIC LIGHT UNITS!

Our state-of-the-art Non-Relampable Multi-Voltage Light Modules come with our super-bright white LEDs and can be operated from 20V to 277V AC or DC without losing light intensity – making them easily interchangeable between your applications and saving you inventory costs.

The compact design saves you valuable space in your control panel—delivering the shortest depth light modules engineered in the USA.

- Low power consumption energy saving design.
- Multi-voltage module can be used with modular pilot lights, illuminated push buttons, push-to-test lights, and illuminated selector switches.
- Bi-polar design, functionality is independent of which lead is connected to each terminal.
- When used with our illuminated pilot devices, our rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments, even high ambient temperatures.
- When used with our illuminated pilot devices, our seal is infused with a coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. This seal also acts as a light reflector because it is white which increases light output and improves visibility from all angles.
- Heavy-duty polyester construction for excellent durability, superior corrosion resistance, moisture rejection, and electrical insulation.
- Captive IP20 guarded terminals to prevent accidental contact with live parts.

Enhanced visibility achieved in combination with the Lexan™ lens and seal available on all c3controls illuminated pilot devices.

IT'S EASY TO BUILD YOUR OWN PILOT LIGHT

Simply pick the code number from each of the sections below and combine them to build your part number.

Modular Pilot Lights

22MM IEC MODULAR & PUSH-TO-TEST PILOT LIGHTS

Our 22mm IEC Modular and Push-To-Test Pilot Lights are designed to offer flexibility by offering light units in Multi-Voltage and Full Voltage packages, all available in a wide range of voltages. The modules meet IP20 standards for finger-safe terminations. Wiring is made easy by utilizing self-lifting captive terminal screws that accommodate 0.5 ~ 4mm²(#22 ~ #12 AWG) wires (one or two wires per terminal). All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.
- Full voltage light modules use miniature bayonet base lamps to provide reliable lamp secureness.
- c3controls LED lamp design life is 100,000 hours – that's 11.4 years!

UNIQUE PRODUCT FEATURES

- Compact, thin design is also vibration resistant.
- Multi-Voltage and Full Voltage light units available in a wide range of voltages.
- Heavy duty polyester construction for excellent durability and corrosion resistance.
- Our seal is infused with a coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. This seal also acts as a light reflector because it is white which increases light output and improves visibility from all angles.
- Our rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments, even in high ambient temperatures.
- State-of-the-art non-relampable multi-voltage light modules with super-bright LEDs can be operated at any voltage from 20V to 277V AC or DC.

22MM IEC ILLUMINATED SELECTOR SWITCHES

c3controls Illuminated Selector Switches utilize multi-voltage and full voltage light units that come standard in a wide range of voltages. Our LED lamps offer long life, outstanding light output, and leakage protection. Using an illuminated selector switch can free up valuable space on a control panel by eliminating the need for an additional pilot light. Additionally, our illuminated handles are available in two styles and four different colors.

Our one cam and proper contact block sequence can perform the same functions as it takes for up to seven cams from our competitors units. Add our snap-on contact blocks and you can control up to four different circuits with just one selector switch. All c3controls 22mm IEC operators are UL Listed and CE marked and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12, 13 and IP66 applications, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Compact size, only 45.6mm (1-51/64") deep from the front of the panel.
- Our rugged Lexan™ lenses provide better visibility and can resist high impact for reliable performance in most environments, even in high ambient temperatures.
- c3controls LED lamp design life is 100,000 hours—that's 11.4 years!
- Removable latching device allows for easy installation and wiring.
- Modular contact blocks use M3.5 plated captive steel terminal screws with self-lifting captive wire clamps that accommodate 0.5 ~ 4mm² (#22 ~ #12 AWG) wires (one or two wires per terminal) and have IP20 guarded terminals to prevent accidental contact with live parts.
- Operators conveniently mount in a round 22.5mm (7/8") hole that is directly interchangeable with competitors units and eliminates the labor required for notching.

UNIQUE PRODUCT FEATURES

SAVE TIME & MONEY - WITH c3CONTROLS, ONE CAM DOES IT ALL!

- One-Cam does it all vs. our competitors who need up to seven cams to perform the same function. This One-Cam design eliminates the need for multiple cam configurations and selector switch configuration nightmares, saving time, inventory, money, and ensuring 100% cam selection configuration accuracy.
- Multi-Voltage and Full Voltage light units available in a wide range of voltages.
- Compact, thin design for fitting into tight spaces.

57	ON		OFF	\$ 5.00
61	START		STOP	\$ 5.00
72	UP		DOWN	\$ 5.00
83	HAND	OFF	AUTO	\$ 5.00

NOTE: *Legend plates are standard 1-3/4" x 1-3/4" (h x w) and face color is black with white letters (uppercase) unless otherwise specified. Consult factory for details.

**Top and bottom text location for Dual Push Buttons only.

***The 04R Emergency Stop legend plate, for use with a 1 position enclosure only, is round 2-13/32" diameter and face color is yellow with black letters (uppercase).

22MM IEC COMPACT CONTROL STATIONS – POLYCARBONATE

Our 22mm IEC Compact Control Stations feature polycarbonate construction for superior corrosion resistance, moisture rejection, UV resistance, electrical insulation and high-impact resistance. A variety of pilot devices are available, including non-illuminated and illuminated push buttons, emergency stop push buttons, momentary dual push buttons (flush green and extended red), maintained selector switches (2- and 3-position), and pilot lights for operation and indication. Designed for the most severe outdoor conditions, enclosures are suitable for use in equipment with vibration, frequent wash-down and varying temperatures from -40 to +55° C.

Product Features

- Factory assembly of our 22mm IEC Compact Control Stations provide the convenience of a single catalog number, no assembly required, shorter control panel bill of materials, and easier inventory management.
- Contact blocks available up to one deep and three across providing multiple circuits in a compact space.
- Our compact, high performance, polycarbonate enclosures are UL Listed and are rated for Type 1, 2, 3, 3R, 4/4X, 12, 13 and IP66, making them suitable for the most demanding applications – including wash-downs and corrosive environments.
- Manufactured with all stainless steel hardware including #8 thread form screws, ensuring 100% reliability in corrosive environments.
- For easy installation, the enclosure has two lateral M20 conduit entries and two base conduit entries.
- Enclosure cover is keyed for enhanced safety and to prevent misalignment during installation.
- Screw cover accessory, included as standard, prevents debris build-up.

UNIQUE PRODUCT FEATURES

DESIGNED WITH SEAMLESS COMPATIBILITY IN MIND!

1. The compact design of our polycarbonate enclosure is a custom fit specifically optimized for use with our 22mm IEC pilot and signaling devices—leading the industry with the shortest depth behind the panel.
2. All c3controls 22mm IEC pilot and signaling devices, including illuminated options with up to three contact blocks, are compatible for factory assembly and installation with our new polycarbonate enclosure. See page 40 for details.
3. The panel gasket provides an environmentally secure fit—creating a squeegee effect and forming a permanent watertight seal that provides Type 4/4X and IP66 ingress protection.

POLYCARBONATE ENCLOSURES

Polycarbonate Enclosures – Optimized for use with 22mm IEC Pilot and Signaling Devices

POLYCARBONATE ENCLOSURE CONFIGURATION

CODE	# OF HOLES	FRAME DIMENSIONS (H x W x D) (2-61/64" x 3-5/32" x 2-1/4")	COLOR	LIST
ECP1-A22H1	1	75mm x 80mm x 57mm (2-61/64" x 3-5/32" x 2-1/4")	Grey	\$22.50
ECP1-A22H1Y	1	75mm x 80mm x 57mm (2-61/64" x 3-5/32" x 2-1/4")	Yellow	\$22.50
ECP1-B22H2	2	119mm x 80mm x 57mm (4-11/16" x 3-5/32" x 2-1/4")	Grey	\$30.50
ECP1-C22H3	3	163mm x 80mm x 57mm (6-27/64" x 3-5/32" x 2-1/4")	Grey	\$39.00

CONSTRUCTION

- Rugged Polycarbonate construction, lightweight with high impact resistance.
- UV and corrosion resistant.
- Stainless steel hardware including #8 thread form screws.
- Enclosure cover is keyed for enhanced safety and to prevent misalignment during installation.
- Screw cover accessory, included as standard, to prevent debris build-up.
- For easy installation, the enclosure has two (2) lateral M20 conduit entries and two (2) base conduit entries.
- Standard colors: Grey and Yellow
- Available as fully-assembled control stations, see pages 37-39.

RATINGS / APPROVALS

- UL Listed Type 1, 2, 3, 3R, 4/4X, 12, 13
- IP66 protection
- Operating temperatures from -40 to +55° C (-40 to +131° F)

ENDLESS POSSIBILITIES

The compact design of our Polycarbonate Enclosure is a custom fit optimized for use with our 22mm IEC pilot and signaling devices—leading the industry with the shortest depth behind the panel.

We offer the option to configure and assemble the control station for you, under a single catalog number. Your control station will arrive factory assembled providing a shorter bill of material, reducing installation time, simplifying inventory management, and ultimately reducing cost.

Ordering a custom assembled compact control station is easy. Either choose from our already pre-configured assemblies on pages 37-39 or,

- Simply choose your enclosure frame size and number of holes, see options above.
- Select your operator(s) from our line of 22mm IEC pilot and signaling devices, see pages 6-36.
- Select your legend plate style, color, and designation, see page 41.
- Contact the c3controls factory to complete your order.
- Custom assembled compact control stations are not available for guaranteed same-day shipping—ships within 3 days.

MOUNTING FOOT KIT

Field installable mounting foot kit enables enclosure to be panel mounted and includes mounting feet and screws.

WORLD TOWER LIGHTS

When you need reliable, high quality tower lights for all your signaling needs, look to c3controls. Our Series WTL World Tower Lights feature a 50mm (1-31/32") diameter space saving design that is stackable to allow up to five (5) modules in a single assembly. Easy to assemble and disassemble with low power consumption integrated LEDs—no complicated center posts. c3controls Series WTL World Tower Lights will help reduce your total installed costs and enhance the features and performance of your equipment.

PROVEN

cULus Listed and CE marked meeting global standards requirements, our world tower lights are suitable for use anywhere in the world. All c3controls products are compliant to the RoHS directives.

Visit www.c3controls.com to download product certifications.

WORLD TOWER LIGHTS

All our products are fully certified, rated, and backed by our limited lifetime warranty to meet the needs of the machine builder, and our World Tower Lights are no exception. Check out the incredible features in the chart below!

PROVIDING ACCURATE VISUAL AND AUDIBLE STATUS INDICATION.

✓ Proven	Our Tower Lights are UL Listed and CE marked meeting global standards requirements and even more stringent internal test requirements like shock and vibration. 
✓ Wide Range of Operation	Available in 24V AC/DC, 120V AC, and 240V AC.
✓ Environmentally Secure	Rated Type 1, 2, 3, 3R, 4/4X, 12, 13 and IP65 for watertight and corrosion resistance.
✓ Simple Customization	Lenses are available in five colors as well as the option of clear lenses and integrated color LEDs for a clean, modern look. Three styles of module illumination are available: continuous, flashing and rotary.
✓ Consistent Visibility	c3controls selects the highest quality raw materials to ensure our products outlast the competition, including Lexan™ plastic for our lenses—improving visibility and resistance to high impact for reliable performance, even in high ambient temperatures.
✓ Energy Savings	Our low power consumption sound modules are available in continuous or intermittent with 80dB or 100dB output, and our LED lamps last 100,000 hours—that's 11.4 years!
✓ Heavy-Duty	Heavy-duty polycarbonate construction for excellent durability, impact resistance, superior corrosion resistance, moisture rejection and electrical insulation.
✓ Modular Design	Stackable design to allow up to five (5) modules in a single assembly.
✓ Durable Bases	Polycarbonate mounting bases are available in three versions: Our 50mm direct-mount base eliminates the need for drilling and reduces installation. The 50mm short and tall bases secure to the panel utilizing a 4-hole mounting pattern. Vertical mounting with tall and short bases is also available.
✓ Convenient	Tower light assemblies provide convenience of a single catalog number.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“c3controls pre-assembled tower lights save installation time for our engineers and technicians, lowering our costs. Switching our tower lights over to c3controls was a great decision—we have reduced time spent on the floor and significantly improved our profitability.”

Paolo Bruschi, Engineering Manager • **Cosmos Electronic Machine Corp.**

LED Light Modules

Sound Modules

Vertical Mount Base

Short Base

Tall Base

Direct-Mount Base

**UNIQUE PRODUCT LINE FEATURES****EASY ASSEMBLY AND MAINTENANCE**

No tools required—simply line up the module marking and arrow and turn; 25° clockwise to tighten and 25° counter clockwise to loosen.

QUICK AND EASY WIRING

Wiring is made simple with our integrated heavy-duty polycarbonate bases. No complicated center post required for construction—just wire to the terminals.

PRE-ASSEMBLED LIGHTS

Tower lights are shipped pre-assembled, providing convenience of a single catalog number, reducing time spent on the floor and improving profitability.

MOUNTING OPTIONS

Polycarbonate mounting bases are available in three versions: Our 50mm direct-mount base eliminates the need for drilling and reduces installation. The 50mm short and tall bases secure to the panel utilizing a 4-hole mounting pattern. Vertical mounting with tall and short bases is also available.

FIELD SELECTABLE DECIBEL LEVEL

Our low power consumption sound modules offer increased tone and are available in continuous or intermittent with field selectable 80dB or 100dB sound output at 1 meter.

MODERN DESIGN

Our clear lenses are available with five LED color options. The bold illumination of the colored LEDs eliminates the need for colored lenses.

IT'S EASY TO BUILD YOUR OWN TOWER LIGHT

Simply pick the code number from each of the sections below and combine them to build your part number.

World Tower Lights

WTL - 50 -

I II III IV V* VI* VII* VIII* IX*

Example: To build one of our most popular Tower Lights, the part number would be **WTL + 50 + III + IV + V + VI + VII + VIII + IX** or **WTL-50P1-DDGDADR**

*NOTE: Light and Sound Modules will be assembled vertically starting at the base. Sound Modules must be stacked in the last position and only one is allowed per assembly.

MIX AND MATCH ANY COLOR LIGHT MODULE AND SOUND MODULE

WORLD TOWER LIGHTS

c3controls World Tower Lights with super bright integrated LEDs are a reliable source for all your signaling needs. Available in 24V AC/DC, 120V AC, and 240V AC. Five (5) color lenses and LEDs are available with three styles of module illumination; continuous, flashing, and rotary. Continuous and intermittent sound modules available in 80dB or 100dB output. All c3controls 50mm diameter Tower Lights are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, tower light assemblies are also listed for Type 1, 2, 3, 3R, 12 and 13, and IP65 for ingress protection.

UNIQUE PRODUCT FEATURES

INTEGRATED TOWER LIGHTS FOR EASY ASSEMBLY AND MAINTENANCE

1. Stackable design to allow up to five modules in a single assembly.
2. Heavy duty polycarbonate construction for excellent durability, impact resistance, superior corrosion resistance, moisture rejection and electrical insulation.
3. Rugged polycarbonate lenses provide better visibility and can resist high impact for reliable performance in most environments, even in high ambient temperatures.
4. Easy maintenance and assembly—simply line up the module marking and arrow and turn; 25° clockwise to tighten and 25° counter clockwise to loosen.
5. Continuous, flashing and rotary integrated LED light modules available—low power consumption for energy savings.
6. Available continuous or intermittent sound modules with 80dB or 100dB output.
7. Each module features a watertight seal that meets Type 4/4X standards.
8. Wiring is made simple with our integrated heavy-duty polycarbonate bases, available in 3 heights: direct-mount, short base and tall base. The short and tall bases may be used with the vertical mount base for more mounting options. No complicated center post required for construction—just wire to the terminals.
9. Mounts to panel utilizing a four hole mounting pattern [38mm (1-1/2")].
10. Rated Type 1, 2, 3, 3R, 4/4X, 12 and 13, and IP65 for ingress protection.

CAM SWITCHES

Looking for cam-operated rotary switches for On/Off, Changeover, Ammeter, Voltmeter and Motor-Reversing control and load break applications? c3controls has a full line of reliable switches featuring modular operating handles that can be mixed-and-matched with any switch. A very broad product offering that is easy to install.

CAM SWITCHES

c3controls offers a comprehensive line of Cam Switches, just one example of our superior products designed and manufactured to meet the needs of the machine builder. Check out all the features of our Series CS below!

ENGINEERED TO PERFORM AND SAVE VALUABLE INSTALLATION TIME.

✓ Proven	Our cam switch operators meet UL, CSA, and IEC standards requirements making them suitable for use in global applications.   
✓ Simple Customization	Round operator without front plate is available for use with standard and custom legend plates for simple and convenient customization.
✓ Fast Wiring	Combination head terminal screws which include captive terminal clamps and our clearly marked terminals make wiring fast and easy.
✓ Multiple Variations	Available in 45°, 60°, and 90° switching angles, and up to 6 positions for multiple variations.
✓ Variety of Applications	Rated from 10A to 32A up to 690V AC with various operator types, including key lock, lever, and lockable lever for use in all your applications.
✓ Heavy-Duty	High-grade engineering plastics like nylon, celcon, and glass filled polyamide provide outstanding mechanical strength and electrical insulating properties.
✓ Clear Markings	Markings are integral to the front plate and protected so they won't wear off over time.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the operators for easy reference during installation.
✓ Convenient	Cam switches offer the convenience of a single part number, making it easy to find what you need.
✓ Advanced Safety	Switches are available with IP20 guarded terminals to protect against accidental contact with live parts.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“We at Mahlkuch Electric have used c3controls since 2006 and c3controls products haven't let us down yet. We get great customer support, product delivered when we need them, and all for a fair price. Plus, because we've never had an in-field failure with their products, we never have to worry about middle of the night service calls. Thanks for helping this contractor sleep a little easier at night.”

Jeff Mahlkuch, Owner • **Mahlkuch Electric, LLC**

Changeover

Ammeter/Voltmeter

Motor Reversing

UNIQUE PRODUCT LINE FEATURES

REDUCED INVENTORY

A wide variety of operators can be "mixed-and-matched" with different switch types to reduce inventory requirements and customize the switch appearance.

EASY INSTALLATION

Operators mount in a standard 22.5mm hole. The latching mechanism allows the switch to be easily wired outside the control panel and then securely installed on the mounted operator.

PADLOCKABLE SWITCH

Operators can be locked OFF with a padlock or key switch to prevent unauthorized operation of switch.

MANUAL MOTOR CONTROLLERS

Certified as Manual Motor Controllers per UL standards requirements.

CAM SWITCH OPTIONS.

CAM SWITCHES

c3controls compact, easy to install On-Off, Changeover, Ammeter, Voltmeter, and Motor Reversing Cam Switches are available with up to 6 positions and up to 6 poles — a solution for almost any control and load break switch application. They are certified as Manual Motor Controllers per UL standards. Our maintained operators share the same ratings with the addition of the 4/4X rating. All switches are suitable for global applications having met UL, CSA, and IEC standards. c3controls goes the extra step to make sure that our products outlast the competition.

Product features include:

- Rated from 10A to 32A up to 690V AC.
- Available in 60° and 90° switching angles.
- Operators and switches conveniently install in a standard, round 22.5mm (7/8") mounting hole that is directly interchangeable with commonly available pilot devices and other control and load break switches.
- Round operator without front plate is available for use with standard and custom legend plates.
- Front plates are available in two different sizes; 32mm x 32mm and 48mm x 48mm, and come in yellow, grey, black or aluminum.

UNIQUE PRODUCT FEATURES

Cam design provides "Quick-Make — Slow-Break" operation with built-in latching. Two double-break, positive drive to open silver alloy contacts per stage provide long electrical life.

1. High-grade engineering plastics like nylon, celcon, and glass filled polyamide provide outstanding mechanical strength and long life with excellent electrical insulating properties.
2. The simple latching mechanism securely assembles the switch with the operator — the switch can be easily and conveniently wired outside the confined space of the control panel, and then installed on the operator that has already been mounted.
3. A wide variety of operators can be "mixed-and-matched" with different switch types to reduce inventory requirements and customize the switch appearance for every application.
4. Operators can be locked OFF with a padlock or key switch to prevent operation of the switch.
5. Markings are integral to the front plate and protected so they won't wear off over time.
6. IP20 guarded terminals to protect against accidental contact with live parts.
7. Combination head terminal screws include captive terminal clamps for ease of wiring.
8. Clearly marked terminals make wiring fast and easy.

22MM NEMA PILOT DEVICES

c3controls' durable line of 22mm NEMA devices are for all those tight fitting places. Our non-illuminated momentary and maintained push buttons, pilot lights and selector switches are compact and ready for field wiring in almost any environment. This is the most rugged 22mm pilot device product line in the world!

22MM NEMA PILOT DEVICES

Every c3controls product is designed and manufactured to meet the needs of the machine builder, including our comprehensive line of 22mm NEMA Pilot Devices. Check out all the features of our Series 22 NEMA below!

DELIVERING THE MOST RUGGED 22MM NEMA DEVICES IN THE INDUSTRY.

✓ Proven	Our 22mm NEMA operators are UL Listed, CSA Certified and CE marked meeting global standards requirements.    
✓ Simple Customization	Our light modules come with various lens color options for appropriate operator interface and LED lamps with leakage protection.
✓ Rugged Design	Optional polyester or aluminum clamps rings with coarse 16 pitch threads for quick and easy utilization that won't cross thread or strip.
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the contact blocks for easy reference during installation.
✓ Heavy Duty	Polyester construction provides superior durability, corrosion resistance, moisture rejection and electrical insulation.
✓ Flexible	Our "Add-On" Contact Blocks can be added to the basic operator to increase the number and type of contacts. Up to 3 blocks with 2 circuits each may be added, giving a total of 8 contacts per operator.
✓ Convenient	Reduce inventory with our interchangeable modular design, providing endless options for appropriate operator interface.
✓ Environmentally Secure	With 4/4X and IP65 ratings, our 22mm line of Pilot Devices are built to last and withstand dust, corrosion, ice, and rain.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“

Our circulation equipment is exposed to elements ranging from extreme heat and humidity, to rain, to freezing snow and ice. Therefore we chose c3controls to provide durable, reliable NEMA 4X switches for our machines.

Selector Switch

UNIQUE PRODUCT LINE FEATURES

COMPACT DESIGN

Our compact, thin pilot devices are designed with up to two integral circuits. Additional contact blocks are available.

METAL ON THE INSIDE

c3controls Maintained Push Buttons contain a solid brass detent mechanism ensuring reliable operation in emergency stop applications, and providing safe interruption of circuits and longer life.

ONE CAM DESIGN

Our single cam design eliminates the need for multiple cam and selector switch configurations, reducing inventory and saves you labor time and costs.

INTERNAL SELF-LUBRICANT & U-CUP SEAL

All frictional parts are molded with an internal self-lubricant to provide outstanding wear without troublesome greases used by others.

Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions and keeps water, oils, and dust away from the contact blocks.

ASME A17.1 COMPLIANT

Our Emergency Stop Button meets ASME A17.1 standards for safety and functionality in elevator car and pit applications, and features a permanently marked STOP and indication of both STOP and RUN positions.

RUBBER BOOTS

Our state-of-the-art rubber boots protect both the operators and the circuits behind them from harsh chemicals and climates. They feature a built-in clamp ring that is molded with Neoprene and has been modified to provide added pliability and protection against dust, freezing and thawing environments.

22MM NEMA MOMENTARY NON-ILLUMINATED PUSH BUTTONS

c3controls goes the extra step to make sure that our products outlast the competition. Our 22mm NEMA Momentary Non-Illuminated Push Buttons are durable and flexible for a variety of uses. All c3controls 22mm NEMA operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Octagonal polyester or polished aluminum clamp rings.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 7/8" (22.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.
- A600 (7,200 VA Make and 720 VA Break), 600V AC Maximum, Maximum Continuous Thermal Current, Ith: 10A
- P300 (138 VA Make and 138 VA Break), 250V DC Maximum, Maximum Continuous Thermal Current, Ith: 5A

22MM NEMA PILOT DEVICES

UNIQUE PRODUCT FEATURES

1. Compact, thin design comes with integral circuits for field wiring.
2. Our push buttons modular design provides endless options for appropriate operator interface by alternating cap types and colors which ultimately will save you time and money by reducing your inventory.
3. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. This U-cup seal also acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X with or without a rubber boot.

AVAILABLE CAP COLORS AND MARKINGS

22MM NEMA MAINTAINED NON-ILLUMINATED PUSH BUTTONS

Our 22mm NEMA line of Maintained Non-Illuminated Push Buttons feature a compact, thin design for tight fitting spaces and come with integral circuits for field wiring. Contact blocks are available to add to basic operators to increase the number and type of contacts. Up to three blocks deep with two circuits each may be added giving a total of eight contacts per operator. Blocks simply screw on the back of the operator. Refer to page 15 for add-on contact blocks. All c3controls 22mm NEMA operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Additionally, our permanently inscribed Push Buttons comply with ASME A17.1 standards, a critical requirement for the elevator industry, establishing the Emergency Stop Switch as a crucial safety device rather than merely an accessory. Adhering to ASME regulations, it features stamped Mushroom cap with "PUSH TO STOP PULL TO RUN" functionality to meet all safety protocols.

UNIQUE PRODUCT FEATURES

WE PUT THE METAL ON THE INSIDE — WHERE IT COUNTS!

c3controls Maintained Push Buttons contain a solid brass detent mechanism and are the best-engineered, most reliable heavy-duty Emergency Stop in the world. This rugged design, which is available with either polyester or aluminum clamp rings, ensures reliable operation in emergency applications, providing safe interruption of circuits, and much longer life when compared to any competitor's product.

ASME COMPLIANT ELEVATOR EMERGENCY PUSH BUTTON

Designed to enhance safety and compliance, this advanced variation of our 22mm NEMA 2-Position Maintained Non-Illuminated Button features a permanently marked "PUSH TO STOP PULL TO RUN" red mushroom cap, adhering to ASME A17.1 - 2022 Section 3.10.4 (O). This section of the ASME Standard mandates a maintained open and close style emergency stop button with a red button or cap, clearly marked to indicate "STOP" and "RUN" positions.

Key features include:

- **Permanent Marking:** The red mushroom cap is clearly and permanently marked with "PUSH TO STOP PULL TO RUN".
- **Compliance:** Meets ASME A17.1 standards for safety and functionality in elevator car and pit applications with permanently marked "STOP" and indication of both "STOP" and "RUN" positions.
- **Audible Alarm Integration:** Easily connect / integrate to an audible alarm using convenient contact blocks, enhancing emergency alerts and ensuring immediate notification.

For those interested in customizing or permanently marking other devices, please contact your c3controls sales representative or our customer first team.

U-CUP SEAL

Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. This U-cup seal also acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X.

22MM NEMA MOMENTARY ILLUMINATED PUSH BUTTONS

c3controls goes the extra step to make sure that our products outlast the competition. Our 22mm NEMA Momentary Illuminated Push Buttons are durable and flexible for a variety of uses. All c3controls 22mm NEMA operators are UL Listed and are rated Type 4/4X standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Polyester or polished aluminum clamp rings.
- Full voltage lights incorporate a unique insulated socket design to minimize accidental contact during lamp change.
- All lights use miniature bayonet base lamps to provide reliable lamp secureness.
- Our LED lamps with leakage protection last 100,000 hours that's — 11.4 years!
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 7/8" (22.5mm) hole that is directly interchangeable with competitors units.

UNIQUE PRODUCT FEATURES

NOTE: Gold plated contacts are available on standard 30mm blocks for dry circuit applications. See Section 13 Pages 4 & 5 for details.

1. Vibration resistant snap-on assembly 30mm contact blocks simplify installation. See Section 13 Pages 4 & 5 for information on 30mm contact blocks.
2. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight. The U-Cup seal rides easily along the stroker and keeps water, oils, dust and other corrosive particles in the air away from the contact blocks. This U-cup seal also acts like a squeegee and forms a permanent watertight seal that meets Type 4/4X standards.

AVAILABLE LENS COLORS FOR PILOT LIGHTS

22MM NEMA PILOT LIGHTS

Our 22mm NEMA Pilot Lights and Illuminated Push-To-Test Pilot Lights, when utilized with our LED lamps, provide leakage protection, long-lasting life and high quality with tremendous resistance to shock and vibration. Our reflection technology and state-of-the-art LED lamps improve visibility from all angles. c3controls LED lamps last 100,000 hours — *that's 11.4 years!* Combine these LEDs with our full voltage or resistor packages for optimum durability. All c3controls 22mm NEMA operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

IT'S EASY TO BUILD YOUR OWN PILOT LIGHT

Simply pick the code number from each of the sections below and combine them to build your part number.

22MM NEMA Non-ILLUMINATED SELECTOR SWITCHES

With our unique universal cam design, c3controls 22mm NEMA Selector Switches offer multiple functions in a single device eliminating the need to install separate devices to perform individual functions based on contact block configuration. All operators feature polyester housings, are UL Listed, and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Octagonal polyester or polished aluminum clamp rings.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires(0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 7/8" (22.5mm) hole that is directly interchangeable with competitors units and eliminates the labor required for notching.
- A600 (7,200 VA Make and 720 VA Break), 600V AC Maximum, Maximum Continuous Thermal Current, Ith: 10A
- P300 (138 VA Make and 138 VA Break), 250V DC Maximum, Maximum Continuous Thermal Current, Ith: 5A

UNIQUE PRODUCT FEATURES

SAVE TIME & MONEY - WITH c3CONTROLS, ONE CAM DOES IT ALL!

1. One-Cam does it all vs. our competitors who need up to fifteen cams to perform the same function. This One-Cam design eliminates the need for multiple cam configurations and selector switch configuration nightmares, saving time, inventory, money, and ensuring 100% cam selection configuration accuracy.
2. Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to conditions such as heat, dryness and sunlight.
3. All frictional parts are molded with an internal self-lubricant to provide outstanding wear and smooth cam operations without troublesome greases used by others that attracts dust and other particles in the area.

SEE PAGE 22 FOR WIRING DIAGRAM.

UNIQUE PRODUCT FEATURES

Our single-turn Potentiometer Operators utilize standard 2 watt potentiometers with 1/4" (6.4mm) bushing and 7/8" (22.5mm) long slotted shafts. 5/64" allen wrench is required for installation. All c3controls 22mm NEMA operators are UL Listed and are rated Type 4/4X standard for watertight and corrosion resistance. In addition, operators are also listed for Type 1, 2, 3, 3R, 12 and 13, and meet global standards requirements.

Product features include:

- Polyester construction for superior corrosion resistance, moisture rejection and electrical insulation.
- Three point terminal block and hardware.
- Single-turn standard 2 watt potentiometer.
- All frictional parts are molded with an internal self-lubricant to provide outstanding wear without troublesome greases used by others that attracts dust and other particles in the area.
- Our revolutionary U-Cup seal is infused with a Teflon coating to eliminate cracking when exposed to harsh conditions such as heat, dryness and sunlight.
- #6 terminal screws with self-lifting captive wire clamps accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal.
- Operators conveniently mount in a round 7/8" (22.5mm) hole that is directly interchangeable with competitors units.

LEGEND PLATES FOR POTENTIOMETER OPERATORS are available for same day shipping. See pages 17 & 18 for complete selection.

ADD-ON CONTACT BLOCKS

Our "Add-On" Contact Blocks can be added to basic operators to increase the number and type of contacts. Up to three blocks with two circuits each may be added giving a total of eight contacts per operator. Blocks simply screw on the back of the operator. NOTE: The first two contacts must be ordered in operator base.

With our "Add-On" Contact Blocks you can get up to 8 contacts per operator!

22FVL24	Full Voltage 24V AC/DC	LED24
22FVL120	Full Voltage 120V AC/DC	LED130

*NOTE: Lamps are unique to light units. Refer to side of light unit for correct replacement lamp part number.

CLAMP RING WRENCHES

To simplify tightening and loosening of standard polyester octagonal clamp rings. Won't scratch your lens or panel. Our standard wrench (22CRW) fits all 22mm NEMA operators except mushroom sizes and lever selector switches. Our mushroom wrench (22CRWM) is for use with 22mm NEMA mushroom operators in tight spaces and should be purchased if mushroom caps and/or lever handles are commonly installed for 22X series octagonal polyester only.

CODE	DESCRIPTION	LIST
22CRW	Standard Clamp Ring Wrench	\$23.00
22CRWM	Mushroom Clamp Ring Wrench	\$25.00

HOLE PLUGS

Use to close and seal unused 7/8" (22.5mm) panel holes. Manufactured with integral "O" ring seal molded on both sides to provide Type 4X rating.

CODE	COLOR	LIST

16MM PILOT LIGHTS

When you need a space-saving pilot light with plenty of special features and flexibility, look to c3controls. Our 16mm pilot lights feature Lexan™ lenses in a variety of colors, and are built to handle even the harshest of environments. Our 100,000-hour LED lamps with leakage protection provide bright light output with superior visibility. And we've increased the range of our Multi-Voltage LED light unit to operate at any voltage from 20V to 277V AC or DC!

16MM PILOT LIGHTS

Within our extensive product portfolio is our line of 16mm Pilot Lights, just one example of our superior product quality. Each product is designed and manufactured to meet the needs of the machine builder. Check out all the features of our Series 16 below!

COMPACT LIGHTS SAVE YOU VALUABLE SPACE WHERE YOU NEED IT MOST

✓ Proven	Our 16mm operators are UL Listed, CSA Certified and CE marked meeting global standards requirements.	  
✓ Quick and Simple	Front panel mounting for simple installation and lamp replacement.	
✓ Environmentally Secure	With 4/4X and IP65 ratings, our 16mm line of pilot lights are built to last and withstand dust, corrosion, ice, and rain.	
✓ Long Lasting	Our reflection technology and state-of-the-art LED lamps improve visibility from all angles, and c3controls LED lamps last 100,000 hours—that's 11.4 years!	
✓ Light Units Run Cool	With premium engineered thermoplastics the light units run cool while providing extreme light intensity versus competitor units that run hot and produce high heat.	
✓ Heavy Duty	Polyester construction provides superior durability, corrosion resistance, moisture rejection and electrical insulation, and encases the resistors to keep heat away from the wires.	
✓ Simple Customization	Various lens color options are available for appropriate operator interface.	
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the operator for easy reference during installation.	
✓ Enhanced Safety	Our field-installable IP20 terminal guards are transparent to maintain terminal visibility and they snap securely in place without the use of tools.	
✓ Stability	All 16mm lights use a miniature bayonet base to provide reliable security for the lamps.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions

By utilizing a c3controls pilot light that works in 20V-277V AC and DC terminals, we're able to streamline our inventory requirements because we only need one product for any application.

Mike Hughes, President • **Packaged Refrigeration Systems**

Full Voltage Indicating Pilot Light

Indicating Pilot Light

Multi-Voltage Pilot Light

UNIQUE PRODUCT LINE FEATURES

EXCLUSIVE MULTI-VOLTAGE LIGHTS

c3controls state-of-the-art multi-voltage light modules—the only U.S. engineered multi-voltage light in the industry!—operate at any voltage from 20V to 277V AC or DC without losing intensity.

WIDE RANGE OF APPLICATIONS

Multiple light designs in full voltage, resistor, and multi-voltage to cover a broad variety of applications up to 600V.

QUALITY MATERIALS

c3controls selects the highest quality raw materials to ensure our products outlast the competition, including Lexan™ plastic for our lenses—improving visibility and resistance to high impact for reliable performance, even in high ambient temperatures.

AVAILABLE LENS COLORS FOR INDICATING PILOT LIGHTS

16MM INDICATING LIGHTS

Our 16mm Indicating Lights feature polyester construction for superior corrosion resistance, moisture rejection and electrical insulation. All units are supplied with #6 terminal screws with self-lifting captive wire clamps to accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal. Nickel plated clamp rings are ideal for corrosive environments. All units mount in a round 5/8" (16mm) hole and are directly interchangeable with competitor units. Units are available in different case depths for easy installation in your control panel – whatever the dimensions. All c3controls 16mm operators are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, light units are also listed for Type 1, 2, 3, 3R, 12, 13 and IP65.

Product features include:

- All lights use miniature bayonet base lamps to provide reliable lamp secureness.

UNIQUE PRODUCT FEATURES

1. Thin, compact, insulating polyester housing provides added protection for those tight fitting spaces.
2. Premium engineered thermoplastics keep the light units running cool while providing extreme light intensity versus competitor units that run hot and produce high heat.
3. Heavy-duty brass current carrying components for improved conductivity and corrosion resistance.
4. High-tech LED lamps offer the latest and most current technology providing leakage protection, great light output and increased visibility for side views – *and lasts up to 100,000 hours!*
5. Front of panel lamp change without removing device from panel.
6. Our rugged Lexan™ lenses can resist high impact for reliable performance in most environments – even in high ambient temperatures.
7. Enhanced safety with field installable IP20 terminal guards are transparent to maintain terminal visibility. Their construction provides easy access to the device terminals – making wiring fast and convenient, and they snap securely in place without the use of tools.

For convenient terminal marking our IP20 terminal guards utilize Series WTB2 markers (see Section 22 Page 32), simplifying wiring and troubleshooting.

AVAILABLE LENS COLORS FOR MULTI-VOLTAGE PILOT LIGHTS

16MM MULTI-VOLTAGE PILOT LIGHTS

Our 16mm Multi-Voltage Pilot Lights feature polyester construction for superior corrosion resistance, moisture rejection and electrical insulation. All units are supplied with #6 terminal screws with self-lifting captive wire clamps to accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal. Nickel plated clamp rings are ideal for corrosive environments. All units mount in a round 5/8" (16mm) hole and are directly interchangeable with competitor units. The compact size means you can put more into a smaller panel, lowering your cost while boosting the functionality of your machine.

Product features include:

- UL Listed Type 1, 2, 3, 3R, 4/4X, 12, 13 and IP65 ratings for the most demanding applications—including wash-downs and corrosive environments.
- Heavy-duty brass current carrying components for improved conductivity and corrosion resistance.
- Bi-polar design means functionality is independent of which lead is connected to each terminal.
- Rugged Lexan™ lenses resist high impact for reliable performance in most environments—even in high ambient temperatures.
- Superior performance even in applications with shock and vibration.
- Enhanced safety with field installable IP20 terminal guards are transparent to maintain terminal visibility. Their construction provides easy access to the device terminals—making wiring fast and convenient, and they snap securely in place without the use of tools.

For convenient terminal marking our IP20 guards utilize Series WTB2 markers (see Section 22 Page 32), simplifying wiring and troubleshooting.

UNIQUE PRODUCT FEATURES

c3
Exclusive!

ELIMINATE THE HEADACHE OF MULTIPLE LIGHTS TO MATCH MULTIPLE VOLTAGES!

Our state-of-the-art, super bright LEDs and printed circuit boards allow you to operate this light at any voltage from 20V to 277V AC or DC without losing light intensity or consuming a lot of power. One light unit covers a lot of applications, reducing your inventory! All you have to do is choose your lens color.

- Wider operating voltage range of 20V-277V AC or DC.
- Depth behind the panel at 1-23/32" (43.6mm).
- Integrated light circuit protection. We included a fusible link in the electronic circuit, resulting in predictable failure mode (open circuit) and improving reliability.
- A redesigned circuit allows you to use the light unit in a wider range of applications, including electronic and coil applications where leakage current and voltages may exist.

DURABLE AND EFFICIENT LIGHTS FOR YOUR SMALLEST APPLICATIONS

✓ Proven	Our 13mm pilot lights are UL Listed, CE Marked, and are rated Type 4/4X as standard for watertight and corrosion resistance. Also rated for Type 1, 2, 3, 3R, 12 & 13 and IP20. 
✓ Compact Design	Our 13mm LED pilot lights have the shortest depth behind the panel of any Type 1, 2, 3, 3R, 4, 4X, 12 & 13 and IP20 rated lights in the industry!
✓ Heavy Duty	Polyester construction provides superior durability, corrosion resistance, moisture rejection and electrical insulation.
✓ Multiple Applications	Light units come with internal resistors to match various AC and DC voltages.
✓ Quick and Simple	Front panel mounting for simple installation.
✓ Simple Customization	Various lens color options are available for appropriate operator interface.
✓ Low Energy Consumption	c3controls 13mm LED Pilot Lights utilize traffic signal LED technology for superior visibility and brightness, even in direct sunlight. LED lamps last 100,000 hours—that's 11.4 years!
✓ Quality Materials	c3controls selects the highest quality raw materials to ensure our products outlast the competition, including Lexan™ plastic for our lenses—improving visibility and resistance to high impact for reliable performance, even in high ambient temperatures.
✓ Convenience	Each light unit is provided with a dress ring/panel gasket to accommodate a 1/2" (13mm) mounting hole dimension and is designed to be mounted in panels up to 1/8" (3mm) thick.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“c3controls engineers solid products that look good in a panel, and when you turn the panel on for the first time, it works every time. The clients are happy, we are happy, and that's why we've stuck with c3controls.”

Al Doberstein, President • **Total Control Systems, Inc.**

Wire Lead Pilot Light

Screw Terminal Pilot Light

UNIQUE PRODUCT LINE FEATURES

COMPACT DESIGN

Behind the panel dimensions as small as 3/4" x 1-5/64" (19.1mm x 27.4mm).

WIDE RANGE OF VOLTAGES

Our 13mm pilot lights have a voltage range from 6V to 480V.

FLEXIBILITY

Our customers have the flexibility to order standard screw terminals or custom length factory installed wire leads.

ENHANCED SAFETY

A field installable IP20 terminal guard is available for enhanced safety and protection.

BI-POLAR DESIGN

Our 13mm LED Pilot Lights are designed for bi-polar installation for all AC and DC voltages, making installation even easier.

LEGEND PLATES

Standard or custom legend plates are available.

LED White	White or Clear

MIX AND MATCH ANY COLOR AND INDICATING LIGHT LENS

13MM INDICATING LIGHTS

Our 13mm low-cost Indicating Lights come complete with internal resistor(s) to match various AC and DC voltages. Each unit is provided with a dress ring/panel gasket to accommodate a 1/2" (13mm) mounting hole dimension and is designed to be mounted in panels up to 1/8" (3mm) thick. Conventional front panel mounting simplifies installation. Our 13mm indicating lights are UL Listed and are rated Type 4/4X as standard for watertight and corrosion resistance. In addition, light units are also listed for Type 1, 2, 3, 3R, 12 & 13 and IP20. All wire lead units are supplied with #22 AWG wire (0.5 - 4mm²) leads, 6" (152.4mm) long and stripped 1/2" (13mm). Custom lengths and various wire color options are available, please consult factory.

Product features include:

- Wider voltage operating range, up to 240V.
- Industry leading shortest depth behind the panel.
- Polyester construction provides superior corrosion resistance, moisture rejection and electrical insulation.
- Our rugged Lexan™ lenses can resist high impact for reliable performance in most environments — even in high ambient temperatures.

13MM PILOT LIGHTS

UNIQUE PRODUCT FEATURES

SCREW TERMINAL

Self-lifting captive saddle terminal screws accommodate #22 through two #12 AWG wires (0.5 - 4mm²) per terminal to provide easy wiring in a broad range of applications. The terminals are arranged for straight through wiring so that bare wire may be "bussed" to multiple light installations providing significant labor savings. These units will also accept "ring" and "fork" connectors. Now available with optional IP20 protection

WIRE LEAD

Wire leads are supplied standard at 6" (152.4mm) length. They are also available in any specified length including different lengths on the same light (additional charge for non-standard length: \$0.10 per inch after the standard first 6" (152.4mm), e.g., 12" (304.8mm) length wire lead = \$0.60). This ability to quickly and economically "customize" to match specific wiring applications can provide major installation cost savings. For LEDs, the positive lead is red and the negative lead is black. While standard 6" wire leads are available for guaranteed same day shipping, our custom wire leads are not—please consult factory.

CONTROL STATION ENCLOSURES

All our products are fully certified, rated, and backed by our limited lifetime warranty to meet the needs of the machine builder, and our Series EC Control Station Enclosures are no exception. Check out the incredible features in the chart below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our enclosures meet UL, CSA and IEC standards requirements. 
✓ Durable Construction	Available in polyester, polycarbonate, and die-cast aluminum in a variety of ranges.
✓ Standard Control Stations	Our most popular control stations are available as standard in five sizes and up to three units—guaranteed for same-day shipping.
✓ Custom Control Stations	Specify your needs, and c3controls will configure, assemble and ship it as a single unit.
✓ Flexibility	We offer the flexibility of standard assembled control stations with 30mm and 22mm pilot devices as well as enclosed motor control assemblies, enclosed disconnect switches and enclosed motor protection circuit breakers. You can also order an enclosure with up to four holes you'll assemble yourself.
✓ Easy to Install	Fully assembled and ready to use out of the box.
✓ General Use	We've designed our polyester control stations for common electrical and electronic applications.
✓ Modular Design	Our 30mm and 22mm pilot devices' interchangeable modular design provides endless options for operator interface—reducing inventory.
✓ Environmentally Secure	A variety of seals keep dust and moisture out of our enclosures.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Availability*	Any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day. NOTE: Custom Control Stations and Enclosed Motor Control assemblies are not available for guaranteed same-day shipping.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

CONSTRUCTION

- Available for 30mm and 22mm pilot devices.
- Solid fiberglass reinforced polyester construction, lightweight with high impact resistance.
- Non-conductive double insulated material.
- Formed-In-Place (FIP) continuous polyurethane gasket that provides a complete watertight, dust tight environmental seal.
- Recessed captive 316 Series stainless steel cover screws.
- Designed for general electrical and electronic applications and any application that has an associated environmental concern.
- Soft edge design reduces dust and other particle corrosion.
- Watertight, non corrosive, environmental design.
- UV and chemical resistant.
- Punched enclosures feature notched keyholes for both 30mm and 22mm styles.
- Standard color: RAL 7035
- Our standard enclosures featured on this page are available for guaranteed same-day shipping, our custom control stations and enclosed motor control assemblies are not.
- Available as fully-assembled control stations.

RATINGS / APPROVALS

- Type 1, 2, 3, 3R, 4X, 12, 13, and IP66
- RoHS Compliant

DIE CAST ALUMINUM ENCLOSURES AND CONTROL STATIONSDISCOUNT
SCHEDULE**H**

NOTE: Design subject to change without notice. Consult factory for current list price and dimensions.

CONSTRUCTION

- Available for 30mm and 22mm pilot devices.
- Die cast aluminum alloy construction.
- High temperature neoprene gaskets are oil and petroleum resistant.
- Highly efficient seal provides ingress protection against dust and moistures.
- For greater mechanical protection, the cover gasket is housed in a recess in the lid which mates up with a tongue.
- Oil and corrosion resistant.
- Stainless steel captive lid retaining screws.
- Standard finish: Smooth powder coat Grey (RAL 7001).
- Our standard enclosures featured on this page are available for guaranteed same-day shipping, our custom control stations and enclosed motor control assemblies are not.

RATINGS / APPROVALS

- Type 1, 3R, 4, 12, IP66 and IP67
- IP66 protection with a working temperature within -40°C to +90°C (-40°F to 194°F)

30MM DIE CAST ALUMINUM STANDARD ENCLOSURES (NOT RECOMMENDED FOR H-LINE)

CODE	# OF UNITS	FRAME DIMENSIONS (H x W x D)	COLOR	LIST
DC1	1	4-59/64" x 3-5/32" x 2-9/32" (125mm x 80mm x 57.9mm)	Smooth Powder Coat Grey	\$130.00

30MM DIE CAST ALUMINUM ENCLOSURES AND CONTROL STATIONS

- Spacing designed to accompany standard, short and tall legend plates.
- All operator holes are 1-3/16" (30.2mm) diameter.
- See hub chart below for drilled hole sizes. All hub holes are centered on bottom face of custom enclosures unless otherwise specified.
- Die cast enclosure depth accommodates one contact block.
- When using a mechanical interlock, enclosure must be ordered with 2" (50.8mm) centers. Consult factory.

30MM DIE CAST HUB HOLE SIZE

CONDUIT SIZE	DRILL HOLE SIZE
1/2" (12.7mm)	7/8" (22.5mm)

CUSTOM CONTROL STATIONS

We'll configure and assemble enclosure stations in nearly any size and from a variety of materials to your specification. Ordering a custom enclosed control station is simple and offers advantages.

You'll order your custom job under a single catalog number and your control station will arrive already assembled which means a shorter bill of material on your end, saving you installation time and cost. And pre-assembly also makes your inventory easier to manage.

There is a \$4.00 assembly charge per pilot device unit.
Example: A two-unit station will have an assembly charge of \$8.00.

Custom control stations are not available for guaranteed same day shipping. Call us for pricing and an estimated date of delivery.

ADVANTAGES

- ✓ Single catalog number
- ✓ No assembly required
- ✓ Shorter panel bill of material
- ✓ Easier to manage inventory

IEC TERMINAL BLOCKS

c3controls' line of IEC terminal blocks are both innovative and user-friendly. They are simple to install and are color-coded for easy circuit identification. From standard feed-through spring clamp or screw clamp to disconnect, fuse holder, and power distribution terminal blocks, we've got what you need.

IEC TERMINAL BLOCKS

c3controls offers a comprehensive line of IEC Terminal Blocks, and each one of our products is designed and manufactured to meet the needs of the machine builder. Check out all the features of our Series WTB2 below!

FOR DURABLE, SIMPLE, LONG-LASTING TERMINAL BLOCKS TURN TO C3CONTROLS.

✓ Proven	Our IEC terminal blocks meet UL and IEC standards requirements making them suitable for use in global applications.	
✓ Multiple Wire Sizes	Our IEC terminal blocks accept wires as small as 0.5mm ² (24 AWG) and as large as 120mm ² (4/0 AWG), and up to 232 amps.	
✓ Wide Range of Operation	A wide range of terminal blocks available from 5mm – 25mm in screw clamp, power distribution, and spring clamp, with ratings from 20A to 232A.	
✓ Vibration Resistant	The pre-loaded 302 stainless steel spring clamps hold the wire securely against the current bar and won't loosen, even in high vibration applications.	
✓ Heavy-Duty Construction	We mold our terminal block housings from unbreakable thermoplastic with a UL94 V-0 flammability standard, and we use quality zinc plated brass and electrolytic copper for our metal parts for excellent conductivity and to minimize corrosion.	
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the terminal blocks for easy reference during installation.	
✓ Quick Identification	Color coded blocks and terminal markers are available for easy circuit identification.	
✓ Time & Space Savings	Internal jumpers in up to 10 positions free up valuable wiring space and reduce assembly time.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.	

*See c3controls Terms & Conditions for complete details on our warranty and shipping guarantee. Same-day shipping does not apply on plotter and plotter accessories.

“c3controls has helped us reduce the costs on all of our control panel components. From terminal blocks, power disconnects, selector and push button switches, to motor contactors and overload relays, c3controls' products are all we use.”

Joel Fritz, President & CEO • **Pacific Kiln & Insulations, Co. Inc.**

IEC Screw Clamp Multi-Level DIN Rail

IEC Screw Clamp Power Distribution

IEC Spring Clamp Ground DIN Rail

IEC Spring Clamp Multi-Conductor Feed Through DIN Rail

UNIQUE PRODUCT LINE FEATURES

SECURITY

Our snap-on, rugged DIN rail mounting foot is designed to easily attach terminal blocks while creating a secure fit.

SAFETY

All c3controls terminal blocks come with IP20 protection against accidental contact and have a UL94 V-0 flammability rating.

STABILITY

Our screw clamp terminal blocks feature a vibration resistant zinc plated clamping system.

WIRING MADE EASY

The funnel entry design of our terminal blocks makes wiring easy and our spring clamp features top wiring.

CIRCUIT IDENTIFICATION

Marking system allows for fast and easy circuit identification. Blank, custom, and standard markers are available.

RECESSED TERMINAL SCREWS

Captive terminal screws are recessed to avoid accidental contact and will not fall out during wiring.

IEC FEED THROUGH DIN RAIL TERMINAL BLOCKS

c3controls WTB2 Series of feed through terminal blocks have been designed to meet the strict specifications and standards of UL, CSA, and IEC. The WTB2 Series of terminal blocks is manufactured with a direct mounting foot for 32mm and 35mm standard DIN rails.

In addition to the mounting feature, the WTB2 Series is constructed using only the best available materials for both the housing and clamping bodies and parts. The housing is molded out of an unbreakable, high quality, V-0 flame resistant thermoplastic. The metal bodies are made of a high quality zinc plated, brass and electrolytic copper to provide excellent conductivity and minimize corrosion problems.

The WTB2 Series accepts wires as small as 0.5mm² (24 AWG) and as large as 120mm² (4/0 AWG), up to 232 Amps. Wiring to the terminal blocks is made easy by the funnel entry design of the housing. Accessories such as circuit bridges, end plates, partition plates, and markers make the WTB2 Series a flexible alternative to any feed through wiring or power distribution application.

SPECIAL FEATURES

C3CONTROLS MANUFACTURES THE MOST INNOVATIVE, USER-FRIENDLY LINE OF TERMINAL BLOCKS ON THE MARKET TODAY!

1. Construction provides IP20 protection to guard against accidental contact with live parts — even with accessories installed.
2. Captive terminal screws will not fall out during wiring and are recessed to avoid accidental contact.
3. Marking system allows for fast and easy circuit identification. Blank, custom, and standard markers are available.
4. Funneled wiring entry with finger safe IP20 terminals simplifies wiring for fast and easy installations.
5. Housing is molded out of an unbreakable, high quality, V-0 flame resistant thermoplastic. Available in eight colors; grey, black, blue, green, orange, red, white, and yellow for quick identification of control circuit types.
6. DIN rail mounting foot allows for direct mounting on 32mm and 35mm DIN rails and is designed for easy snap on, snap off assembly — the most sturdy and rugged mounting foot on the market!
7. Our zinc plated clamping system provides superior conductivity, is vibration resistant, and offers superb corrosion resistance for normal and hazardous environments.
8. Internal jumpers (circuit bridges) free up valuable wiring space and reduce assembly time.

SCREW CLAMP GROUNDING TERMINALS

Use of grounding terminals instead of grounding studs and wire lugs to terminate ground wires saves installation and wiring time substantially. Grounding terminals clamp mechanically onto the DIN Rail by tightening the center mounting screw, making a reliable electrical connection between the current bar and the DIN Rail. The rail serves as a bus bar and automatically distributes ground potential to all other ground terminals on the same rail. Grounding terminals can also be used as end stops, preventing other terminal blocks and components from moving laterally on the DIN Rail. Grounding terminals are supplied with a green/yellow thermoplastic housing as standard for easy identification and international acceptance. The brass mounting foot is tin-plated for low contact grounding resistance.

MULTI-CONDUCTOR SCREW CLAMP

The multi-conductor screw clamp terminals offer a reliable solution for multiple wire connections. The terminal eliminates conventional cross connections, looping wires and reliability problems encountered when connecting two wires in one clamp. The terminals provide multiple connection points in the terminal itself, and the possibility of further multiplication of connections with circuit bridges. The multi-conductor terminal blocks can even be bridged to standard feed through screw clamp terminal blocks of the same conductor size.

WTB2-W4-12 features one termination point on one side and two termination points on the other side, while the WTB2-W4-22 has two termination points on each side. Bridging facility is at the center of the terminals.

DOUBLE LEVEL, FEED-THROUGH TERMINALS

The double level terminals facilitate higher termination density without the need to increase the length of the mounting rail. Jumping between terminal blocks can be done at both levels with the circuit bridges. Both levels of the terminal block can also be labeled with terminal block markers. The WTB2-W4DDB internally shorted double level terminals are useful for distribution applications using circuit bridges on the lower level.

TRIPLE LEVEL, FEED-THROUGH TERMINALS

The triple level terminals are ideal for control systems with three wire DC sensors and actuators. The simplified three level connections facilitate higher wire termination density. The WTB2-TL2 feed-through terminals, with connecting points at all three levels, offer multiple choices of signal and power distribution at any level. The top level of the WTB2-TL2S provides connecting points for the signal while the middle and bottom level connecting points are used for the positive and negative voltage supply connections. In applications where switching indication is required, WTB2-TL2SLP and WTB2-TL2SLN terminal blocks with built-in LED indication are also available.

FUSE HOLDER TERMINALS

Certain electrical and control systems require fuse protection – fuse holder terminals offer a convenient solution. The fuse holder terminal has a hinged fuse carrier. The fuse can be engaged or disengaged by moving the carrier. Terminals are available to accept 5 x 20mm or 5 x 25mm fuses and 1/4" X 1-1/4" fuses for North American applications. A spare fuse (provided as standard) can be placed in the carrier of WTB2-FB52 terminals. Identification with markers is possible on both the terminals and the fuse carrier. Fuse holder terminals, WTB2-FB52L, include LED indication. A specially designed built-in circuit gives indication when the fuse blows, clearly identifying a fault in the circuit.

DISCONNECT TERMINALS

Disconnect terminal blocks provide a convenient means for isolating and disconnecting control circuits. The WTB2-FB52DB includes a hinged carrier with a tin plated brass link. The WTB2-DB1 includes a hinged lever operating a knife contact. All screw terminals of the disconnect terminal blocks have special screw heads which accept test probes.

MINIATURE PANEL MOUNT, FEED-THROUGH SCREW CLAMP TERMINALS

The miniature modular panel mounting screw clamp terminals ensure extremely compact wiring. The terminals are “add-on” and can be stacked to form multipole assemblies. The stacked assemblies are fitted with end plates on both ends for easy installation on to the panel. For assemblies of more than twenty terminals, additional end plates must be mounted after every twentieth terminal block for rigidity of the assembly.

IEC FEED THROUGH DIN RAIL TERMINAL BLOCKS

c3controls WTB2 Series of feed through spring clamp terminal blocks have been designed to meet the strict specifications and standards of UL, CSA, and IEC. The WTB2 Series of terminal blocks is manufactured with a direct mounting foot for 35mm standard DIN rails.

In addition to the mounting feature, the WTB2 Series is constructed using only the best available materials for both the housing and clamping bodies and parts. The housing is molded out of an unbreakable, high quality, V-0 flame resistant thermoplastic. The metal bodies are made of a high quality zinc plated, brass and electrolytic copper to provide excellent conductivity and minimize corrosion problems.

The WTB2 Series accepts wires as small as 0.5mm² (22 AWG) and as large as 10mm² (8 AWG), up to 50 Amps. The wiring to the terminal blocks is made easy by the funnel entry design of the housing. Accessories such as circuit bridges, end plates, partition plates, and markers make the WTB2 Series a flexible alternative to any feed through wiring or power distribution application.

SPECIAL FEATURES

C3CONTROLS SPRING CLAMP TERMINAL BLOCKS REDUCE INSTALLED COSTS AND ENSURE RELIABLE CONNECTIONS!

1. Construction provides IP20 protection to guard against accidental contact with live parts — even with accessories installed.
2. Convenient top wiring. The spring clamp is opened with commonly available screwdrivers, enabling the conductor to be easily inserted in the opening of the spring clamp.
3. Marking system allows for fast and easy circuit identification. Blank, custom, and standard markers are available.
4. Funneled-wiring entry with finger safe IP20 terminals simplifies wiring for fast and easy installations.
5. Housing is molded out of an unbreakable, high quality, V-0 flame resistant thermoplastic. Available in eight colors: grey, black, blue, green, orange, red, white, and yellow for quick identification of control circuit types.
6. DIN rail mounting foot allows for direct mounting on 35mm DIN rails and is designed for easy snap on, snap off assembly — the most sturdy and rugged mounting foot on the market!
7. Our zinc and electroplated clamping yokes and current bars provide superior conductivity, superb corrosion resistance in normal and hazardous environments, and in conjunction with the stainless steel spring clamp are vibration resistant.
8. Pre-loaded 302 stainless steel spring clamps hold the wire securely against the current bar, and won't loosen, even in high vibration applications.
9. Internal jumpers (circuit bridges) are available for adjacent and alternate terminal blocks, which frees up valuable wiring space and reduces assembly time.

SPRING CLAMP GROUND TERMINALS

Spring clamp ground terminal blocks are offered for quick connections and are ideal for use with other spring clamp terminal blocks. The spring clamp is operated by using a screwdriver to provide access for wiring through the opening in the spring clamp. The wire is held against current bar directly by a pre-stressed spring clamp. Specially designed alloy feet help to achieve very low contact resistance and vibration proof grounding. Spring clamp ground terminals can be mounted on 35mm DIN rails along with other terminals, and eliminate the need for a separate grounding bus bar. The ground terminal block profile is the same as the feed through terminal blocks of same wire size.

MULTI-CONDUCTOR SPRING CLAMP

The multi-conductor spring clamp terminals offer a reliable solution for multiple wire connections. The terminal eliminates conventional cross connections, looping wires and reliability problems encountered when connecting two wires in one clamp. The terminals provide multiple connection points in the terminal itself, and the possibility of further multiplication of connections with circuit bridges. The multi-conductor terminal blocks can even be bridged to standard feed through spring clamp terminal blocks of same conductor size.

WTB2S-W2-12, WTB2S-W4-12 and WTB2S-W6-12 features one termination point on one side and two termination points on the other side, while the WTB2S-W2-22, WTB2S-W4-22 and WTB2S-W6-22 have two termination points on each side. Bridging facility is at the center of the terminals.

MINIATURE PANEL MOUNT, FEED-THROUGH SPRING CLAMP TERMINALS

The miniature modular panel mounting spring clamp terminals ensure extremely compact wiring. The terminals are “add-on” and can be stacked to form multipole assemblies. The stacked assemblies are fitted with end plates on both ends for easy installation on to the panel. For assemblies of more than twenty terminals, additional end plates must be mounted after every twentieth terminal block for rigidity of the assembly. Miniature multi-conductor terminals are also available as a reliable solution for multiple wire connections. The terminal eliminates conventional cross connections, looping wires and reliability problems encountered when connecting two wires in one clamp. WTB2S-MW2-22 features two termination points on each side.

END PLATES

Our end plates enclose the open side of the last terminal block in a rail assembly to provide isolation from adjacent equipment and circuits. May also be used as a separator to divide circuits in a terminal block rail assembly. See applicable terminal block page for end plate part number and ordering information.

SEPARATOR PLATES

Our separator plate is used to divide circuits in a terminal block rail assembly. See applicable terminal block page for separator plate part number and ordering information.

PARTITION PLATES

Our partition plates are used to identify and segregate terminal block groups. In addition, they maintain the required creepage and clearance for electrical isolation. See applicable terminal block page for partition plate part number and ordering information.

END BARRIERS

Our end barriers retain the terminal blocks on the mounting rail and have a Tightening Torque of 0.8/7 (Nm/lb-in). See applicable terminal block page for end barrier part number and ordering information.

DIN RAIL

We offer two types of 35mm symmetrical DIN rails; steel and aluminum. Our steel DIN rail is zinc with clear chromate plated and is available in either 1m (3.28ft.) or 2m (6.56ft.). The aluminum version is available in 1m (3.28ft.). Each simply fasten by screws to the mounting surface - no special brackets or hardware are needed. Terminal blocks easily snap on to rail. See applicable terminal block page for DIN rail part number and ordering information.

DIN RAIL SUPPORT BRACKET

Angled bracket raises DIN rail off of mounting panel for easier more convenient wiring of terminal blocks. See applicable terminal block page for support bracket part number and ordering information.

CIRCUIT BRIDGES

Internal, Insulated – for Screw Clamp Connection Terminal Blocks

Use our insulated circuit bridges to electrically connect multiple terminal blocks. Our circuit bridges are pre-assembled and available in 2-, 3-, 4-, and 10-position. See applicable terminal block page for circuit bridge part number and ordering information.

Insulated Push-In – for Spring Clamp Connection Terminal Blocks

for use with alternate terminal blocks

for use with adjacent terminal blocks

Our insulated push-in circuit bridges provide IP20 protection and simplify the task of cross connection between multiple terminal blocks. Circuit bridges are available for connections between adjacent and alternate terminal blocks. See applicable terminal block page for circuit bridge part number and ordering information.

CIRCUIT BRIDGE INSTALLATION AND REMOVAL TOOL

For easy installation and removal of circuit bridges with adjacent terminal blocks. See applicable terminal block page for circuit bridge installation tool part number and ordering information.

GROUP MARKERS

Our group markers and group marker holders are used to identify an assembly of adjacent terminals that are associated with a specific function, control circuit, or part of a machine.

MARKER ORIENTATION

QUICK MARKER STRIPS

Custom printed or blank, the WTB2-M quick marker strips are ideally designed to fit blocks of certain widths. An entire strip of markers can be installed at the same time without having to separate the markers, reducing labor and installation time. The Quick Marker Strip Product Guide is below to help match the appropriate marker to each terminal block.

QUICK MARKER STRIP PRODUCT GUIDE

MARKER TYPE	CORRESPONDING TERMINAL BLOCK

① Marker installed on screw terminal. ② Marker installed on fuse carrier/disconnect arm.

CUSTOM MARKER STRIPS

WTB2-M marking strips can be custom printed providing unique markers for any application. These markers are available in different sizes. Both alpha and numeric characters and symbols can be printed on the markers.

CUSTOM MARKER STRIPS

CODE	DESCRIPTION	MARKERS PER/PKG.	LIST EACH MARKER
WTB2-M2-P	Custom White Marker 6mm x 5mm	100	\$0.73

CUSTOM PRINTING SET-UP FEES

Our plotter system and software have almost unlimited capabilities for printing custom terminal block markers. The user-friendly operator views work on a "what you see is what you get" principle, based on customer-submitted Excel files.

There is a \$18 set-up fee for c3controls to print custom markers. Submit an Excel file (.xls or .xlsx) using your purchase order as the name of the file with the file type extension. If you do not have a file to submit and would prefer c3controls to create the marker file for you, then there is a \$50 fee which includes the printing.

Following is the maximum number of markers in one file:

WTB2-M2, -M5A	1,320 markers
WTB2-M5, -M6, -M8, -M9, -M10	960 markers
WTB2-M10A	660 markers
WTB2-M12, -M15	480 markers

If the number of markers you require exceeds the maximum number of markers in one file, you must submit multiple files. When submitting multiple files, use the following file naming convention (33601 represents your purchase order number, and -1, -2, -3 represents the number of files submitted).

33601-1.xls
33601-2.xls
33601-3.xls

If you have questions regarding custom printing, contact our customer first team at 724.775.7926.

The following table may be used as a guideline for selecting the appropriate slotted screwdriver blade dimension for use with c3controls' WTB2 series terminal blocks.

HIGH DENSITY TERMINAL BLOCKS

c3controls' line of High Density terminal blocks are both innovative and user-friendly. Available in multiple terminal points from 4, 6, and 12 in a single molded housing, are simple to install, and they carry an electrical rating of 30A @ 600V AC (UL/CSA) and 30A @ 750V AC (IEC).

HIGH DENSITY TERMINAL BLOCKS

Every c3controls product is designed and manufactured to meet the needs of the machine builder, including our line of High Density Terminal Blocks. Check out all the features of our Series TB High Density Terminal Blocks below!

ENGINEERED TO HANDLE YOUR MOST COMPLEX WIRING APPLICATIONS

✓ Proven	Our high density terminal blocks and shorting blocks meet UL and CSA standards, and are RoHS compliant.	
✓ Multiple Wire Sizes	High density terminal blocks accommodate #18 to #10 AWG wires (0.34 – 4mm ²).	
✓ Wide Range of Operation	A wide range of 4, 6, and 12 point circuit terminal blocks in a single molded housing rated for 600V, 30A continuous service.	
✓ Shorting Block	Our HDTB-SB high-density CT shorting block is now available in 2, 4, and 6-point circuit configurations, and is designed to provide ease of connecting systems to applications such as current transformers, switchgear, and tap points.	
✓ Convenient	c3controls' high density terminal blocks are directly interchangeable with GE CR151 terminal blocks and our shorting blocks are directly interchangeable with GE EB27B06S terminal blocks.	
✓ Wiring Made Easy	Wiring to the terminal blocks is made easy by unobstructed access to terminals.	
✓ Heavy-Duty Construction	We mold our terminal block housings from unbreakable thermoplastic and we use quality zinc plated brass and electrolytic copper for our metal parts for excellent conductivity and to minimize corrosion.	
✓ Quick Identification	Terminal markers are available and can be hand marked or custom printed.	
✓ Easy to Install	Available panel mounting or 35mm DIN rail mounting for easy assembly.	
✓ Time Savings	Individual blocks can be quickly and easily added or removed without disturbing adjacent blocks. Only a screwdriver is required for removal.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

UNIQUE PRODUCT LINE FEATURES

HIGH DENSITY

Multiple terminal points, 4, 6, or 12 in a single molded housing providing high density of terminal connections in a compact size.

FLEXIBILITY

#8-32 terminal screws and integrated 35mm DIN Rail snap and panel mounting geometry allow for the terminal block to be used in a wide variety of applications.

READY TO INSTALL

Out of the box and ready to install! Screws come in the backed out position with convenient spring-return open terminals for easy wiring, even allows for up to two (2) ring lugs.

QUICK IDENTIFICATION

Large marking strip available that can be hand marked or custom printed to provide quick and accurate identification of the terminals.

SHORTING TERMINAL BLOCK

Brass shorting strips with Thumb screws for easy terminal shorting. Terminals can be shorted according to customer requirements.

TRANSPARENT COVER

Factory supplied Transparent cover along with Phillips screws version of high density shorting terminal block provides additional safety and protection.

HIGH DENSITY TERMINAL BLOCKS

c3controls' line of High Density Terminal Blocks are rated 600 volts, 30 amperes continuous service and will accommodate #18 to #10 AWG (0.34 - 4mm²) stranded or solid copper wire, single or parallel conductors of same size and type (stranded/stranded or solid/solid only) per terminal and include captive wire clamps for use with wire or ring type connectors, as standard. Available panel mounting or DIN rail mounting (35mm x 7.5mm or 35mm x 15mm), any combination of High Density Terminal Blocks may be assembled next to one another on the same mounting rail. Individual blocks can quickly and easily be inserted or removed without disturbing adjacent blocks. Only a screwdriver is required for removal.

SPECIAL FEATURES

1. Construction provides IP20 protection to guard against accidental contact with live parts.
2. Out of the box and ready to install! Integral captive terminal screws and clamps come in the backed-out position with convenient spring-return open terminals for easy wiring.
3. Combination head terminal screws allow the use of straight, phillips, or posidrive screwdrivers, making it easy to apply the proper terminal tightening torque for a more secure, quick, and easy installation.
4. Marking system allows for fast and easy circuit identification. Blank and custom markers are available.
5. Wiring to the terminal blocks is made easy by unobstructed access to terminals. Accommodates #18 to #10 AWG (0.34 - 4mm²) stranded or solid copper wire, single or parallel conductors of same size and type.
6. Accepts ring type connectors, including installation of two (2) ring conductors, up to 12-10AWG ring lug.
7. Housing is molded out of an unbreakable, high quality thermoplastic.
8. Zinc plated screws and electrolytic brass for excellent conductivity and to minimize corrosion.
9. Panel mounting or DIN rail mounting (35mm x 7.5mm or 35mm x 15mm), any combination of High Density Terminal Blocks may be assembled next to one another on the same mounting rail.

HIGH DENSITY SHORTING TERMINAL BLOCKS

c3controls' new High Density Shorting Terminal Blocks are an addition to our popular line of innovative and user-friendly High Density Terminal Blocks (HDTB). Expanding upon our feature rich HDTB, the Current Transformer Shorting Block provides ease of connecting systems to applications such as current transformers, switchgear, and tap points. Shorting blocks are available in 2, 4 and 6 pole configurations and can be ordered with optional terminal covers and markers.

Product features include:

- Rated 600 volts, 30A (unprepared wire) and 60A (prepared wire).
- Optional panel mounting or DIN rail mounting (35mm x 7.5mm or 35mm x 15mm).
- Shorting Blocks may be assembled with any combination of High Density Terminal Blocks next to one another on the same mounting rail.

SPECIAL FEATURES

1. Out of the box and ready to install! Screws come in the backed-out position with convenient spring-return open terminals for easy wiring.
2. Combination head terminal screws allow the use of straight, phillips, or posidrive screwdrivers, making it easy to apply the proper terminal tightening torque for a more secure, quick, and easy installation.
3. Brass shorting strip to easily short terminals. CT Terminals can be shorted as per customer requirement.
4. Space provided to keep shorting terminal screws when not in use.
5. Integrated 35mm DIN Rail snap and panel mounting geometry.
6. Individual blocks can be quickly added or removed without disturbing adjacent blocks. Only a screwdriver is required.
7. Wiring is made easy by unobstructed access to terminals. Accommodates #18 to #10 AWG (unprepared) and #18 to #6 AWG (prepared) — up to two (2) ring lugs.

8. Integrated IP20 guards prevent accidental contact.
9. Housing is molded out of an unbreakable, high-quality thermoplastic.
10. Both Phillips and Thumb screws are Zinc plated and electrolytic brass for excellent conductivity and to minimize corrosion.
11. Factory supplied Transparent cover along with Phillips version of high-density shorting terminal block provides additional safety and protection.
12. Large marking strip available that can be hand marked or custom printed.
13. Directly interchangeable with GE EB27B06S terminal blocks.

MARKERS

FOR USE WITH TERMINAL BLOCKS AND SHORTING BLOCKS

MARKER ORIENTATION

QUICK MARKER STRIPS

Custom printed or blank, the HDTB-M quick marker strips are ideally designed to fit blocks of certain widths. An entire strip of markers can be installed at the same time without having to separate the markers, reducing labor and installation time. The Quick Marker Strip Product Guide is below to help match the appropriate marker to each terminal block.

QUICK MARKER STRIP PRODUCT GUIDE

CAT. NO.	FOR USE WITH	PCS./PKG.	LIST/PC.
HDTB-M4	HDTB-4	10	\$ 0.85
HDTB-M6	HDTB-6 & HDTB-12 (2 per block)	10	\$ 1.00
HDTB-M2	HDTB-SB-2-C & HDTB-SB-4-C (2 per block)	10	\$ 0.65
HDTB-M3	HDTB-SB-6-C (2 per block)	10	\$ 0.85

CUSTOM MARKER STRIPS

HDTB-M marking strips can be custom printed providing unique markers for any application. These markers are available in different sizes. Both alpha and numeric characters and symbols can be printed on the markers. Note: Custom markers are not available for same day shipping.

CUSTOM PRINTED MARKER STRIP PRODUCT GUIDE

CAT. NO.	FOR USE WITH	PCS./PKG.	LIST/PC.
HDTB-CM-M4	HDTB-4	100	\$ 2.00
HDTB-CM-M3	HDTB-SB-6-C (2 per block)	100	\$ 2.00
HDTB-CM-6	HDTB-6 & HDTB-12 (2 per block)	100	\$ 2.75
HDTB-CM-M2	HDTB-SB-2-C & HDTB-SB-4-C (2 per block)	100	\$ 1.75

CUSTOM PRINTING SET-UP FEES

Our plotter system and software have almost unlimited capabilities for printing custom terminal block markers. The user-friendly operator views work on a "what you see is what you get" principle. Meaning you can adjust character size and type, rotate characters, and plot symbols from Excel files, text files, database files, and CAD/CAE files.

There is an \$18 set-up fee for c3controls to print custom markers. Submit an Excel file, text file, database file, or CAE/CAD file using your purchase order as the name of the file with the file type extension. If you do not have a file to submit and would prefer c3controls to create the marker file for you, then there is a \$50 fee which includes the printing.

Following is the maximum number of markers in one file:
 HDTB-M4, -M6 200 markers

If the number of markers you require exceeds the maximum number of markers in one file, you must submit multiple files. When submitting multiple files, use the following file naming convention (33601 represents your purchase order number, and -1, -2, -3 represents the number of files submitted).

33601-1.xls
 33601-2.xls
 33601-3.xls

If you have questions regarding custom printing, contact our customer first team at 724.775.7926.

DIN RAIL

We offer two types of 35mm symmetrical DIN rails; steel and aluminum. Our steel DIN rail is zinc with clear chromate plated and is available in either 1m (3.28ft.) or 2m (6.56ft.). The aluminum version is available in 1m (3.28ft.). Each simply fasten by screws to the mounting surface - no special brackets or hardware are needed. Terminal blocks easily snap on to rail.

CODE	DESCRIPTION	PCS./PKG.	LIST/PC.
PLATED STEEL			
DRMR3	DIN Rail 1 Meter (35mm x 7.5mm)	1	\$ 9.70
DRMR6	DIN Rail 2 Meters (35mm x 7.5mm)	10	\$19.20
DRMR3D	DIN Rail 1 Meter (35mm x 15mm)	1	\$14.40
DRMR6D	DIN Rail 2 Meters (35mm x 15mm)	10	\$27.60
ALUMINUM			
DRMR3A	DIN Rail 1 Meter (35mm x 7.5mm)	1	\$16.80

2 POINT JUMPER

Our 2-Point Jumper connects two adjacent HDTB terminals, offering a durable and easy-to-install solution that simplifies wiring setups.

ELECTRONIC TIMING RELAYS

c3controls Series ETR Electronic Timing Relays include a variety of devices with single, dual, and multi-functions and timing ranges from 0.01 seconds to 9,999 hours to satisfy the most basic to highly complex timing applications. Their compact size (17.5mm, 22.5mm, and 45mm wide) and DIN Rail, Panel, Socket, and enclosure door mounting flexibility ensures they can be installed in virtually any control panel. Devices are available with multi-voltage supply design to help reduce inventory requirements.

ELECTRONIC TIMING RELAYS

c3controls offers a comprehensive line of Electronic Timing Relays, just one example of our superior products designed and manufactured to meet the needs of the machine builder. Check out all the features of our Series ETR timing relays below!

COMPACT AND EFFICIENT TIMING RELAYS FOR SUPERIOR ACCURACY.

✓ Proven	Our electronic timing relays meet UL and IEC Standards requirements making them suitable for use in global applications.   
✓ Various Sizes	Our product line includes timing relays in 17.5mm, 22.5mm, and 45mm form factors.
✓ Wide Range of Operation	Wide variety of operating modes satisfies virtually any application: ON-Delay, Interval Delay, Pulse Output, Cycle (ON/OFF), Delay on Make/Delay on Break, and more.
✓ Compact Size	Compact design—reduces panel space requirements and is interchangeable with commonly available timing relays.
✓ Tripping Accuracy	Our ETRs feature a repeat tripping accuracy of 0.5%, with an accuracy of 0.05% in our 45mm Digital ETR, for precise control application performance.
✓ Superior Protection	The IP20 terminals guard against accidental contact with live parts for enhanced protection.
✓ Secure Installation	Quick and simple installation on a 35mm DIN Rail or panel mounted in high-vibration applications.
✓ Multi-Voltage Capability	Most ETRs accept a range of voltage supply inputs. (see Selection Table or individual ETR model for capabilities)
✓ AC/DC Load Switching	Our ETRs feature hard contact outputs.
✓ Digital Features	Our 45mm Digital ETR includes an intuitive key pad that allows programming from the front of the timing relay, and timing ranges from 0.01 seconds to 9999 hours.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

c3controls has proven time and time again to have better product availability and customer service than most of the larger companies we work with.

UNIQUE PRODUCT LINE FEATURES

CONVENIENT OPERATION

Easily select operating modes and timing ranges with accessible setting dials and DIP switches.

TRANSPARENT COVER

We've protected the DIP switches with a transparent cover that keeps out dust and other contaminants and allows you to see the switch settings.

QUICK TROUBLESHOOTING

Power ON and relay ON LED indicators make troubleshooting effortless.

CLEAR MARKINGS

We've clearly marked the terminals, operating modes and DIP switches, and imprinted connection diagrams to reduce downtime when commissioning and wiring during installation and while troubleshooting.

DIGITAL ADVANTAGES

Our 45mm Digital Electronic Timing Relays feature various timing and reset modes, 2 set points, programmable gate/pulse start input, batch counting, up and down counting, a 10 year memory retention, and password protection.

SOME OF OUR POPULAR CONFIGURATIONS:

17.5MM MULTI-FUNCTION — 10 RANGE ELECTRONIC TIMING RELAYS

CATALOG NUMBER	DESCRIPTION	LIST
ETR-D17MF1-03H-1CMV4	17.5mm Multi-Function, 10 Range Electronic Timing Relay, Maximum Timing Range: 3 Hours, SPDT, 12 ~ 240V AC/DC (AC: 50/60 Hz)	\$56.00

17.5MM MULTI-FUNCTION—10 RANGE ELECTRONIC TIMING RELAYS

This c3controls Series ETR Electronic Timing Relay offers maximum functionality and timing ranges in a compact, 17.5mm (11/16") wide housing. The multi-function (with 13 operating modes) timing relay with its multi-voltage supply design (12V ~ 240V DC and 20V ~ 240V AC) is an ideal solution for more complex applications. Like all of c3controls other products, these devices are UL approved and CE marked, making them suitable for use in global applications. Look and see how the Series ETR Electronic Timing Relays can help you reduce your total installed costs and enhance the performance of your equipment.

Product features include:

- Multi-Function, 10 Range
- Timing ranges from 1 second to 3 hours.
- Wide variety of operating modes to satisfy virtually any control application requirement: ON-Delay (Energize Delay), Interval Delay, Pulse Output, Repeat Cycle Equal (OFF first), Repeat Cycle Equal (ON first), Delay on Break, Delay on Break with Totalize, Delay on Make/Delay on Break, Interval after Break, Interval with Totalize, Latching Relay, Single Shot, and Re-Triggerable Single Shot.
- Repeat tripping accuracy of 0.5% for precise control application performance.
- Accepts multi-voltage supply input from 12V to 240V DC and 20V to 240V AC, reduces inventory requirements.
- Compact design, only 17.5mm (11/16") wide – reduces panel space requirements and is smaller than most commonly available timing relays.
- SPDT hard contact for switching AC (5A @ 250V) and DC (5A @ 24V) loads.
- Fast and easy installation on a 35mm DIN rail reduces installation time and costs.
- IP20 terminals guard against accidental contact with live parts by service personnel.
- UL Approved, CE Marked, and RoHS compliant.

UNIQUE PRODUCT FEATURES

1. User selectable operating modes and timing ranges with convenient, front accessible setting dials.
2. LED indication of Power ON and Relay ON – for fast and easy troubleshooting.
3. Terminals and connection diagrams are clearly marked on the timing relay for easy commissioning, wiring, and troubleshooting – reduces downtime and installation time.

22.5MM DUAL-FUNCTION — 12 RANGE ELECTRONIC TIMING RELAYS

CATALOG NUMBER	DESCRIPTION	LIST
ETR-D22DEI-30H-2CMV1	22.5mm Dual-Function, 12 Range Electronic Timing Relay, Maximum Timing Range: 30 Hours, DPDT, 20 ~ 240V AC (50/60 Hz) and 12 ~ 240V DC	\$84.00

22.5MM ELECTRONIC TIMING RELAYS

These c3controls Series ETR Electronic Timing Relays include a variety of single function, dual-function, and multi-function relays with up to 12 timing ranges in a compact, 22.5mm (7/8") wide housing. This industry standard dimension makes these devices interchangeable with many commonly available electronic timers. Economical, simple dual-function, 12 range relay available for applications with the most basic timing requirements. For applications requiring more special operating modes, Off-Delay and Star (Wye) Delta, timing relays are available. These electronic timing relays are also available with a multi-voltage supply design (20V ~ 240V AC and 12V ~ 240V DC) – enabling inventories to be reduced. Like all of c3controls other products, these devices are UL approved and CE marked, making them suitable for use in global applications. Look and see how the Series ETR Electronic Timing Relays can help you reduce your total installed costs and enhance the performance of your equipment.

Product features include:

- Four versions available:
 - Economical, Dual-Function, 12 Range
 - ON-Delay and Interval Delay
 - Timing ranges from 1 second to 30 hours
 - Single-Function
 - OFF-Delay and Star-Delta (Wye-Delta)
 - Timing ranges – varies by function, refer to the specifications for each timing relay
- Repeat tripping accuracy of 0.5% for precise control application performance.
- Versions available that accept multi-voltage supply input from 20V to 240V AC and 12V to 240V DC, reduces inventory requirements.
- Compact design, only 22.5mm (7/8") wide – reduces panel space requirements and is interchangeable with commonly available timing relays.
- SPDT and DPDT hard contacts for switching AC (5A @ 250V) and DC (5A @ 24V) loads.
- Fast and easy installation on a 35mm DIN rail or panel mounting for high vibration applications – reduces installation time and costs.
- IP20 terminals guard against accidental contact with live parts by service personnel.
- UL Approved, CE Marked, and RoHS compliant.

UNIQUE PRODUCT FEATURES

1. User selectable operating modes and timing ranges with convenient, front and top accessible setting dials and DIP switches.
2. DIP switches are protected by a cover to prevent the ingress of dust and other contaminants. Cover is transparent so the switch settings can be easily checked.
3. LED indication of Power ON and Relay ON – for fast and easy troubleshooting.
4. Terminals, connection diagrams, operating modes, and DIP switch settings are clearly marked on the timing relay for easy commissioning, wiring, and troubleshooting – reduces downtime and installation time.

SOME OF OUR POPULAR CONFIGURATIONS:**45MM SOCKET MOUNT DUAL-FUNCTION — 12 RANGE ELECTRONIC TIMING RELAYS**

CATALOG NUMBER	DESCRIPTION	LIST
ETR-S45DEI-30H-2CMV1	45mm Socket Mount Dual-Function, 12 Range Electronic Timing Relay, Maximum Timing Range: 30 Hours, DPDT, 20 ~ 240V AC (50/60 Hz) and 12 ~ 240V DC	\$118.00

45MM SOCKET MOUNT DUAL-FUNCTION— 12 RANGE ELECTRONIC TIMING RELAYS

This c3controls Series ETR Electronic Timing Relay offers dual-functions and a timing range up to 30 hours in a compact, 45mm (1-3/4") Wide x 45mm (1-3/4") High (1/16 DIN) housing that can be panel mounted or mounted in an enclosure door, with an 8 pin socket. This industry standard dimension and socket mounting makes these devices interchangeable with many commonly available electronic timers. This economical, simple dual-function, 12 range timing relay is ideal for applications with the most basic timing requirements. Its multi-voltage supply design (20V ~ 240V AC and 12V ~ 240V DC) reduces inventory. Like all of c3controls other products, this device is UL approved and CE marked, making it suitable for use in global applications. Look and see how the Series ETR Electronic Timing Relays can help you reduce your total installed costs and enhance the performance of your equipment.

Product features include:

- Dual Function, 12 Range
 - ON-Delay and Interval Delay
 - Timing range from 1 second to 30 hours
- Repeat tripping accuracy of 0.5% for precise control application performance.
- Accepts multi-voltage supply input from 20V to 240V AC and 12V to 240V DC, reduces inventory requirements.
- Compact design, only 45mm (1-3/4") wide x 45mm (1-3/4") high (1/16 DIN) – reduces panel space requirements.
- DPDT hard contact for switching AC (5A @ 250V) and DC (5A @ 24V) loads.
- UL Approved, CE Marked, and RoHS compliant.

UNIQUE PRODUCT FEATURES

1. User selectable operating modes and timing ranges with convenient, front accessible setting dials and DIP switches.
2. DIP switches are protected by a cover to prevent the ingress of dust and other contaminants. Cover is transparent so the switch settings can be easily checked.
3. LED indication of Power ON and Relay ON – for fast and easy troubleshooting.
4. Fast and easy installation in an 8 pin socket – reduces installation time and costs. The socket can be mounted on a 35mm DIN Rail or panel, or the timing relay can be installed on an enclosure door. See Section 26 Page 24 for 8 pin sockets.
5. Terminals, connection diagrams, operating modes, and DIP switch settings are clearly marked on the timing relay for easy commissioning, wiring, and troubleshooting – reduces downtime and installation time.

CATALOG NUMBER	DESCRIPTION	LIST
ETRD-P45MF2-PR-2XMV3	45mm Multi-Function Digital Electronic Timing Relay, 2 NO (SPST NO Double Break), 85 ~ 270V AC/DC (AC: 50/60 Hz)	\$208.00
ETRD-P45MF2-PR-2XZC	45mm Multi-Function Digital Electronic Timing Relay, 2 NO (SPST NO Double Break), 24V DC	\$208.00

45MM DIGITAL ELECTRONIC TIMING RELAYS

The c3controls Series ETRD Digital Electronic Timing Relays offer maximum functionality and timing ranges from 0.01 seconds to 9,999 hours in a compact, 45mm (1-3/4") Wide x 45mm (1-3/4") High (1/16 DIN) housing. This industry standard dimension makes these devices interchangeable with many commonly available electronic timers. Fully programmable, this multi-function timing relay with its multi-voltage supply design (85V ~ 270V AC/DC) is an ideal solution for the most complex, timing applications. Where precision timing is required, the 0.05% repeat tripping accuracy is sure to satisfy the most demanding application requirements. The attractive, 2 line LED display, and intuitive key pad make programming and monitoring easy. Like all of c3controls other products, these devices are UL approved and CE marked, making them suitable for use in global applications. Look and see how the Series ETRD Digital Electronic Timing Relays can help you reduce your total installed costs and enhance the performance of your equipment.

- Multi-function to satisfy virtually any control application requirement: ON-Delay (Energize Delay), Interval Delay, Cyclic ON First, Cyclic OFF First, Forward-Pause-Reverse, Instantaneous + Delayed, Timer, Batch.
- Timing Ranges from 0.01 seconds to 9999 hours.
- Repeat tripping accuracy of 0.05% for the most precise and exact control application performance.
- Versions available that will accept multi-voltage supply input from 85V to 270V AC/DC, reduces inventory requirements. A fixed voltage, 24V DC version is also available.
- Compact design, only 45mm (1-3/4") wide x 45mm (1-3/4") high (1/16 DIN) – reduces panel space requirements.
- Two (2) SPST (NO) hard contacts for switching AC (5A @ 250V) and DC (5A @ 24V) loads.
- Fast and easy installation in an enclosure door.
- IP20 terminals guard against accidental contact with live parts by service personnel.
- UL Approved, CE Marked, and RoHS compliant.

UNIQUE PRODUCT FEATURES

1. Operating modes and timing ranges are fully programmable, with the intuitive key pad on the front of the timing relay.
2. Advanced timing relay features include:
 - Various Reset Modes: front panel (selectable), remote, and on power interruption
 - 2 Set points
 - Start Input: gate / pulse (programmable)
 - Batch counting
 - Counting Direction: up and down
 - Memory Retention: 10 years
 - Configuration Lock: password protected
3. Easy to read two-line display:
 - Upper: 7 segment Red LED, 0.5"; 4 Digits
 - Lower: 7 segment Green LED, 0.3"; 4 Digits
4. LED indication of relay status and seconds, minutes, and hours – for fast and easy troubleshooting.
5. Terminals, connection diagrams, available supply voltages, and contact ratings are clearly marked on the timing relay for easy commissioning, wiring, and troubleshooting—reduces downtime and installation time.

SPECIFICATIONS:

45MM DIGITAL ELECTRONIC TIMING RELAYS		
	UNITS	
TIMING PERFORMANCE		
Display		Upper: 7 segment Red LED, 0.5"; 4 Digits Lower: 7 segment Green LED, 0.3"; 4 Digits
Time Setting		Front Keypad
Operating Modes		ON-Delay (Energize Delay), Interval Delay, Cyclic ON First, Cyclic OFF First, Forward-Pause-Reverse, Instantaneous + Delayed, Timer, Batch
Set Points		2
Timing Ranges		Seconds: 99.99 / 999.9 / 9999 Minutes : Seconds: 99:59 Minutes: 999.9 / 9999 Hours : Minutes: 99:59 Hours: 999.9 / 9999
Counting Direction		Up/Down
Start Input		Gate / Pulse Start (programmable)
Accuracy		
Repeat		± 0.05% of full scale or 50 msec. whichever is greater
Reset		Front, Remote, Power Interruption (programmable)
Memory		10 Years
Configuration Lock		Password Protected (User-defined)
LED Indication		Relay 1 Status, Relay 2 Status and Timer Units: sec., min., hr.
Output Contact		2 SPST (NO)
ELECTRICAL		
Operating Voltage		85 ~ 270V AC/DC (AC: 50/60 Hz), 24V DC
Operating Voltage Limits	%	85 to 110
Power Consumption	VA	5 Max.
Output Rating		5A @ 250V AC, 24V DC Resistive
ENVIRONMENTAL		
Ambient Operating Temperature	°C / °F	0 to +50 / 32 to +122
Ambient Storage Temperature	°C / °F	-20 to +75 / -4 to +167
Humidity		95% Relative Humidity (Non-condensing)
Altitude	m / ft.	2,000 / 6,528
CONSTRUCTION		
Ingress Protection		
Terminals (Timer Body)		IP20
Exterior Bezel		IP65
Terminal Capacity		
Solid Strand	mm ²	1 x 2.5 ~ 2 x 1.5
Fine Strand	mm ²	1 x 2.5 ~ 2 x 0.75
	AWG	14 ~ 18
Tightening Torque	Nm	0.8
	Lb-in.	7.0
Weight	g	175
	oz.	6.2
ROHS COMPLIANCE		
For RoHS Compliance documentation by product, refer to www.c3controls.com		

OPERATING MODES:

FUNCTION: ON DELAY, INTERVAL

FUNCTION: INSTANTANEOUS + DELAYED AT POWER ON

FUNCTION: CYCLIC ON FIRST, CYCLIC OFF FIRST

FUNCTION: MOTOR REVERSE MODE

FUNCTION: INSTANTANEOUS + DELAYED AT START PULSE

FUNCTION: BATCH MODE

OPERATING MODES:

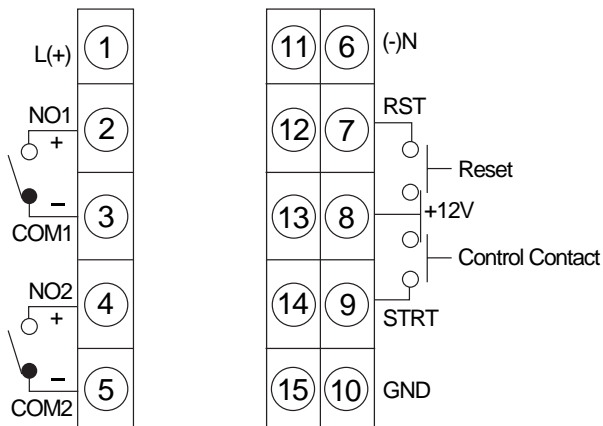

FUNCTION: TYPICAL APPLICATION OF CONTINUOUS START AND RESET IN ON DELAY

FUNCTION: TYPICAL APPLICATION OF GATE START IN ON DELAY

GENERAL PURPOSE RELAYS

c3controls offers a full line of General Purpose Relays (“plug-in” relays), perfect for your control logic applications. Quick and economical to install, our relays allow for easy maintenance and assembly, and come in a variety of base configurations.

GENERAL PURPOSE RELAYS

Every c3controls product is designed and manufactured to meet the needs of the machine builder, including our comprehensive line of General Purpose Relays. Check out all the features of our Series GR below!

QUICK AND ECONOMICAL—PERFECT FOR ALL YOUR CONTROL LOGIC APPLICATIONS.

✓ Proven	Our general purpose relays meet UL, CSA and IEC standards requirements making them suitable for use in global applications.   
✓ Multiple Styles	Our line of General Purpose Relays are available in Octal Base, Square Base, Flange Mounted, and Miniature.
✓ Convenient Customization	Pin and blade terminal styles are interchangeable with other commonly available relays.
✓ Easy Reference	Schematic diagrams and terminal markings are located right on the relay for easy reference during installation.
✓ Power Savings	Low coil consumption minimizes transformer and power supply requirements.
✓ Transparent Housing	Allows you to see switching operations and the condition of the contacts.
✓ Wide Range of Specifications	Pole combinations are available in SPDT, DPDT, 3PDT, 4PDT with a carrying current rating of 5A-25A.
✓ Environmentally Safe	Our AgNi contacts are cadmium free and environmentally friendly.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

*See c3controls Terms & Conditions

“

For years, c3controls has helped us meet the rigorous specifications for quality and performance on all of our systems, while also providing us superior service and delivery.

”

Brandon Durar, President • **JonRie InterTech, LLC**

Square Base Relay with Blade Terminals

Octal Base Relay with Pin Terminals

Miniature Slim Line Square Base Relay with Blade Terminals

UNIQUE PRODUCT LINE FEATURES

MECHANICAL ACTUATOR

Optional mechanical actuator and indicating light for checking the control circuit operation without energizing the relay.

QUICK IDENTIFICATION

Tape wound coils are marked with the coil voltage and our optional indicating lights are color coded, red for AC and green for DC.

FLANGE MOUNTED RELAY

Flange mounting eliminates the need for a socket resulting in lower installation costs.

OCTAL BASE RELAYS WITH PIN TERMINALS

- DPDT and 3PDT for control circuit application flexibility.
- 10A, DPDT and 10A, 3PDT.
- AC and DC coils.
- Pin terminals are interchangeable with other commonly available relays.
- Tape wound coils are marked with the coil voltage for easy identification.
- AgNi contacts, environmentally friendly - cadmium free.
- 100% tested to ensure performance to specification.
- Mechanical actuator provided as standard for checking the control circuit operation without energizing the relay.
- Optional indicating light (red for AC, green for DC) to easily determine the relay status.
- Schematic diagram and terminal markings on the relay for easy reference during installation.
- Low coil consumption to minimize transformer and power supply requirements.
- cURus and CE for acceptance in global applications.
- Transparent housing to visually monitor switching operations and contact condition.

IT'S EASY TO BUILD YOUR OWN RELAY

Simply pick the code number from each of the sections below and combine them to build your part number.

Octal Base Relay w/Pin Terminals

GPRS-P I II III - IV

Example: To build one of our most popular Relays, the part number would be **GPRS-P + II + III + IV** or **GPRS-P3C10C-1**

I. RELAY TYPE

CODE	DESCRIPTION	LIST
GPRS-P	General Purpose Relay w/Pin	\$14.00

II. POLES & CURRENT RATING

CODE	DESCRIPTION	LIST
2C10	DPDT, 10A (8 Pin)	—
3C10	3PDT, 10A (11 Pin)	\$ 1.60

III. COIL VOLTAGES

CODE	DESCRIPTION
C	24V AC (for 3PDT only)
F	240V AC (for 3PDT only)
ZC	24V DC (for 3PDT only)
ZJ	48V DC
ZD	110V DC

IV. ACTUATOR OPTIONS

CODE	DESCRIPTION	LIST
1	Mechanical Actuator (included)	—
3	Light & Mechanical Actuator*	\$ 2.00

*NOTE: Not an option for 3C10 when 24V DC or 110V DC is chosen.

Relays available in convenient multi-packs, consult factory for details.

COMPATIBLE SOCKETS

RELAY TYPE	COMPATIBLE SOCKETS
GPRS-P2C10**	GPRA-SP08G1 with IP20 Guarded Terminals or GPRA-SP08U1 with Open Style Terminals
GPRS-P3C10**	GPRA-SP11G1 with IP20 Guarded Terminals or GPRA-SP11U1 with Open Style Terminals

NOTE: **Represents the Coil Voltage Code. Refer to Chart III *Coil Voltage* above.
See page 24 for socket information.

Operating Humidity	35% to 85% RH (Recommended)				
Unit Weight (2 ~ 3 Pole Relay)	90g (3.2oz.)				
Relay and Socket Dimensions	See outline drawings on pages 27 - 32				
MATERIALS & CONSTRUCTION					
Contacts	AgNi Alloy				
Plated Brass Terminations	Cadmium Free				
Solder Connections	Lead Free				
Moldings	Thermoplastic and Thermoset				
ROHS COMPLIANCE	For RoHS compliance documentation by product, refer to www.c3controls.com				

FLANGE MOUNTED RELAYS WITH BLADE TERMINALS

- DPDT and 3PDT for control circuit application flexibility.
- 25A, DPDT and 20A, 3PDT.
- 3/4HP @ 120V AC, 1HP @ 240V AC.
- AC and DC coils.
- Flange mounting eliminates the need for a socket resulting in lower installed cost.
- Blade terminals (1/4") accept commonly available fast-on connectors.
- Tape wound coils are marked with the coil voltage for easy identification.
- AgNi contacts, environmentally friendly - cadmium free.
- Low coil consumption to minimize transformer and power supply requirements.
- cURus and CE for acceptance in global applications.
- Transparent housing to visually monitor switching operations and contact condition.
- 100% tested to ensure performance to specification.

IT'S EASY TO BUILD YOUR OWN RELAY

Simply pick the code number from each of the sections below and combine them to build your part number.

Flange Mounted Relay w/Blade Terminals

GPRF-T **I** **II** **III**

Example: To build one of our most popular Relays, the part number would be **GPRF-T + II + III** or **GPRF-T2C25ZC**

I. RELAY TYPE

CODE	DESCRIPTION	LIST
GPRF-T	General Purpose Relay w/Blade	\$17.00

II. POLES & CURRENT RATING

CODE	DESCRIPTION	LIST
2C25	DPDT, 25A (8 Blade)	—
3C20	3PDT, 20A (11 Blade)	\$ 1.20

III. COIL VOLTAGES

CODE	DESCRIPTION
C	24V AC
D	120V AC
F	240V AC
ZC	24V DC (for 3PDT only)
ZD	110V DC (for DPDT only)

Relays available in convenient multi-packs, consult factory for details.

MINIATURE SQUARE BASE RELAYS w/BLADE TERMINALS

- DPDT and 4PDT for control circuit application flexibility.
- 5A, DPDT and 5A, 4PDT.
- AC and DC coils.
- Blade terminals are interchangeable with other commonly available relays.
- Tape wound coils are marked with the coil voltage for easy identification.
- AgNi contacts, environmentally friendly - cadmium free.
- Small size requiring minimum panel space for lower installed cost.
- cURus and CE for acceptance in global applications.
- Optional mechanical actuator and indicating light (red for AC and green for DC) for checking the control circuit operation without energizing the relay and to easily determine the relay status.
- Terminal markings on the relay for easy reference during installation.
- Low coil consumption to minimize transformer and power supply requirements.
- Transparent housing to visually monitor switching operations and contact condition.
- 100% tested to ensure performance to specification.

IT'S EASY TO BUILD YOUR OWN RELAY

Simply pick the code number from each of the sections below and combine them to build your part number.

Miniature Square Base Relay w/Blade Terminals

GPRM-B -
I II III IV

Example: To build one of our most popular Relays, the part number would be **GPRM-B + II + III + IV** or **GPRM-B2C05D**

I. RELAY TYPE

GENERAL PURPOSE PIN & BLADE RELAY SOCKETS

- DIN rail mounting for fast and easy installation.
- IP20 guarded terminals to prevent accidental contact with live parts.
- Combination head (+/-) terminal screws accept straight, phillips, or pozidrive screwdrivers.
- cURus and CE for acceptance in global applications.
- Open style terminals to accept ring tongue terminals.
- Panel mounting for secure installation in high vibration and shock installations.
- Break resistant polycarbonate or glass-filled nylon.

GENERAL PURPOSE RELAYS

c3controls offers a full line of General Purpose Relays (“plug-in” relays), perfect for your control logic applications. Quick and economical to install, our relays allow for easy maintenance and assembly, and come in a variety of base configurations. Options include LED indicators and manual lockable push buttons among others. Our relays meet UL, CSA, and IEC standards requirements making them suitable for global applications.

GENERAL PURPOSE RELAYS

Every c3controls product is designed and manufactured to meet the needs of the machine builder, including our comprehensive line of General Purpose Relays. Check out all the features of our Series 200 and 210 below!

QUICK AND ECONOMICAL—PERFECT FOR ALL YOUR CONTROL LOGIC APPLICATIONS.		
✓ Proven	Our relays meet UL, CSA, and IEC standards requirements making them suitable for global applications.	
✓ Multiple Styles	Our line of General Purpose Relays are available in Octal Base with pin terminals and Square Base with blade-style terminals.	
✓ Convenient Customization	Our Series 210 Octal Base relays with pin style terminals are interchangeable with other commonly available relays.	
✓ Easy Reference	Schematic diagrams and terminal markings are located on the relay for easy reference during installation.	
✓ Transparent Housing	Allows you to see switching operations and the condition of the contacts.	
✓ Wide Range of Specifications	Various pole combinations, such as SPDT, DPDT, 3PDT, and 4PDT, are in stock for same-day delivery, featuring a current rating up to 10A. Additionally, SPST, DPST, 3PST, 1 NO + NC contacts, and 1 NO Double break contacts are also offered; however, their availability is contingent on lead time and minimum order quantities.	
✓ Environmentally Safe	Our AgNi contacts are cadmium-free and environmentally friendly.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory and improves cash flow—saving you money. With c3controls any order for standard catalog items received by 6:00 pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

UNIQUE PRODUCT LINE FEATURES

RELIABILITY REDEFINED

Our General Purpose Relays ensure consistent, trouble-free performance for smooth system operation.

ENHANCED CONTROL AND SAFETY

Opt for our manual push button with an indicator for safe circuit checks without relay energization.

QUICK IDENTIFICATION

Relay coil voltages are printed for easy identification. Color-coded push buttons distinguish DC (blue) and AC (red) controls for simplified operation.

MARKING STRIPS

Marking plates at relays and sockets to provide easy identification, improving maintenance efficiency and minimizing errors.

INBUILT RETAINER CLIPS

Built-in plastic retainer clips in relay sockets ensure secure and hassle-free relay installation and replacement.

VERSATILE APPLICATIONS

Our relays seamlessly adapt to industrial, commercial, and residential applications, making them the ideal choice for diverse settings.

SQUARE BASE 1 POLE RELAYS WITH BLADE TERMINALS

- SPDT and SPST relays with a 10A rating provide flexibility for control circuit applications.
- Coil voltages printed on top of relays for easy identification, ensuring the right choice for your application.
- Our color-coded push buttons simplify operation by clearly distinguishing between DC (blue) and AC (red) controls.
- Comprehensive selection of coil voltages, ranging from 12V to 230V AC and 12V to 110V DC.
- Low coil consumption to minimize transformer and power supply requirements.
- Transparent housing designed for visual observation of switching mechanisms and contact points, allowing for real-time assessment of operational and wear status.
- Small size requiring minimum panel space for lower installed cost.
- Schematic diagram and terminal markings on the relay for easy reference during installation.
- Optional manual and lockable push button and LED indicator for checking the control circuit operation without energizing the relay and to easily determine the relay status.
- 100% tested to ensure performance to specification.
- UL, CSA and CE for acceptance in global applications.
- AgNi contacts, environmentally friendly - cadmium-free.

IT'S EASY TO BUILD YOUR OWN RELAY

Simply pick the code number from each of the sections below and combine them to build your part number.

SQUARE BASE 4 POLE RELAYS WITH BLADE TERMINALS

- 4PDT relays with a 6-amp rating offer flexibility for control circuit applications.
- Coil voltages printed on top of relays for easy identification, ensuring the right choice for your application.
- Our color-coded push buttons simplify operation by clearly distinguishing between DC (blue) and AC (red) controls.
- Comprehensive selection of coil voltages, ranging from 6V to 230V AC and 12V to 220V DC.
- Low coil consumption to minimize transformer and power supply requirements.
- Transparent housing designed for visual observation of switching mechanisms and contact points, allowing for real-time assessment of operational and wear status.
- Small size requiring minimum panel space for lower installed cost.
- Schematic diagram and terminal markings on the relay for easy reference during installation.
- Optional manual and lockable push button and LED indicator for checking the control circuit operation without energizing the relay and to easily determine the relay status.
- 100% tested to ensure performance to specification.
- UL, CSA and CE for acceptance in global applications.
- AgNi contacts, environmentally friendly - cadmium-free.

IT'S EASY TO BUILD YOUR OWN RELAY

Simply pick the code number from each of the sections below and combine them to build your part number.

Square Base 4 Pole Relay with Blade Terminals

200-GP 4C 06 |
I II III IV V

Example: To build one of our most popular Relays, the part number would be **200-GP + 4C + 06 + IV + V** or **200-GP4C06LPC**

I. RELAY TYPE

CODE	DESCRIPTION
200-GP	General Purpose Relay

II. POLES / CONTACT TYPE

CODE	DESCRIPTION	LIST
4C	4PDT (4 C/O)	\$11.20

III. CURRENT RATING

CODE	DESCRIPTION
06	6 Amps

IV. OPTIONS

GENERAL PURPOSE PIN & BLADE RELAY SOCKETS

- DIN rail mounting for fast and easy installation.
- IP20 guarded terminals to prevent accidental contact with live parts.
- Combination head (+/-) terminal screws accept straight, phillips, or pozidrive screwdrivers.
- UL, CSA and CE for acceptance in global applications.
- Open style terminals to accept ring tongue terminals.
- Panel mounting for secure installation in high vibration and shock installations.

5 & 8 BLADE OPEN & BOX TYPE SOCKETS

5 BLADE SOCKETS FOR SQUARE BASE 1 POLE RELAYS, 10A

CODE	DESCRIPTION	LIST
200-SB05100	5 Blade 10 Amp Screw Clamp Terminals (Guarded)	\$ 6.00
200-SB0510B	5 Blade 10 Amp Box Terminal*	\$ 6.00

*NOTE: Not available for same-day shipping. Please contact our Customer First Team for lead times and minimum order quantities.

SPECIFICATIONS:

Nominal Load:	10A /250 V
Insulation:	Di-electric strength, 1 minute
Between Contact and Coil:	5 kV
Between All Terminals and DIN Rail:	5 kV
Between Adjacent Terminals:	3 kV

Brass Tin Plated Screw:

Maximum Screw Torque:	1.2 Nm
Screw Dimensions:	M3, Pozi

Wire In Lets Capacity:

Solid Wire:	4mm ² or 2x2.25mm ²
Multi Core:	22-14 AWG
Ferrule Tip Terminals:	4mm ²
Weight Approximately:	28 gms

ROHS COMPLIANCE: For documentation by product, refer to c3controls.com.

FOR USE WITH:

RELAY: 200-GP1C10** & 200-GP1X10**

NOTE: **Represents the Options and Coil Voltage Codes. Refer to page 4 for codes.

11 PIN SOCKET FOR OCTAL BASE 3 POLE RELAYS, 10A

CODE	DESCRIPTION	LIST
210-SP1110B	11 Pin 10 Amp Box Terminal	\$ 6.00

SPECIFICATIONS:

Nominal Load:	10A @ 250 V
Insulation:	Di-electric strength, 1 minute
Between Contact and Coil:	2.5 kV
Between All Terminals and DIN Rail:	2.5 kV
Between Adjacent Terminals:	2.5 kV

Brass Tin Plated Screw:

Maximum Screw Torque:	0.5 Nm
Screw Dimensions:	M3, Pozi

Wire In Lets Capacity:

Solid Wire:	4mm ² or 2x2.25mm ²
Multi Core:	22-14 AWG
Ferrule Tip Terminals:	4mm ²
Weight Approximately:	47 gms

ROHS COMPLIANCE: For documentation by product, refer to c3controls.com.

FOR USE WITH:

RELAY: 210-GP3X10** & 210-GP3C10**

NOTE: **Represents the Options and Coil Voltage Codes. Refer to page 12 for codes.

TERMINAL BLOCK RELAYS

c3controls Terminal Block Relays are designed to meet your control and automation system requirements, which need reliable, safe connections as well as isolation between electronic controls and process I/O. Due to their unmatched size, flexibility, and various other features, terminal block relays can help you save money and premium panel space. Just look and see what Series TBR has to offer!

TERMINAL BLOCK RELAYS

c3controls line of Terminal Block Relays were designed and manufactured to meet the needs of the machine builder. We promise durable products at a price that gives you an edge. Check out all the features of our Series TBR Terminal Block Relays below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Terminal Block Relays are UL Recognized and CE marked, meeting global standards requirements.	
✓ Ultra Compact Size	Only 6.2mm width for a Single-Pole, Double-Throw relay, allowing you to control more devices and use less space.	
✓ Flexibility	Pluggable relay attached on the socket can be replaced in case of malfunction, providing flexibility for repair or maintenance work.	
✓ Secure Installation	Quick and simple snap-on installation on a 35mm DIN Rail.	
✓ Clear Visibility	LED indication allows you to see the contact status of the relay, making it very helpful in troubleshooting.	
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the side of the device for easy reference during installation.	
✓ Added Safety	Terminals are IP20 rated, guarding against accidental contact with live parts. The pluggable relay is also IP67 rated making it reliable in extreme conditions.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

UNIQUE PRODUCT LINE FEATURES

SUPER BRIGHT LED

Highly visible LED on each unit gives indication of the relay's operating state.

PLUGGABLE RELAY

The marker base functions as a lever for installing or replacing the relay in case of troubleshooting or malfunction.

ADDED RELIABILITY & SAFETY

IP20 rated captive screw terminals provide reliability, ease of wiring, and much needed protection against accidental contact with live parts.

EASY REFERENCE

All necessary installation markings including wire size and torque are available on the side of each terminal block relay.

QUICK IDENTIFICATION

Marking system allows for fast and easy circuit identification. A marking strip is pre-supplied on each unit.

ACCESSORIES

Apart from the replacement relay, marker and separator, Series TBR consists of a jumper accessory to eliminate labor intensive wiring work.

TERMINAL BLOCK RELAYS

c3controls Series TBR Terminal Block Relays are designed to meet your control and automation system requirements for a reliable, safe connection as well as isolation between electronic controls and process I/O. Due to their unmatched size, flexibility and various other features, terminal block relays can help you save money and a premium panel space. cRUus and CE Markings make them suitable for use anywhere in the world. Just look and see what the Series TBR has to offer.

Product features include:

- Compact size – Just 6.2mm wide for a Single-Pole, Double-Throw relay rated for a 6A load.
- Standard range of AC and DC operating coils for control circuit applications: 12V, 24V, 110-125V, 220-240V
- LED indication of energized relay for fast and easy troubleshooting.
- Coil surge protection for securing internal circuitry against sudden shut-downs.
- Built-in leakage current suppression circuit to avoid nuisance coil turn-on.
- The marker base functions as a lever for installing or replacing the relay in case of troubleshooting or malfunction.
- Quick and simple installation on a 35mm DIN Rail.
- IP20 rated captive screw terminals provide reliability, ease of wiring, and much needed protection against accidental contact with live parts.
- Highly visible markings for ease of installation, troubleshooting, and maintenance.
- Pre-supplied marking strip on each unit for easy circuit identification.
- Environmentally friendly non-metallic materials are asbestos, halogen, and cadmium free.

INDUSTRIAL POWER SUPPLIES

c3controls' Industrial Power Supplies are the clear choice when it comes to providing a regulated power for not only industrial and commercial loads but also residential applications. Designed to fit in panels of almost all sizes, c3 power supplies range from 60 to 480W, and of course, with all the necessary certifications and compliances.

Check out all the innovative features these power supplies have to offer!

UNIQUE PRODUCT LINE FEATURES

BEST IN CLASS EFFICIENCY

c3controls' Industrial Power Supplies are designed to deliver the power with up to 93% efficiency.

RELIABILITY

Unmatched protection against short circuit, overload, overvoltage and over temperature, along with Auto-recovery functionality.

FLEXIBILITY

Adjustable output voltage from 100 to 116%.

EASY MONITORING

Power supplies from 240W to 480W come with DC OK Relay Contacts to provide status signals to the monitoring system.

COMPACT

Ultra-compact design to save valuable panel space.

ENCLOSED POWER SUPPLIES

c3controls' Series EPS (Enclosed Power Supplies) provides reliable 24VAC power to HVAC controllers in VAV (variable air volume) systems. These assemblies offer a convenient construction consisting of one to two transformers varying in size to provide one to five 24VAC 100VA Class 2 outputs housed within a single metal enclosure. Additionally, these enclosed power supplies provide on/off control, power indication, equipment overcurrent protection, as well as options for voltage separation compartments and convenience receptacle outlets. These versatile products are UL 916 listed ensuring safety and easy acceptance in your application.

ENCLOSED POWER SUPPLIES

c3controls offers a comprehensive line of Enclosed Power Supplies that are designed to provide consistent power to various types of applications. c3controls' Enclosed Power Supplies are a reliable and cost-effective solution for your power supply needs. Check out all the innovative features these Enclosed Power Supplies have to offer.

MANUFACTURED TO DELIVER THE MOST RELIABLE AND QUALITY POWER

✓ Proven	Our Series EPS Enclosed Power Supplies are UL Listed to meet global standards requirements and are compliant with RoHS directives.	 
✓ Secure Installation	Quick and simple installation as the product is prepackaged and the main breaker/switch has access outside the enclosure.	
✓ Multi-Winding Transformers	The transformer has multiple windings that divides the output power to individual outputs, each with 100VA of an available power provided by a 4 ampere circuit breaker and LED indicator.	
✓ Environmentally Secure	Entire assembly comes enclosed in a metal enclosure designed and tested for ensuring operation in extreme temperatures, to keep your application running.	
✓ Visible Certifications	Our product certifications and electrical ratings are clearly marked on the outside of the enclosure for easy reference during installation.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

EPS-S100AC1-120-24-F

EPS-S100AC1-120-24-B

UNIQUE PRODUCT LINE FEATURES

AVAILABILITY OF ACCESSORIES

Each rated enclosed power supply has an option to an accessory outlet available for convenient access to the power receptacle.

INNOVATIVE DESIGN/CONTROLLED AND SECURE OUTPUTS

The transformer steps down the input voltage to 24VAC at the output. Each 24VAC output has its own circuit breaker and ON/OFF switch to control specific outputs.

COMPACT

Ultra-compact design to save valuable space.

ENCLOSURE FEATURES

The enclosure of S300 and S500 have optional separation between high and low voltage. The two separate compartments have different removable covers to access high and low voltage compartments and each being fastened by its own hardware.

UL508A BOTTOM MOUNT VFD BYPASS PANELS

The c3controls' ECP-BP series offers a configurable and UL 508A-listed solution for VFD bypass applications. This series provides a two or three contactor bypass design that seamlessly integrates with various VFD brands for increased flexibility. Available in Type 1 and Type 4 carbon steel enclosures, these panels fit directly below your VFD of choice and are conveniently shaped as tall slim panels to minimize their footprint. c3controls' VFD Bypass Panels come with all the features and benefits of our Series 300 Contactors, Series TB IEC Terminal Blocks, and Series 22mm IEC Pilot Devices. Our Series ECP-BP panels are factory wired with a control transformer saving you time and reducing installation costs.

UL508A BOTTOM MOUNT VFD BYPASS PANELS

All our products are fully certified, rated, and backed by our limited lifetime warranty to meet the needs of the machine builder, and our bypass panels are no exception. Check out the incredible features in the chart below!

DELIVERING SUPERIOR PRODUCT QUALITY AND MANUFACTURING EXCELLENCE

✓ Proven	Our Series ECP-BP Bottom Mount VFD Bypass Panels are UL508A Listed and CE marked meeting global standards requirements.	
✓ Enclosure Flexibility	Our ECP-BP Bottom Mount VFD Bypass Panels are available in two versions of Carbon Steel (Type 1 or Type 3R, 4 & 12).	
✓ Reliable	For enhanced safety and operational reliability, mechanically interlocked contactors ensure a seamless transition between VFD and bypass modes for motor operation.	
✓ Simple Solution	c3controls' Electrical Engineers have designed these bottom mount VFD Bypass Panels specifically for any fan, pump, conveyor, or air handling VFD applications.	
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.	
✓ Quick Shipment	We assemble, test and ship fully assembled and wired panels within 15 days,—and confirm every order ensuring accuracy.	
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

Without Local Bypass Control

With Local Bypass

UNIQUE PRODUCT LINE FEATURES

FACTORY ASSEMBLED AND WIRED

Factory-assembled and wired bypass panels offer the convenience of a single catalog number, resulting in a more efficient bill of materials.

PRE-CONFIGURED

The contactor, disconnect, and transformer selections have been pre-configured based on your fuse size, streamlining the process of ordering and configuring fully assembled panels.

HIGH FAULT SCCR

Configuration options for high fault short circuit current rating of up to 100kA providing safety and reliability in high fault applications.

PRE-WIRED CONTROL CIRCUITS

The bypass panel control circuits come pre-wired with a control transformer that supplies 24VAC power, facilitating straightforward field installation. Additionally, all terminal blocks and wires are clearly labeled for ease of use.

SMALL FOOTPRINT

These slender panels are designed to fit directly beneath your chosen VFD and have been thoughtfully shaped to minimize their footprint.

BOTTOM MOUNT VFD BYPASS PANELS

c3controls Series ECP-BP Bottom Mount VFD Bypass Panels are assembled from our Series 300 Contactors, Series TB IEC Terminal Blocks, and Series 22mm IEC Pilot Devices. Our Series ECP-BP panels are factory wired with a control transformer saving you time and reducing installation costs.

Product features include:

- VFD Bypass Panels offer the convenience of a single catalog number.
- Provides the same great features and benefits as our Series 300 Contactors, Series TB IEC Terminal Blocks, and Series 22mm IEC Pilot Devices.
- Carbon Steel enclosure comes in two versions; Type 1 or Type 3R, 4 & 12.
- Black/Red operating handle can be padlocked in the OFF position for extra safety and security needed during maintenance activities.
- Conveniently placed input and output terminal blocks provide easy access and quick installation.
- Compact panel size resulting in space savings and lower installed costs.

WIRING DUCT

Every product in our portfolio is designed and manufactured to meet the needs of the machine builder, including our rugged line of Wiring Duct. Check out all the features of our Series WD below!

SLEEK AND DURABLE WIRE DUCT FOR SUPERIOR PERFORMANCE IN ANY ENVIRONMENT.

✓ Proven	Our Wire Duct and covers are UL Listed and CE marked, and RoHS compliant for global acceptance. 
✓ Environmentally Secure	Non-flammable (UL94 V-0), rigid PVC won't warp, peel, chip, crack, or become brittle, and resists oil, salt solutions, and fungus for superior performance in any environment.
✓ Simple Installation	Mounting hole patterns with elongated slots comply with DIN 43659 for global installation flexibility.
✓ Vibration Resistant	Restricted slot design ensures that wires are held in place, even when the cover is not installed, allowing for durable performance in high vibration applications.
✓ Mounting Inserts Accepted	Embossed mounting holes accept mounting inserts for installing smaller wiring duct inside larger wiring duct. Mounting inserts can be installed even after the wiring duct is secured to the panel, making it easy and saving you installation time.
✓ Sleek Design	Flush side-wall and duct provide increased wire capacity and a pleasing, finished look.
✓ Easy Identification	Complete catalog number and dimensions printed on the side of the duct for quick identification and utilization.
✓ Safe Handling	Smooth, rounded edges on duct fingers and covers prevent cutting and abrasions to hands and wires.
✓ Limited Lifetime Warranty*	Every product is backed by our limited lifetime warranty—unmatched in the industry—bringing you quality components that perform in the most demanding applications.
✓ Guaranteed Same-Day Shipping*	Product availability reduces inventory, and improves cash-flow—saving you money. With c3controls any order for standard catalog items received by 6:00pm ET is guaranteed to ship same-day.
✓ Advantage Pricing	Our approach to product development, manufacturing, and focus on servicing the OEM and Electrical Equipment Builder reduces cost. The result—the best value in the industry.

“

Like us, c3controls has great people—their customer service representatives are personable and knowledgeable, and I've always remained friends with my sales representative over the years since we began working with c3controls.

”

Dave Welch, President • **Welch Engineering**

Narrow Slot

Wide Slot

Wiring Duct Covers

UNIQUE PRODUCT LINE FEATURES

OPTIONAL ADHESIVE BACKING

Put an end to all the eyeballing with c3controls' optional adhesive. It's an ideal convenience feature that allows you to *temporarily* stick your wiring duct where you want it on the panel before you *permanently* mount it. Just position, press, *then* drill and tap. Now that's convenient.

CONVENIENCE

Snap-off, side wall fingers are scored to easily enlarge slots for any size wire or wire bundle. No tool is required to "snap off" fingers, and scoring ensures clean break-offs, eliminating sharp edges.

FAST WIRE ORGANIZATION

The V-shaped slot lead-in makes wire insertion fast and easy.

NON-SLIP COVER

Interlocking, non-slip cover with two contact points prevents the cover from sliding, even in high vibration applications—and ensures a rigid duct assembly.

CUSTOMIZATION

Two slot types are available to meet your capacity and flexibility needs: Narrow Slot for more precise wiring and Wide Slot for larger wires and bundles.

WIRING DUCT

c3controls Series WD Wiring Duct includes a wide variety of types and options to simplify and optimize your wire/cable management and installation. By using all of the features of the Series WD Wiring Duct, you'll increase your wiring productivity, reduce installation costs, and end up with the most organized and attractive control panels the industry has to offer.

Wiring duct and covers are constructed of rigid, non-flammable (UL94 V-0), polyvinylchloride (PVC) and are RoHS compliant. They're also UL approved and CE marked for global compliance.

Just take a look at the Series WD Wiring Duct to see what it has to offer, and how you might realize the benefits of it in combination with our other outstanding wiring products like Series WTB2 IEC Terminal Blocks, featured in Section 22.

Product features include:

- cURus, CE Marked, and RoHS compliant.
- Wiring duct (and covers) are available in both grey and white to compliment your control panel design and match your company "look and feel."

OPTIONAL ADHESIVE BACKING. CONVENIENT. ACCURATE. FAST.

We've all been there: you measure once, twice, then tap holes to mount a wire duct in your panel and discover you didn't position the holes accurately. Whether they're off by a mile or just a hair, it's a pain.

Put an end to all the eyeballing with c3controls' optional adhesive. It's an ideal convenience feature that allows you to *temporarily* stick your wiring duct where you want it on the panel before you *permanently* mount it. Just position, press, *then* drill and tap. Now that's convenient.

UNIQUE PRODUCT FEATURES

1. V-shaped slot lead-in makes wire insertion fast and easy.
2. Snap-off, side wall fingers are scored to easily enlarge slots for any size wire or wire bundle. Scoring ensures clean break-offs, eliminating sharp edges that can damage wire insulation and abrasions to hands. No tool is required to “snap-off” fingers.
3. Two slot types are available to meet your capacity and flexibility needs, and accept almost any size wire or wire bundle:
 - Narrow Slot** – smaller fingers for more precise wiring
 - Wide Slot** – larger slots for bigger wires and bundles
4. Interlocking, non-slip cover with two contact points prevents the cover from sliding, even in high vibration applications – and ensures a rigid duct assembly.
5. Smooth, rounded edges on duct fingers and covers prevent cutting and abrasions to hands and wires.
6. Flush side-wall and duct provide increased wire capacity and a pleasing, finished look.
7. Restricted slot design ensures that wires are held in place, even when the cover is not installed.
8. Embossed mounting holes accept mounting inserts for installing smaller wiring duct inside larger wiring duct. Mounting inserts can be installed even after the wiring duct is secured to the panel.
9. Mounting hole patterns with elongated slots comply with DIN 43659 for global installation flexibility.
10. Non-flammable (UL94 V-0), rigid PVC won't warp, peel, chip, crack, or become brittle, and resists oil, salt solutions, and fungus for superior performance in even the most demanding industrial environments.
11. Wide variety of sizes to meet your wiring capacity needs:
 - Widths from 25mm (0.98”) to 80mm (3.15”)
 - Heights from 30mm (1.18”) to 100mm (3.94”)
 - Up to 21 width/height combinations in each slot type

IT'S EASY TO BUILD YOUR OWN WIRING DUCT COVER

Simply pick the code number from each of the sections below and combine them to build your part number.

Wiring Duct Covers

WD - B C
I II III IV V

Example: To build one of our most popular Wiring Duct Covers, the part number would be **WD + B + C + IV + V** or **WD-BC40WH**

NOTE: Wiring Duct Covers are provided and included as standard in the Wiring Duct catalog numbers (and list price) configured on pages 4 & 5. Separate covers should be purchased for replacement only.

TECHNICAL REFERENCE

Have a Technical question? Don't worry. Here in the c3controls Technical Reference section, you'll find all the information you need to help you make the right decision for your particular application. From enclosure ratings to hazardous location classifications to pilot duty rating codes, we've got it covered — all in a format that is easy to understand.

Section 38

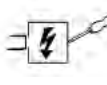

Enclosure Ratings & Hazardous Location Classifications	2
Pilot Device Colors, Meanings and Functions	5
Pilot Duty Rating Codes	8
IEC Utilization Categories	9
Motor Full-Load Currents	10
Formulas & Conversion Factors	11
Electrical Symbols	12

NEMA, UL AND CSA ENCLOSURE RATINGS

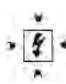

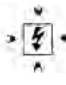

ENCLOSURE TYPES NON-HAZARDOUS LOCATION			
Enclosure Rating	NEMA National Electrical Manufacturers Association (NEMA Standard 250) and Electrical and Electronic Mfg. Association of Canada (EEMAC)	 Underwriters Laboratories Inc. (UL50 and UL508)	 Canadian Standards Association (Standard C22.2 No. 94)
Type 1	Enclosures are intended for indoor use primarily to provide a degree of protection against contact with the enclosed equipment or locations where unusual service conditions do not exist.	Indoor use primarily to provide protection against contact with the enclosed equipment and against a limited amount of falling dust.	General purpose enclosure. Protects against accidental contact with live parts.
Type 3	Enclosures are intended for outdoor use primarily to provide a degree of protection against windblown dust, rain, and sleet; undamaged by the formation of ice on the enclosure.	Outdoor use to provide a degree of protection against windblown dust and windblown rain; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against rain, snow, and windblown dust; undamaged by the external formation of ice on the enclosure.
Type 3R*	Enclosures are intended for outdoor use primarily to provide a degree of protection against falling rain and sleet; undamaged by the formation of ice on the enclosure.	Outdoor use to provide a degree of protection against falling rain; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against rain and snow; undamaged by the external formation of ice on the enclosure.
Type 4	Enclosures are intended for indoor or outdoor use primarily to provide a degree of protection against windblown dust and rain, splashing water, and hose directed water; undamaged by the formation of ice on the enclosure.	Either indoor or outdoor use to provide a degree of protection against falling rain, splashing water, and hose-directed water; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against rain, snow, windblown dust, splashing and hose-directed water; undamaged by the external formation of ice on the enclosure.
Type 4X	Enclosures are intended for indoor or outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, and hose-directed water; undamaged by the formation of ice on the enclosure.	Either indoor or outdoor use to provide a degree of protection against falling rain, splashing water, and hose-directed water; undamaged by the formation of ice on the enclosure; resists corrosion.	Indoor or outdoor use; provides a degree of protection against rain, snow, windblown dust, splashing and hose-directed water; undamaged by the external formation of ice on the enclosure; resists corrosion.
Type 6	Enclosures are intended for use indoors or outdoors where occasional submersion is encountered, limited depth, undamaged by the formation of ice on the enclosure.	Indoor or outdoor use to provide a degree of protection against entry of water during temporary submersion at a limited depth; undamaged by the external formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against the entry of water during temporary submersion at a limited depth. Undamaged by the external formation of ice on the enclosure; resists corrosion.
Type 12	Enclosures are intended for indoor use primarily to provide a degree of protection against dust, falling dirt, and dripping non-corrosive liquids.	Indoor use to provide a degree of protection against dust, dirt, fiber flyings, dripping water, and external condensation of non-corrosive liquids.	Indoor use; provides a degree of protection against circulating dust, lint, fibers, and flyings; dripping and light splashing of non-corrosive liquids; not provided with knockouts.
Type 12K	Enclosures with knockouts are intended for indoor use primarily to provide a degree of protection against dust, falling dirt, and dripping non-corrosive liquids.	Indoor use to provide a degree of protection against dust, dirt, fiber flyings, dripping water, and external condensation of non-corrosive liquids. Knockouts located in the top or bottom walls, or both.	Indoor use; provides a degree of protection against circulating dust, lint, fibers and flyings; dripping and light splashing of non-corrosive liquids; provided with knockouts.
Type 13	Enclosures are intended for indoor use primarily to provide a degree of protection against dust, spraying of water, oil, and non-corrosive coolant.	Indoor use to provide a degree of protection against lint, dust seepage, external condensation and spraying of water, oil, and non-corrosive liquids.	Indoor use; provides a degree of protection against circulating dust, lint, fibers, and flyings; seepage and spraying of non-corrosive liquids, including oils and coolants.

*NFPA 70 (National Electric Code) defines new Type 3RX as providing the same degree of protection as Type 3R, with the addition of protection against corrosive agents.

FIRST NUMERAL			
Protection Against Ingress of Solid Objects			Protection of Persons Against Access to Hazardous Parts with:
IP	Requirements	Example	
0	No protection.		Non-Protected
1	Full penetration of 50mm diameter sphere not allowed. Contact with hazardous parts not permitted.		Back of Hand
2	Full penetration of 12.5mm diameter sphere not allowed. The jointed test finger shall have adequate clearance from hazardous parts.		Finger
3	The access probe of 2.5mm diameter shall not penetrate.		Tool
4	The access probe of 1.0mm diameter shall not penetrate.		Wire
5	Limited ingress of dust permitted (no harmful deposit).		Wire
6	Totally protected against ingress of dust.		Wire

ADDITIONAL LETTER (OPTIONAL)			
Protection Against Ingress of Solid Objects			Protection of Persons Against Access to Hazardous Parts with:
IP	Requirements	Example	
A (For use with first numeral 0)	Penetration of 50mm diameter sphere up to barrier must not contact hazardous parts.		Back of Hand
B (For use with first numerals 0 and 1)	Test finger penetration to a maximum of 80mm must not contact hazardous parts.		Finger
C (For use with first numerals 1 and 2)	Wire of 2.5mm diameter x 10mm long must not contact hazardous parts when spherical stop face is partially entered.		Tool
D (For use with first numerals 2 and 3)	Wire of 1.0mm diameter x 100mm long must not contact hazardous parts when spherical stop face is partially entered.		Wire

SECOND NUMERAL			
Protection Against Harmful Ingress of Water			Protection from Water:
IP	Requirements	Example	
0	No protection.		Non-Protected
1	Protected against vertically falling drops of water. Limited ingress permitted.		Vertically Dripping
2	Protected against vertically falling drops of water with enclosure tilted 15° from the vertical. Limited ingress permitted.		Dripping up to 15° from the Vertical
3	Protected against sprays to 60° from the vertical. Limited ingress permitted.		Limited Spraying
4	Protected against water splashed from all directions. Limited ingress permitted.		Splashing from all Directions
5	Protected against jets of water. Limited ingress permitted.		Hosing Jets from all Directions
6	Protected against strong jets of water. Limited ingress permitted.		Strong Hosing Jets from all Directions
7	Protected against the effects of immersion between 15cm and 1m.		Temporary Immersion
8	Protected against long periods of immersion under pressure.		Continuous Immersion

NEMA/IEC ENCLOSURE RATINGS & HAZARDOUS LOCATION CLASSIFICATIONS

NEMA ENCLOSURE TYPE RATINGS / IEC ENCLOSURE IP RATINGS

CONVERSION OF NEMA ENCLOSURE TYPE RATINGS TO IEC 60529 ENCLOSURE CLASSIFICATION DESIGNATIONS (IP) (CANNOT BE USED TO CONVERT IEC CLASSIFICATION DESIGNATIONS TO NEMA TYPE RATINGS)

IP FIRST CHARACTER	NEMA ENCLOSURE TYPE													IP SECOND CHARACTER
	1	2	3	3R	3S	4	4X	5	6	6P	12	12K	13	
IP0_														IP_0
IP1_														IP_1
IP2_														IP_2
IP3_														IP_3
IP4_														IP_4
IP5_														IP_5
IP6_														IP_6
														IP_7
														IP_8
	A	B	A	B	A	B	A	B	A	B	A	B	A	B

A = A shaded block in the "A" column indicates that the NEMA Enclosure Type exceeds the requirements for the respective IEC 60529 IP First Character Designation.

The IP First Character Designation is the protection against access to hazardous parts and solid foreign objects.

B = A shaded block in the "B" column indicates that the NEMA Enclosure Type exceeds the requirements for the respective IEC 60529 IP Second Character Designation.

The IP Second Character Designation is the protection against the ingress of water.

Examples of Table Use:

An IEC IP45 Enclosure Rating is specified. What NEMA Type Enclosures meet and exceed the IP45 rating?

Referencing the first character, 4, in the IP rating and the row designated "IP4_" in the leftmost column in the table; the blocks in Column "A" for NEMA Types 3, 3S, 4, 4X, 5, 6, 6P, 12, 12K and 13 are shaded. These NEMA ratings meet and exceed the IEC protection requirements against access to hazardous parts and solid foreign objects. Referencing the second character, 5, in the IP rating and the row designated "IP_5" in the rightmost column in the table; the blocks in Column "B" for NEMA Type 3, 3S, 4, 4X, 6 and 6P are shaded. These NEMA ratings meet and exceed the IEC requirements for protection against the ingress of water. The absence of shading in Column "B" beneath the "NEMA Enclosure Type 5" indicates that Type 5 does not meet the IP45 protection requirements against the ingress of water. Likewise, the absence of shading Column "B" for NEMA Type 12, 12K and 13 enclosures indicates that these enclosures do not meet the IP45 requirements for protection against the ingress of water. Only Type 3, 3S, 4, 4X, 6 and 6P have both Column "A" in the "IP4_" row and Column "B" in the "IP_5" row shaded and could be used in an IP45 application.

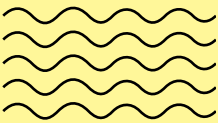

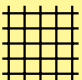

The NEMA Enclosure Type 3 not only meets the IP45 Enclosure Rating, but also exceeds the IEC requirements because the NEMA Type requires an outdoor corrosion test; a gasket aging test; a dust test; an external icing test; and no water penetration in the rain test. Slight differences exist between the IEC and NEMA test methods, but the IEC rating permits the penetration of water if "it does not deposit on insulation parts, or reach live parts." The IEC rating does not require a corrosion test; gasket aging test; dust test or external icing test. Because the NEMA ratings include additional test requirements, this table cannot be used to select IP Designations for NEMA rated enclosure specifications.

IEC 60529 specifies that an enclosure shall only be designated with a stated degree of protection indicated by the first characteristic numeral if it also complies with all lower degrees of protection. Furthermore, IEC 60529 states that an enclosure shall only be designated with a degree of protection indicated by the second characteristic numeral if it also complies with all lower degrees of protection up to and including the second characteristic numeral 6. An enclosure designated with a second characteristic numeral 7 or 8 only is considered unsuitable for exposure to water jets (designated by second characteristic numeral 5 or 6) and need not comply with requirements for numeral 5 or 6 unless it is dual coded. Since the IEC protection requirements become more stringent with increasing IP character value up through 6, once a NEMA Type rating meets the requirements for an IP designation up through 6, it will also meet the requirements for all lower IP designations. This is apparent from the shaded areas shown in the table.

HAZARDOUS LOCATION CLASSIFICATIONS

SUMMARY OF CLASSIFICATION CHART

CLASS	DIVISION	GROUP
I. Gas 	1. Hazard May Exist May exist in atmosphere under normal operating conditions.	A. Acetylene
		B. Hydrogen and Manufactured Gases Containing Hydrogen
		C. Petrochemicals (e.g. Ethylene)
		D. Petrochemicals (e.g. Alcohol)
	2. Potential Hazard A. May be present in atmosphere only under abnormal circumstances. B. Location adjacent to Division 1 location.	A. Acetylene
		B. Hydrogen and Manufactured Gases Containing Hydrogen
		C. Petrochemicals (e.g. Ethylene)
		D. Petrochemicals (e.g. Alcohol)
II. Dust 	1. Hazard May Exist May exist in atmosphere under normal operating conditions.	E. Conductive and Combustible Dust (e.g., Aluminum, Magnesium)
		F. Carbonaceous Dust (e.g., Coal)
		G. Non-Conductive Combustible Dust (e.g., plastic, chemical, food, grain)
III. Fibers 	1. Production Areas	Easily Ignitable Fibers or Flyings
	2. Handling and Storage Areas	Easily Ignitable Fibers or Flyings

PUSH BUTTON COLORS

COLOR-CODING FOR PUSH BUTTON ACTUATORS AND THEIR MEANINGS

COLOR	MEANING	EXPLANATION	EXAMPLES OF APPLICATION
RED	Emergency	Actuate in the event of a hazardous condition or emergency	Emergency Stop Initiation of emergency function
YELLOW	Abnormal	Actuate in the event of an abnormal condition	Intervention to suppress abnormal condition Intervention to restart an interrupted automatic cycle
GREEN	Normal	Actuate to initiate normal conditions	(See following table)
BLUE	Mandatory	Actuate for a condition requiring mandatory action	Reset function
WHITE	No specific meaning assigned	For general initiation of functions except for emergency stop (see note)	START/ON (preferred) STOP/OFF
GREY			START/ON STOP/OFF
BLACK			START/ON STOP/OFF (preferred)

NOTE: Where a supplemental means of coding (e.g. shape, position, texture) is used for the identification of push button actuators, then the same color WHITE, GREY, or BLACK may be used for various functions (e.g. WHITE for START/ON and for STOP/OFF actuators).

COLORS OF TYPICAL PUSH BUTTON OPERATORS, BY FUNCTION

ACTUATOR FUNCTION	SHALL BE USED	SHOULD BE USED	PREFERRED COLOR	PERMITTED COLOR	SHALL NOT BE USED
START/ON	—	White, Grey, or Black	White	Green	Red
Emergency Stop and Emergency Switching OFF	Red	—	—	—	—
STOP/OFF	—	Black, Grey, or White	Black	Red	Green
Push Button Actuators that alternately act as START/ON and STOP/OFF	—	—	White, Grey, or Black	—	Red, Yellow, or Green
Push Button Actuators that cause operation while they are actuated and cease the operation when they are released (ex. Hold-to-Run)	—	—	White, Grey, or Black	—	Red, Yellow, or Green
Reset Push Buttons	Blue, White, Grey, or Black	—	—	—	Green
Reset Push Buttons that also act as a STOP/OFF button	—	Blue, White, Grey, or Black	Black	—	Green

INDICATOR LIGHT COLORS

Indicator lights and displays serve to give the following types of information:

- Indication – to attract the operator's attention or to indicate that a certain task should be performed. The colors RED, YELLOW, GREEN, and BLUE are normally used in this mode.
- Confirmation – to confirm a command, or a condition, or to confirm the termination of a change or transition period. The colors BLUE and WHITE are normally used in the mode and GREEN may be used in some cases.
- Unless otherwise agreed to between the supplier and user, indicator (pilot) light lenses shall be color-coded with respect to the condition (status) of the machine in accordance with the following table.

COLORS FOR INDICATOR LIGHTS AND THEIR MEANINGS WITH RESPECT TO THE CONDITION OF THE MACHINE

COLOR	MEANING	EXPLANATION	ACTION BY OPERATOR
RED	Emergency	Hazardous condition	Immediate action to deal with hazardous condition (e.g. by operating emergency stop)
YELLOW	Abnormal	Abnormal condition Impending critical condition	Monitoring and/or intervention (e.g. by re-establishing the intended function)
GREEN	Normal	Normal condition	Optional
BLUE	Mandatory	Indication of a condition that requires action by the operator	Mandatory action
WHITE	Neutral	Other conditions; may be used whenever doubt exists about the application of RED, YELLOW, GREEN, BLUE	Monitoring

NOTE: Alternative meanings to those defined in the preceding table may be assigned in accordance with one of the following criteria: the safety of persons and the environment, and the state of the electrical equipment.

CONDUCTOR COLORS

IEC 60204-1: COLORS OF CONDUCTORS, BY CONDUCTOR TYPE

CONDUCTOR TYPE	COLOR SHALL BE USED	RECOMMENDED COLOR
Ground/Earth	GREEN and YELLOW	—
Neutral	LIGHT BLUE	—
AC and DC Power Circuits	—	BLACK
AC Control Circuits	—	RED
DC Control Circuits	—	BLUE
Interlock Control Circuits Supplied from an External Power Source	—	ORANGE

NOTE: Where color-coding is used for the identification of conductors, the following colors may be used: BLACK, BROWN, RED, ORANGE, YELLOW, GREEN, BLUE (including LIGHT BLUE), VIOLET, GREY, WHITE, PINK, and TURQUOISE.

Source: IEC 60204-1, Safety of Machinery, Electrical Equipment of Machines, Part 1 General Rules

NFPA 79: COLORS OF CONDUCTORS, BY CONDUCTOR TYPE

CONDUCTOR TYPE	COLOR
Ground (protective bonding)/Earth	GREEN with or without one or more YELLOW stripes
AC Circuit with a grounded conductor	WHITE, GREY or three continuous WHITE stripes on other than GREEN, BLUE, ORANGE, or YELLOW insulation
Grounded DC circuit conductor (current carrying)	WHITE with BLUE stripe
Grounded (current carrying) circuit conductor which remains energized when the main disconnecting means is in the OFF position	WHITE with ORANGE stripe or WHITE with YELLOW stripe
Ungrounded circuit conductors that remain energized when the supply disconnecting means is in the OFF position	ORANGE or YELLOW
Ungrounded line, load, and control conductors at line voltage	BLACK
Ungrounded AC control conductors at less than line voltage	RED
Ungrounded DC control conductors	BLUE

D150	1.0	3.60	0.60	—	—	—	—	—	—	4.32	72
D300	1.0	3.60	0.60	1.80	0.30	—	—	—	—	4.32	72
E150	0.5	1.80	0.30	—	—	—	—	—	—	216	36

^a The numerical suffix designates the maximum voltage design values, which are to be 600, 300, and 150 volts for suffixes 600, 300, and 150, respectively. The test voltage is to be 600, 240, or 120 volts.

^b For maximum ratings at voltages between the maximum design value and 120 volts, the maximum make and break ratings are to be obtained by dividing the volt-amperes rating by the application voltage. For voltages below 120 volts, the maximum make current is to be the same as for 120 volts, and the maximum break current is to be obtained by dividing the break volt-amperes by the application voltage, but these currents are not to exceed the thermal continuous test current.

RATING CODES FOR DC CONTROL-CIRCUIT CONTACTS

CONTACT RATING CODE DESIGNATION ^a	THERMAL CONTINUOUS TEST CURRENT AMPERES	MAXIMUM MAKE OR BREAK ^b CURRENT, AMPERES			MAXIMUM MAKE OR BREAK VOLT-AMPERES AT 300 VOLTS OR LESS
		125 VOLT	250 VOLT	301 TO 600 VOLT	
N150	10	2.2	—	—	275
N300	10	2.2	1.1	—	275
N600	10	2.2	1.1	0.40	275

IEC UTILIZATION CATEGORIES

LOW VOLTAGE UTILIZATION CATEGORIES

NATURE OF CURRENT	CATEGORY	TYPICAL APPLICATIONS	RELEVANT IEC PRODUCT STANDARD
a.c.	AC-1	Non-inductive or slightly inductive loads, resistance furnaces.	60947-4
	AC-2	Slip-ring motors: starting, switching off.	
	AC-3	Squirrel-cage motors: starting, switching off motors during running.	
	AC-4	Squirrel-cage motors: starting, plugging ¹ , inching ² .	
	AC-5a	Switching of electric discharge lamp control.	
	AC-5b	Switching of incandescent lamps.	
	AC-6a	Switching of transformers.	
	AC-6b	Switching of capacitor banks.	
	AC-7a	Slightly inductive loads in household appliances and similar applications.	
	AC-7b	Motor-loads for household applications.	
	AC-8a	Hermetic refrigerant compressor motor control with manual resetting of overload releases.	
	AC-8b	Hermetic refrigerant compressor motor control with automatic resetting of overload releases.	
	AC-12	Control of resistive loads and solid-state loads with isolation by optocoupler.	60947-5
	AC-13	Control of solid-state loads with transformer isolation.	
	AC-14	Control of small electromagnetic loads.	
	AC-15	Control of a.c. electromagnetic loads.	
	AC-20	Connecting and disconnecting under no-load conditions.	60947-3
	AC-21	Switching of resistive loads, including moderate overloads.	
	AC-22	Switching of mixed resistive and inductive loads, including moderate overloads.	
	AC-23	Switching of motor loads or other highly inductive loads.	
a.c. and d.c.	A	Protection of circuits, with no rated short-time withstand current.	60947-2
	B	Protection of circuits, with a rated short-time withstand current.	
d.c.	DC-1	Non-inductive or slightly inductive loads, resistance furnaces.	60947-4
	DC-3	Shunt-motors, starting, plugging ¹ , inching ² , dynamic breaking of motors.	
	DC-5	Series-motors, starting, plugging ¹ , inching ² , dynamic breaking of motors.	
	DC-6	Switching of incandescent lamps.	
	DC-12	Control of resistive loads and solid-state loads with isolation by optocouplers.	60947-5
	DC-13	Control of d.c. electromagnets.	
	DC-14	Control of d.c. electromagnetic loads having economy resistors in circuit.	
	DC-20	Connecting and disconnecting under no-load conditions.	60947-3
	DC-21	Switching of resistive loads, including moderate overloads.	
	DC-22	Switching of mixed resistive and inductive loads, including moderate overloads, (e.g. shunt motors).	
	DC-23	Switching of highly inductive loads, (e.g. series motors).	

¹ By plugging is understood stopping or reversing the motor rapidly by reversing motor primary connections while the motor is running.

² By inching (jogging) is understood energizing a motor once or repeatedly for short periods to obtain small movements of the driven mechanism.

General – c3controls and Customer agree that the terms and conditions identified in this document and in any written c3controls specification of services to be furnished hereunder shall govern exclusively the sale or licensing by c3controls of all Goods, products and services (collectively referred to as “Goods”). No addition or modification to any of the terms and conditions as they appear in this document shall be binding upon c3controls unless agreed to in writing and signed by an authorized representative of c3controls. c3controls objects to all other terms and conditions that may be proposed by Customer.

Payment Terms – Payment terms to Customers with Satisfactory credit are net fifteen (15) days from date of invoice. Payment terms extended to customers enrolled in c3controls Loyalty Programs or c3controls authorized Stocking Distributor Program, with an account in Good Standing, are net thirty (30) days from date of invoice. If payment of any amount owed to c3controls is not made when due, c3controls reserves the right (in addition to and without limitation of its other rights) to suspend further performance without liability until such payment has been made. Customer agrees to reimburse c3controls for reasonable attorneys’ fees and any other costs associated with collecting delinquent payments.

Minimum Order – c3controls has a \$49 minimum order policy. Customers with established credit terms and in good standing, may submit their order through a purchase order. Customers who do not have established credit terms must make purchases by credit card (MC, Visa or AmEX).

Credit Card Payments – Customers making payment by credit card authorize c3controls, through its software subscription service, to collect all payments due and owing on all open invoices.

Shipment – Shipment will be F.O.B. c3controls factory, warehouse or other point of shipment by c3controls. Customer to pay all shipping, insurance and related expenses. COD orders will be processed through c3controls carrier of choice and include a handling fee. Scheduled or stipulated shipping dates are approximate and based upon prompt receipt of all necessary information from Customer. If shipment is delayed at the request of or due to acts or omissions by Customer, c3controls shall have the right to store the Goods at a place of its own choice at Customer’s risk and expense.

Backorders ship at Customer expense. Additional shipping charges will apply to each shipment. Backorders will be held based on customer request.

Title and Responsibility – Title to Goods shall remain with c3controls as security only and until full payment is received by c3controls. Risk of loss or damage shall pass to Customer upon shipment from F.O.B point.

All replacement Goods provided hereunder shall be furnished on an exchange basis and may be new or, if not new, shall be equivalent in performance. The returned Goods which are replaced shall become the property of c3controls.

Export Packing – c3controls will pack Goods for air shipment and underdeck shipment in accordance with its regular export standard at no additional charge to Customer. Where such packing for export must conform to definite specifications that differ from

the c3controls standard, Customer will be charged for the extra cost incurred.

Shipping Weights and Dimensions – Published weights are careful estimates but are not warranted. Dimensions shown in catalog are approximate.

Quotations – All written quotations automatically expire unless accepted within thirty (30) days from the date quoted. Verbal quotations expire at the close of business on the same day that they are made. In order for catalog orders to be binding, quotations must specifically identify Goods and list the actual quantities involved. All stenographic and clerical errors by c3controls are subject to correction. All quotations are subject to approval by an authorized representative of c3controls.

Published Prices – Prices shown in any c3controls publication are subject to change without notice and are not to be construed as a definite quotation or offer to sell by c3controls. Such publication is maintained only as a source of general information, and any prices shown therein are subject to confirmation with a specific quotation. Orders will be invoiced at prices prevailing at time of shipment.

With respect to services, unless otherwise agreed in writing by c3controls and Customer, (i) the price of any services shall be the c3controls published price therefore in effect as of the date such services are provided; and (ii) c3controls shall have the right to increase or decrease the price of any service effective with respect to any portion of service that have not been provided as of the date of such price change.

Published Documentation – The scope of the product, which shall include, but not limited to, range, description, specifications, or dimensions, shown in any c3controls publication is subject to change without notice. Such publication is maintained only as a source of general information, and any information shown therein is subject to confirmation. For manufacturing purposes, refer to the dimensions provided in the c3controls instruction leaflets, engineering drawings, or the dimensions provided on the products.

Taxes – The Customer shall pay or reimburse c3controls for all sales, use, excise or similar taxes.

Scope Change – All changes affecting Goods, delivery date or otherwise affecting the scope of the order are to be documented in writing and are subject to prior written approval of an authorized representative of c3controls. All changes approved by c3controls may result in price, delivery, specification, and/or other changes.

Limited Lifetime Warranty – Unless otherwise provided in writing and approved by c3controls, c3controls warrants, for a period of ten (10) years (which period is a reasonable Lifetime of the Product) from the date of the c3controls invoice, that all c3controls electrical control components & manufactured Goods (excluding panel assemblies, enclosures, plotter, plotter accessories and clearance sale products) will be of merchantable quality and free from defects in material workmanship and design in accordance with generally recognized, applicable and accepted practices and procedures in the industry as of the date of shipment of such Goods by c3controls.

c3controls’ warranty hereunder shall include specifications as agreed upon in writing by c3controls prior to the date of shipment; provided, however, that c3controls will not be liable for any loss or damage resulting from any design furnished by Customer and incorporated into the Goods. c3controls’ warranty hereunder extends to Goods purchased by c3controls for sale with the Goods manufactured by c3controls only to the extent that the decision to incorporate such Goods is made solely by c3controls. Components manufactured by a third party (“Third-Party Components”) may be integrated into, contained in, incorporated into, or attached to c3controls finished panel assembly Goods. While c3controls provides a five (5) year warranty on the panel assembly of the finished product containing Third-Party Components, the Third-Party Components are not covered by the warranty in c3controls’ Limited Lifetime Warranty or any warranty by c3controls. Any warranty applicable to a Third-Party Component shall be limited solely to the warranty extended by the original manufacturer of the Third-Party Component. For the avoidance of doubt, SELLER MAKES NO REPRESENTATIONS OR WARRANTIES WITH RESPECT TO ANY THIRD-PARTY COMPONENT, INCLUDING ANY (a) WARRANTY OF MERCHANTABILITY; (b) WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE; (c) WARRANTY OF TITLE; OR (d) WARRANTY AGAINST INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS OF A THIRD PARTY; WHETHER EXPRESS OR IMPLIED BY LAW, COURSE OF DEALING, COURSE OF PERFORMANCE, USAGE OF TRADE OR OTHERWISE. If a warranty issue arises in relation to a Third-Party Component, it must be reported to c3controls so that c3controls can coordinate any warranty through the third-party manufacturer.

Otherwise, and Again, any warranty applicable to such purchased Good Third-Party Components shall be limited solely to the warranty extended by the original manufacturer.

Repaired or replaced Goods are warranted for a period of six (6) months from the date of shipment of the replacement, or for the remainder of the original warranty term, whichever is longer.

Warranty coverage hereunder must be consistent with other provisions herein and shall be limited to the replacement, repair or modification of, or issuance of a credit for, the Goods involved, at c3controls’ option, and only after the return of such Goods with c3controls consent in accordance with RETURN OF EQUIPMENT.

Warranty coverage hereunder is available only if (i) c3controls is promptly notified in writing upon discovery of an alleged defect, and (ii) c3controls’ examination of the subject Goods discloses, to its satisfaction, that any alleged defect has not been caused by misuse; neglect; improper installation; improper operation; improper maintenance, repair alteration or modification; accident; or unusual deterioration or degradation of the Goods or parts thereof due to physical environment or due to electrical or electromagnetic noise environment. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESSED, IMPLIED OR STATUTORY INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS and thereby excludes certifications

or the like for product performance, use or design with respect to any standard, regulation or the like (unless and to the extent independently approved in writing by an authorized representative) of C3CONTROLS AND (iii) EXTENDS ONLY TO CUSTOMER PURCHASING FROM C3CONTROLS OR AUTHORIZED C3CONTROLS RESELLER.

Limit of Liability – IN NO EVENT, REGARDLESS OF CAUSE, SHALL C3CONTROLS ASSUME RESPONSIBILITY FOR OR BE LIABLE (i) FOR PENALTIES OR PENALTY CLAUSES OR ANY DESCRIPTION, OR (ii) FOR INDEMNIFICATION OF CUSTOMER OR OTHERS FOR COSTS, DAMAGES, OR EXPENSES EACH ARISING OUT OF OR RELATED TO THE GOODS OR SERVICES OF THIS ORDER, OR FOR CERTIFICATION, UNLESS OTHERWISE SPECIFICALLY PROVIDED HEREIN, OR (iii) FOR INDIRECT OR CONSEQUENTIAL DAMAGES, UNDER ANY CIRCUMSTANCE, INCLUDING ANY LOSS, INJURY OR OTHER DAMAGES. C3CONTROLS MAXIMUM LIABILITY, INCLUDING DIRECT DAMAGES, SHALL NOT EXCEED THE AMOUNT OF THE PURCHASE ORDER. THIS LIMITATION OF C3CONTROLS LIABILITY WILL APPLY REGARDLESS OF THE FORM OF ACTION WHETHER IN CONTRACT OR TORT INCLUDING NEGLIGENCE. ANY ACTION AGAINST C3CONTROLS MUST BE BROUGHT WITHIN TWELVE (12) MONTHS AFTER THE CAUSE OF ACTION ACCRUES. Notwithstanding any provision of these Terms and Conditions, c3controls shall not be liable to any person for incidental, indirect, special or consequential damages, or for lost profits, savings or revenues of any kind, whether or not c3controls has been advised of the possibility of such damages. For purposes of this section, c3controls shall be deemed to include c3controls, its subsidiaries and affiliates, and the directors, officers, employees, agents, representatives, subcontractors and suppliers of all of them.

Export Control – Any Goods or technical data supplied by c3controls under these Terms and Conditions are subject to the United States Export Administration Act and Regulations thereunder, which includes the licensing of certain products. It is the responsibility of the exporter to comply with the Act and Regulations.

Return of Equipment – Approval for return of Goods, whether under the Warranty clause or otherwise, must be obtained in writing from an authorized representative of c3controls. No approval shall be granted for the return of clearance sale products, or for the return of Goods under any circumstances where the original invoice date for such Goods is more than ninety (90) days prior to the date that a request is made to c3controls for such approval. All Goods returned must include reference to all pertinent order information for those Goods, including order, part, model, and serial numbers, as well as details of the system from which the Goods were removed, when appropriate. Except for Goods under warranty, cost for placing Goods returned for credit in a saleable condition will be charged to Customer.

Goods returned must be carefully packed so as to reach c3controls without damage. Goods accepted for return, which are not covered by a warranty, are subject to a minimum restocking charge, plus all transportation charges incurred by c3controls. Replacement Goods returned to c3controls must be in a repairable condition; otherwise, Customer will be billed per c3controls’ policy.

TERMS AND CONDITIONS

Goods built to Customer's specification or Goods that have been modified by Customer cannot be returned for credit under any conditions.

All Goods to be returned must be shipped to locations stipulated by c3controls at the time c3controls approves the return of the Goods. The shipping container of all returned Goods must be clearly marked in accordance with c3controls' directives.

All credit memorandums issued directly by c3controls expire one (1) year from the date of the c3controls credit memorandum. Credits are worth no cash value and are not valid with any other offer. No cash back. Credits are only valid on c3controls' product and must be redeemed directly through the c3controls factory, Beaver, PA, USA.

Cancellation and Termination – Any order or contract may be terminated by Customer by written notice and upon payment to c3controls of reasonable and proper cancellation charges, including but not limited to all labor, facility, and equipment costs identified in the order or contract and which have been incurred prior to the date of notice of cancellation. All additional costs resulting from the cancellation and ten percent (10%) of the final net price will be included in the cancellation charges to compensate for disruptions in scheduling, planned production, and other direct costs to c3controls.

Payment shall be made within thirty (30) days from date of invoice. c3controls shall have the right to cancel any order or contract at any time by written notice due to any breach of the order or contract by the Customer. c3controls shall be entitled to collect cancellation charges as identified above.

No termination by Customer for default shall be effective unless and until c3controls shall have failed to correct such alleged default within (45) days after receipt by c3controls of the written notice specifying such default.

Force Majeure – c3controls shall not be liable for any loss, damage or delay in delivery due to acts of God or causes beyond its reasonable control including acts of Customer, acts of God or military authority, fires, strikes, floods, epidemics, quarantine restrictions, war, riots, delays in transportation, embargoes, or inability due to causes beyond its reasonable control to obtain necessary engineering talent, labor, materials, or manufacturing facilities. In the event of such delay, the delivery date shall be extended for that length of time as may be reasonably necessary to compensate for the delay.

c3controls shall not be liable to Customer in any manner or be deemed to be in breach of the Same Day Shipping Guarantee because of any delay or any failure under the c3controls Same Day Shipping Guarantee if the delay or failure was due to any cause beyond c3controls reasonable control, which shall include, but not be limited to, acts of the Customer, acts of God or military authority, fires, strikes, floods, epidemics, quarantine restrictions, war, riots, delays in transportation, embargoes, or inability due to causes beyond its reasonable control.

Intellectual Property – c3controls shall defend any suit or proceeding brought against Customer or any Customer of Customer, so far as the same is based upon a claim that the design or construction of Goods sold by c3controls infringe a United States Patent, Copyright or Mask Work Registration (excepting a claim based upon a design or modification incorporated in such Goods at the request of Customer); provided that Customer promptly notifies c3controls of any such suit or proceeding in writing and provided that, at c3controls' expense, (a) Customer gives c3controls the right to defend or control the defense of any such suit or proceeding, including settlement, and (b) Customer provides all necessary information and assistance for defense on a timely basis. This obligation to defend shall extend, in the case of non-standard Goods sold by c3controls to Customer, to a claim based upon the use of Goods, but only when such use is not in combination with any other apparatus and only to the extent that c3controls was informed by Customer of such use in writing prior to the date of c3controls' shipment of the Goods. No implied license is granted to use the Goods in any infringing manner.

c3controls will pay all costs and damages finally awarded or agreed upon by c3controls that are directly related to any such claim. In the event the Goods, or any part thereof, is in such suit held to constitute infringement and the use of said Goods or part thereof is enjoined, c3controls will at its own expense either procure for Customer the right to continue using such Goods or part thereof, replace same with non-infringing Goods, modify the same so it becomes non-infringing, or remove the Goods and refund the purchase price and the transportation and installation costs thereof. THIS PARAGRAPH SETS FORTH C3CONTROLS ENTIRE LIABILITY WITH RESPECT TO ANY AND ALL INTELLECTUAL PROPERTY CLAIMS RELATED TO OR ASSOCIATED IN ANY WAY WITH THE GOODS.

Government Clauses and Contracts – No Government contracts, regulations or clauses shall apply to the Goods of this order or bind c3controls unless specifically agreed in writing by an authorized representative of c3controls.

Goods sold by c3controls are not intended to be used, nor shall they be used, as a "Basic Component" under 10 CFR 21 (NRC).

Visitor Passes – c3controls shall be provided such access to Customer's premises as c3controls deems reasonably necessary to enable c3controls to provide services to Customer in accordance with these terms and conditions and any applicable specification relating hereto. Notwithstanding anything in any visitor pass form, premises access agreement, or similar document presented by Customer to any c3controls representative as a condition of access to Customer's premises, c3controls and its representatives shall not: (i) be liable for any claim, injury or damage to Customer, its agents, employees or contractors or any third party relating to or arising out of c3controls visit or Customer's premises, except for incidents occurring

while c3controls personnel are on Customer's premises and only to the extent such claim, injury or damage results directly solely from the negligence of c3controls representative; (ii) waive any claim for loss or damage to person or property caused by Customer, its agents, employees, contractors, or any third party; or (iii) release Customer, its agents, employees, or contractors or any third party from any claim for injury, loss or damage to person or property occurring during c3controls visit to Customer's premises.

Assignment – This agreement may not be assigned by either party without the written consent of the other party except that c3controls may, without the consent of Customer, assign this agreement to a present or future affiliate or subsidiary or assign the right to receive payment hereunder thereto.

Governing Law – This agreement shall be deemed to be made in and performed in the Commonwealth of Pennsylvania and shall be governed by and interpreted in accordance with the laws of the Commonwealth of Pennsylvania, including its provisions of the Uniform Commercial Code, but specifically excluding the provisions of the 1980 UN Convention Contracts for the International Sales of Goods. If any portion of these Terms and Conditions are found to be invalid or unenforceable, the parties agree that the remaining portions shall remain in full force and effect.

Patterns, Molds, Tools and Dies – Notice will be given if special patterns, molds, tools or dies are required to complete any order. Charges for such patterns or tools do not convey title thereto nor the right to remove the same from c3controls' plant. If patterns, molds, tools or dies are not used for a period of two years, c3controls shall have the right to scrap them without notice to Customer.

Portfolio of world-class products

c3controls produces durable, well-designed electrical control products that perform reliably—even in the most punishing environments—that meet and exceed global standards for quality and safety. We're proud of our products. They're the result of over 40 years of experience in making things that solve the challenges machine builders face.
